Preface

Executive Statement

This document is the culmination of several years work to coordinate the information available to the Department of Child Services regarding abuse and neglect of children in the State of Indiana. The last Demographics and Trending Report was done to fulfill the changing needs of our partners and communities, to enable them to access the information, and to have a usable document. This report is the result of the efforts of a number of individuals, over an extended period, to present a model and form to be used in the future.

This report contains extensive and detailed information compiling statewide data from the individual counties in the State of Indiana. It is hoped that the use of this document will provide sufficient analysis and discourse regarding Indiana's children.

In reviewing this, we believe that the recent commitment to create the Department of Child Services and the investment made will be demonstrated by an evaluation of this data. The investments include, but are not limited to:

- Additional Case Managers and Supervisors;
- Statutorily required caseload standards;
- Additional resources for administration of DCS;
- Organizational restructuring including regions;
- Management through Regional Services Councils;
- Improved and increased training for new staff, as well as increased training for ongoing purposes;
- Involvement with community partners such as providers, media, and community members; and
- A new practice model, which engages families, extended families, and community members in the dialogue of children's issues.

All of these measures, and more, provide the foundation for improved assessment, coordination, treatment, and resolution of issues regarding child abuse and neglect. The Demographics and Trending Report is designed to demonstrate those improvements.

It is not the intention of DCS to provide an in-depth analysis of this data and information. We do comment on some issues that appear significant and important, but leave other more in-depth and intense analysis of the data to others.

We also recognize that this data may be used for purposes of grant application, United Way and foundation analysis of resource applications, and for other systems and agencies to manage their responsibilities. We remain open for any questions or comments regarding this information and those questions or comments should be addressed to:

Highlights on Statewide Five Year Trending (page 8)

Total Reports Taken, Screen Outs, and Investigations (Assessments) Assigned

Screen Outs decreased significantly from last year, resulting in more assessments being assigned. The following graph depicts the total per State Fiscal Year, and the percentage change between SFY 2007 to SFY 2008.

	2004	2005	2006	2007	2008
Screen Outs	16,215	17,941	16,636	19,271	15,948
Investigations Assigned	46,655	48,850	56,047	56,850	64,946

Note: A Screen Out is a determination that an Abuse or Neglect report does not meet legal sufficiency to conduct an Investigation (Assessment).

Average Monthly Total CHINS and Percent of Placement to Total CHINS

The percentage of Own Home and Relative Home to total CHINS increased as Foster Homes and Residential Care decreased. Both of these outcomes reflect the success of the practice model and the use of the practice indicators as a management tool.

Removals by Category

Physical abuse and Neglect have each gone up significantly contributing to a 22.79% increase in total removals from SFY 2007 to SFY 2008.

Permanency Based off CHINS Case Type Closure Reasons

DCS received Assisted Guardianship funding which helped to increase Guardianship. Two other key areas were:

- Reunification, which has increased every year since SFY 2004, and
- Adoption, which increased 18.19 % from SFY 2007 to SFY 2008.

Highlights on Demographics (page 109)

Children Reported as Victims of Abuse and/or Neglect

The following table depicts all three decisions in an investigation by neglect and abuse.

Percent Change from SFY 2007 to 2008					
Substantiated		Unsubstantiated		Indicated	
Neglect	Abuse	Neglect	Abuse	Neglect	Abuse
-5.00%	-10.59%	10.07%	2.54%	12.59%	6.92%

Note: Abuse includes physical and sexual.

The number of children who were victims of sexual abuse in substantiated cases showed a decrease of 13.40% from SFY 2007 to 2008.

Source of Initial Child Abuse and Neglect Reports

Out of 28 report sources of substantiated investigations, the top 7 categories equal 82.08% of the initial reports:

1. Law Enforcement,
2. Hospital /Clinic,
3. School Personnel,
4. Parent /Guardian,
5. Public Social Agency,
6. Relative, and
7. Anonymous.

Map Showing the Number of Abuse and Neglect Children per 1,000 by Population Under the Age of 18 for Substantiated Cases

5 Highest Counties		5 Lowest Counties	
Crawford	27.5	Hamilton	3.49
Scott	27.5	Johnson	4.50
Perry	27.2	Clay	4.97
Pike	27.1	Jasper	5.05
Knox	25.4	Morgan	5.37

Characteristics of Children by Age and Gender

Children:

- For substantiated Neglect investigations, ages 0-3 have a higher incidence,
- For substantiated Physical Abuse investigations, ages 7-12 have a higher incidence, and

  Note: Boys are more likely to be Neglected and Physically Abused than girls.

- For substantiated Sexual Abuse, ages 13 + have a higher incidence.

  Note: Girls are at a higher risk to be Sexually Abused than boys.

Types of Maltreatment Allegations for Abuse and Neglect

The top 3 Maltreatment types with the highest age group of incidence were:

	Age Group
Sexual Abuse:	
1. Child Molesting	ages 7-12,
2. Sexual Misconduct with a Minor	ages 13 +, and
3. Incest	ages 13 +.
Physical Abuse:	
1. Inappropriate Discipline	ages 7-12,
2. Bruises/Cuts/Welts	ages 7-12, and
3. Illegal Manufacturing of Drug or Controlled Substance where Child Resides	ages 0-3.
Neglect:	
1. Environmental Life/Health Endangering	ages 7-12,
2. Lack of Supervision	ages 7-12, and
3. Lack of Food, Shelter, and Clothing	ages 7-12.

Perpetrator Profile of Substantiated Investigations

Parents are the most likely perpetrator of substantiated investigations (69.73% of total perpetrators), as shown in the following table.

Perpetrator Relationship to Victim	Sexual Abuse	Physical Abuse	Neglect	Total
Mother	36	750	10,396	16,429
Father	265	810	4,172	
All Perpetrators	3,458	2,361	17,742	23,561

Actual CHINS Data by Population Under Age 18

5 Highest Counties, CHINS per 1000		5 Lowest Counties, CHINS per 1000	
Crawford	25.2	Carroll	0.0
Scott	23.4	Clay	0.2
Perry	17.2	Warren	1.0
Knox	16.9	Parke	1.4

Children Free for Adoption by Age, Gender, Race, and Type of Placement

Fifty-one percent of Children free for adoption (i.e., not in adoptive placement and non-Finalized adoptive placement) were between the ages of 9 to 17.

Highlights on Child Support (page 165)

Indiana's child support performance continues to trend steadily in a positive direction. Child support collections are increasing, including a rise in income withholding and unemployment collections from $77.4 million in December 2004 to $103.6 million in December 2008. Undistributed collections (i.e., payments which cannot be disbursed to custodial parents for reasons such as missing addresses or incorrect court order information) are a focus for the agency, and are steadily decreasing. Finally, performance on four measures mandated by the federal government also continues to rise:

- Paternity Establishment,
- Support Order Establishment,
- Current Support Collections, and
- Cases Paying on Arrears.

Department of Child Services
Demographic Trends Report
State Fiscal Year 2008

Indiana Child Welfare Information System (ICWIS) Overview

During 1995 and 1996, the Indiana Child Welfare Information System (ICWIS) was designed and developed. This system provides Indiana with child protection services intake capabilities as well as case management and administrative management capabilities. This statewide system allows the child welfare staff in local offices of the Department of Child Services to record all calls, whether for voluntary services or to take a report of a suspected case of child abuse or neglect. The system performs historical searches to identify prior involvement in child abuse or neglect, identifies types of service needed and potential service providers for those services. It records the relationships and roles of the individuals, records the types of abuse or neglect, and recommends to the local worker the time frames for response and the type of response to meet the situation.

Contained within the system are risk, and strengths/needs assessment tools and a central statewide client index.

The technology provides a vehicle to record the processes and procedures used by both local and central office child welfare staff. This system promotes consistency of policy across the state in assessing risk for abused/neglected children, as well as matching resources to family needs more effectively. The system also provides strong security for the information it collects. Indiana has very specific confidentiality requirements, and the system enforces those requirements. This helps to prevent inappropriate sharing of abuse and neglect information.

Reporting

ICWIS provides data collection for the federal Adoption and Foster Care Analysis and Reporting System (AFCARS) and the National Child Abuse and Neglect Data System (NCANDS) reporting. ICWIS also provides statistical support for identification of services, as well as information that provides the opportunity to plan and target funding toward the development of needed services. ICWIS utilizes a point in time reporting format for the majority of the reports; however, real time data reports can also be generated.

History

In the mid-1990s, the federal government began requiring that all states implement an electronic method for their Adoption and Foster Care Analysis and Reporting Systems (AFCARS) reporting. Along with that requirement came federal funding, with the government reimbursing 75 percent of the costs to implement such a system. During 1995 and 1996, the ICWIS was designed and developed by UNISYS Corporation. The system was implemented in all 92 counties by March 1997. Each county worked from its own independent data system. Each night all 92 counties were uploaded to a centralized data system in Indianapolis to assure confidentiality of clients. In 2004 the data system was changed so the data from all counties were maintained in a centralized system in Indianapolis and no longer uploaded each night. This change was implemented to improve data security, reduce data loss, and reduce system maintenance costs. Application data access security insures confidentiality of clients in the centralized data system.

Technical Description

Originally, ICWIS was a three-tiered client/server application. An Ethernet LAN linked client workstations to county servers. Each county server was connected to the primary server in Indianapolis over a high-speed frame relay network. E-mail and bulletin board capabilities were available to all 1400 users. The system was an Oracle database using PowerBuilder screens on an IBM server using Microsoft NT or higher. The system is being redesigned and rewritten to use Microsoft .NET technology to enhance the screens and user interface while continuing to use the

Oracle database. The redesigned system will be implemented using a phased approach throughout 2009 and 2010.

Contracts

There are no contracts in place with a major vendor to support ICWIS. All development and maintenance efforts are by state staff and independent contractors working directly for the state.

Changes Affecting Data Collection Methods

Here is a list identifying some of the changes in the data collected over time. This will be helpful when viewing data for trend analysis. It may help explain some variances in the data from year to year and facilitate interpretation of the data. Understanding what the data is actually reflecting about program activity is crucial for program development and policy making.

- During 1995 and 1996 the ICWIS was designed and developed by Unisys Corporation.

- In March 1997 the system was implemented in all 92 counties. Each county works from an independent data system. Each night, data from all 92 counties is downloaded to a centralized data system in Indianapolis. The reason for the independent nature of the counties data systems is to ensure confidentiality of clients.

- Prior to 1996, abuse/neglect reporting was based on a hierarchy of abuse with sexual being the most severe followed by physical and last by neglect. That meant if a child suffered multiple types of abuse/neglect, only the single most severe type was reported. Due to a change in the federal reporting requirement in 1999, ICWIS was required to report all incidences of abuse/neglect so one child could potentially have multiple reports of abuse/neglect. Therefore, comparisons of data before and after 1999 are not feasible.

- There are two types of duplication possible in abuse/ neglect data. One is when the report of abuse/neglect can indicate more than one type of abuse/neglect; i.e., sexual abuse, physical abuse or some combination with neglect and the child is counted once for each type of abuse/neglect in the report. The other is when there is more than one report of abuse/neglect for a child in the year and the child is counted for each report, but only counted once under one category of abuse/neglect for each report.

- From1997-1999, the counties did manual reporting as they transitioned into ICWIS. In 2000, an influx of transitional information was entered into the data reporting system. A policy directive mandated all child welfare workers to enter all their cases into ICWIS. This involved a massive effort to enter cases that were opened in previous years but not entered in ICWIS. So old cases, intakes, and investigations from 1997-1999 were entered into the system and reflected in 2001 data resulting in higher numbers reported for 2000-01.

- The indicated category was included in the abuse/neglect reporting from 1993 – 1995. The term “Indicated” was used when a child abuse and/or neglect report was made but there was insufficient evidence to substantiate or unsubstantiated the report. However, there was a reason to suspect the child may have been maltreated or was at risk for abuse and/or neglect. Indicated cases were included in the reporting of substantiated abuse cases from 1993 – 1995. The “indicated” status was discontinued in 1995. The inclusion of indicated cases with substantiated cases from 1993 –1995 appears to have resulted in higher numbers of abuse being reported compared to subsequent years.

- As a result of passage of HEA 1194-2003, effective 7-1-04, the indicated status was again being reported.

- Abuse/neglect data on unsubstantiated investigations from 1997 – 2000 were expunged after six months, and aggregate numbers were not retained for these investigations for the years 1997 - 2000. This practice resulted in lower numbers being reported for unsubstantiated investigations for this period of time. Since 2000, aggregate data for unsubstantiated investigations has been collected and reported.

- ICWIS utilizes a point in time reporting format. A report is a snapshot of what is known on the last day of the month. Over the course of the year, the user makes updates and modifications to the data; so if pulled again, it reflects different information. A point in time average for a specified period of time can be calculated using the count of children at the end of each month divided by the number of months specified.

- Data within ICWIS is dynamic, which means that data changes day by day according to new data entries from the field. Thus, reports from ICWIS have the potential for showing different data from the same report if they are pulled after an update to the Central Database or to the databases of individual counties.

- Adoption data in ICWIS for 1990-2001 was based on numbers that were self-reported by local offices for all children in DCS custody who were adopted. Since this adoption reporting was done manually, the reliability of the data cannot be verified. ICWIS data does NOT include private adoptions. In 2002, a policy decision was made to discontinue use of manual reporting for adoptions, and rely solely on data entered into ICWIS for adoption counts.

- Prior to 10/15/04, institutional investigations were counted in Central Office. Since 10/15/03, institutional investigations have been counted in the county in which they occur.

Statewide
Five Year Trending

This page intentionally left blank.

Department of Child Services
Description of the Data Used in Trending Section
State Fiscal Year 2004 to 2008
July 1, 2003 to June 30, 2008

Comparison of Substantiated Abuse and Neglect Per Thousand Children Under Age 18

This data comes from the ICWIS Annual Report data report number 125 which summarizes the substantiated, indicated, and unsubstantiated reports by county. For the purposes of this report, it is using only the Substantiated column. Substantiations are then compared to the US Census estimates for persons under age 18. This number is determined by taking the July estimate for the beginning of each State Fiscal Year. For example, SFY 2002 uses the July 2001 estimates. This figure is the total population estimate minus the estimate for Age 18 and older. The Substantiated number is divided by the Under Age 18 number. This would give the rate per person under age 18. This number is then multiplied by 1,000 to get the final rate per 1,000 person under age 18

Average Monthly Total CHINS and Percent of Placement to Total CHINS

This data comes from the ICWIS internal CHINS JD/JS Reports. The average of each month for the period is calculated for each placement category and for total CHINS. These numbers are then compared by taking the average placement category number and dividing by the average total CHINS to obtain the percent of Placement Category to Total CHINS. The individual percentages will not total 100% due to rounding.

Total Reports Taken, Screen Outs, and Investigations Assigned

This data comes from the internal ICWIS report “Intake Statistics by County Reports”. ICWIS rolls up aggregate data into these tables each month. The report totals each month’s Reports Taken, Screen Outs and Investigations Assigned. An Ad Hoc query was used to extract the data for the correct time period. The data for each fiscal year is summed to obtain the yearly numbers. Screen Outs and Investigations Assigned will not equal Total Reports Taken.

Removals by Category

This data comes from the ICWIS tables 'Removal' and 'Removal_Cond' . The 'Removal_Cond' table has indicator fields for each of the categories use in the breakdown. The category 'Parent Drug / Alcohol Use' field is a combination of the indicator fields 'DRUG_PARENT' and 'ALCOHOL_PARENT'. State fiscal year data is filtered using the 'removal_dtm' field. The same removal may be counted in more than one category. Therefore, the sum of the categories will not equal the total removed.

Cases Closed by Closure Reasons

This data comes from the ICWIS table 'CSCH_CSTP_STATUS' which has the closure reasons. For purposes of this report, the closure reasons were grouped into 8 categories. These are as follows:

Adoption – Child Adoption Finalized, Termination of Parental Rights
Emancipation – Child Reached Age of Majority (age 18), Emancipated Court Ordered (age 18), Extended Wardship Terminated (on court order for age 18 to 21)
Guardianship – Case Closed; AG case created, Child Placed with Legal Guardian
NA – No reason code given
Other – CHINS being filed, Death of Child, IA closed; CHINS opened, Other, Runaway, wardship, Terminated
Relative – Child placed with relatives
Reunification – Case Informally Adjusted, Child Already Reunited with parent(s) when wardship terminated, Child never removed from own home, wardship terminated, Child Returned to Primary Home, Child Reunited with Parents, Period of IA ended code used for Informal Adjustment cases only, SRA completed
Transfer – Transfer to another agency

Closure error type reasons were filtered out. The last closure for each child case was counted during the year. Adoptions from cases closed by closure reasons will not match the adoptions data reported in the adoptions section of the D & T R because cases closed are self reported by the worker at the time the case is being closed. The adoption may not be finalized at this time. The adoptions data presented in the adoptions section

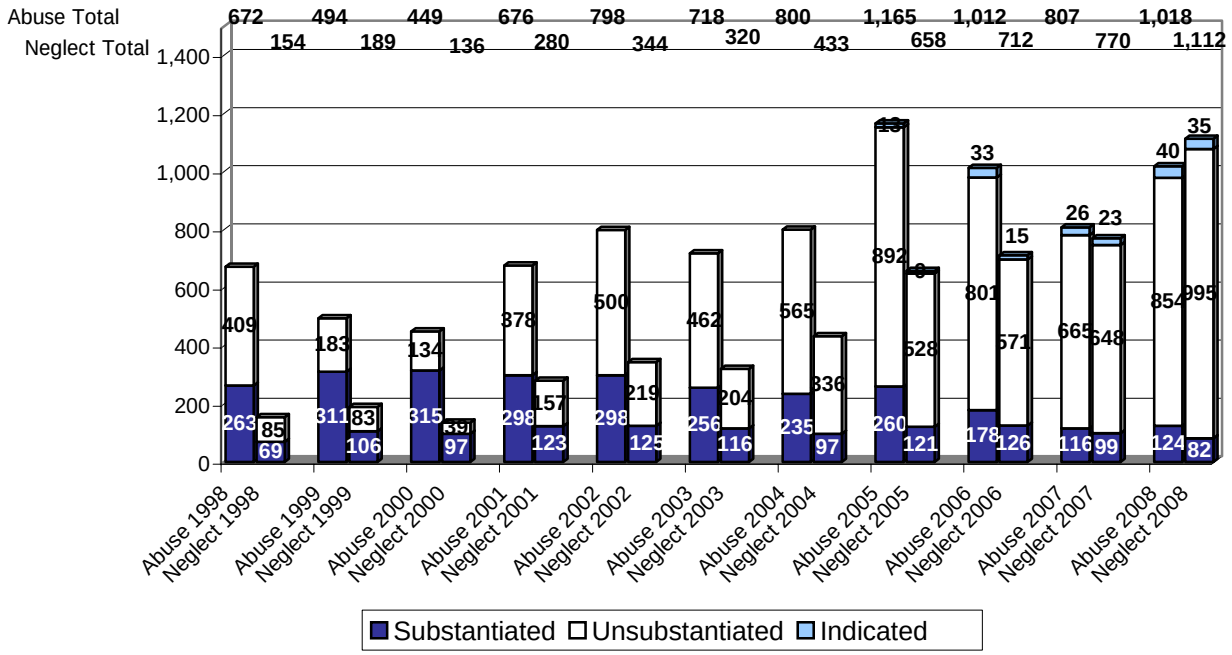
Institutional Child Abuse and Neglect Reports
State Fiscal Years 1998 to 2008



Data from 1998 used Federal hierarchy. Each Investigation is counted in only one category per investigation.

From 1997 to 2000, unsubstantiated cases were expunged and no aggregate data was kept.

Data from 1999 to 2008 the same investigation may be counted in each category. So a case with Physical and Sexual Abuse may be counted twice in the abuse total.

Table excludes private adoptions.

Children free for adoption are defined as children without finalized adoption who have an adoption case plan goal, have TPR, and have an adoption case type.

If there is an adoptive placement then those children free for adoption come under "Non-Finalized Adoptive Placement" Count.

Note: H = Hispanic and Non = Non Hispanic

Note: Adoptive placement is a placement where service code is "adoption" - not "substitute care".

Child Support

This page intentionally left blank.

Indiana Support Enforcement Tracking System (ISETS) Overview

Project Description

The Indiana Support Enforcement Tracking System (ISETS) is a federally mandated child support computer system. It assists child support workers in performing functions such as case initiation, location of non-custodial parents, paternity and support order establishment, case management, document generation and financial management (including payment processing of almost one billion dollars in child support payments). ISETS is utilized by staff in the offices of the Prosecuting Attorney and Clerk of Circuit Court in Indiana's 92 counties. It also supports the work of staff located in the Child Support Bureau central office. In addition, ISETS integrates with multiple other systems, agencies, and employers.

ISETS supports work on "Title IV-D" child support cases. Participants who receive Temporary Aid to Needy Families (TANF) are required to pursue Title IV-D child support services through the local county Prosecuting Attorney, as are selected Medicaid participants. For other families in need of support services, there is a one-time application fee of $25.00. Persons interested in receiving these services also work with the local county Prosecuting Attorney. The county programs provide child support services consistent with State and federal laws and regulations. These services include:

- Paternity establishment
- Location of non-custodial parents (NCPs)
- Establishment and enforcement of child and medical support obligations
- Collection, distribution, and disbursement of support payments
- Review and modification of support orders

ISETS also supports the payment processing and disbursement of all child support payments in Indiana, whether or not the case is part of the Title IV-D program.

History

In 1991, IBM won a competitively bid procurement to transfer the KASES child support computer system from Kentucky, modify it to meet Indiana's needs, and implement it as the ISETS system. During the ensuing 8 years, IBM and other vendors worked to implement the system county by county. In October 1999, Marion County was the final county to be implemented thus completing the statewide rollout of the system. Indiana formally received full Federal certification of ISETS in March 2002 -- the first state in the Midwest region to accomplish this task, and at that time, only the 17th state nationally to do so.

Currently, the ISETS team consists of State and vendor staff that monitors and maintains the ISETS software to ensure that it conforms to all Federal and State regulations, laws, and requirements.

Technical Description

ISETS resides on an IBM z/OS 390 mainframe where the application is written in COBOL / CICS / TELON. Communication to the 92 county AS/400s is done over a dedicated and secure T1 line to each county. Counties access ISETS information through the mainframe 'green screens' via a terminal emulation software that accesses the local AS/400 machine for that county. The entire ISETS application consists of 572 online programs that support 346 online screens, 1609 batch programs, and over 2.4 million lines of code. ISETS also accommodates over 30 different interfaces to send and receive information from Federal, State and local agencies, banks and

vendors. The database is DB2 but was converted from an IMS database. There are additional Microsoft-based development functionalities attached to ISETS such as an employer payment website.

Future

Two projects will be the main focus for CSB/ISETS over the next year. The ISETS State team is working toward a future direction for ISETS which means designing a new architecture that uses current technologies. CSB will be working with a vendor to do a business process analysis to understand our current business processes and work towards new future processes. As these projects move forward over the next year, they will merge with a roadmap of projects to move the technology into the 21st century.

The vision of the modernized ISETS is a secure, user-friendly and nimble system that will be an effective tool for maximizing the performance and success of the Indiana Child Support Program. The system will be scalable to meet increased production and user demands, and readily adaptable to implement legislative and organizational changes, without requiring extensive and costly, programming or redesign. In addition, the system will meet all federal system certification requirements as well as federal and state statute and regulatory requirements. The resulting capabilities will:

- Maximize child support collections through voluntary compliance and enforcement to promote families' economic self-sufficiency and to prevent welfare dependency.
- Maximize the receipt of information on child support customers to ensure that the agency can effectively serve its customers by establishing paternity and establishing, enforcing and modifying child support orders.
- Improve the delivery of child support enforcement while lowering costs of service.
- Capture, edit and process child support data at the source, making the data reliable and available for timely use throughout the organization.

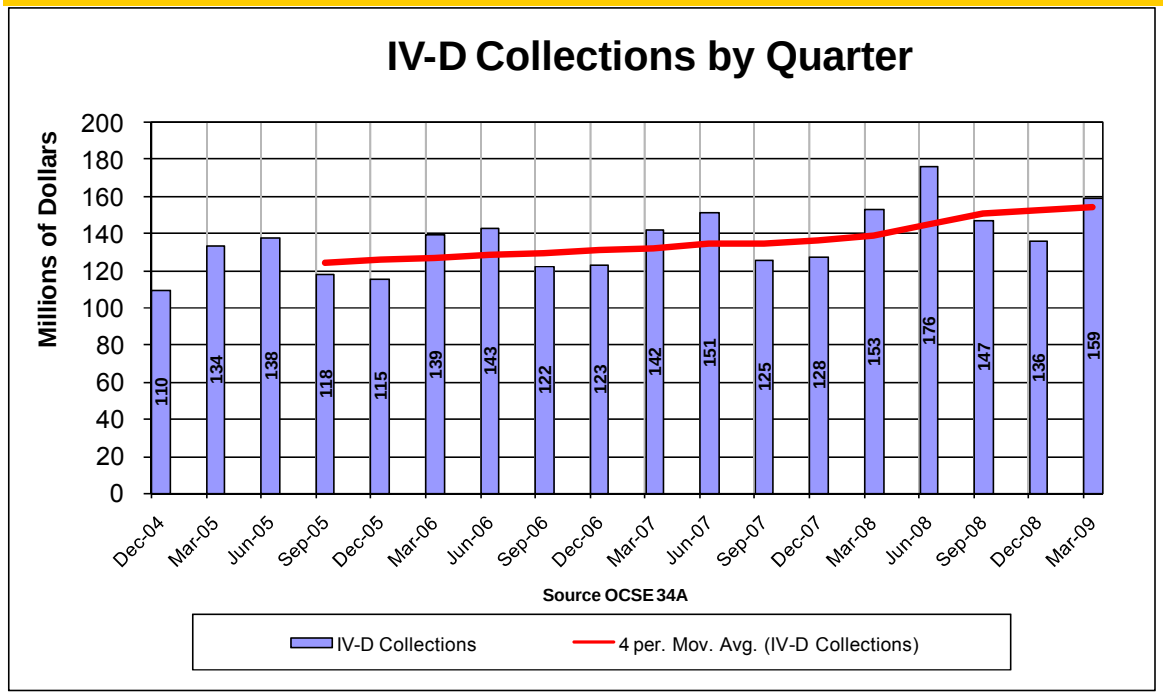
Contracts

In 2008, ISETS shifted from a prime vendor concept to a State managed approach in order to gain more control over the technical direction of the project. The vendors work directly with the State and have a reduced role in the overall leadership and management of the project which are now held by State positions. ISETS currently works with Deloitte Consulting, Briljent, EDS, Professional Data Systems and Crew.

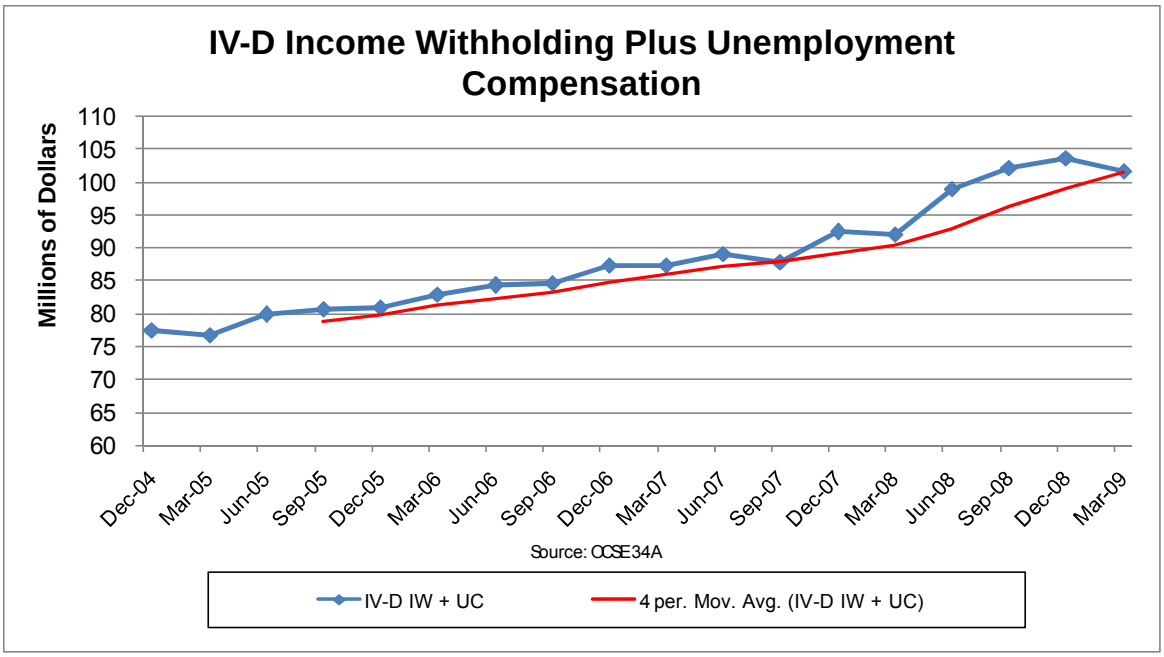
Current Data

Indiana's IV-D caseload is approximately 350,000. Enforcement efforts produced $566,771,326 in distributed IV-D child support collections in State Fiscal Year 2008. This is an increase of approximately 7% over the SFY 2007. The average amount collected per IV-D case has risen from $476 in 2004 to $584 in 2008. Overall IV-D and Non IV-D distributed collections for federal fiscal year 2008 totaled $943,906,971.

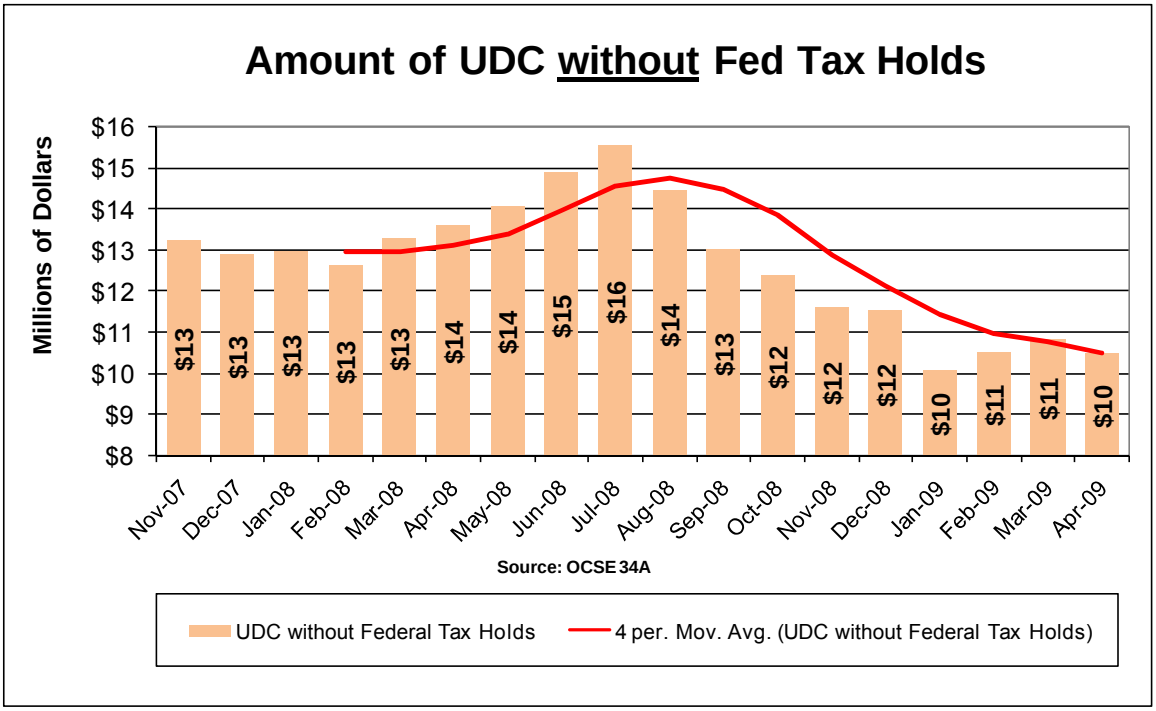
The following chart represents the trend for overall IV-D child support collections since December 2004, measured on a quarterly basis. Since child support collections can be cyclical in nature, particularly as a result of income tax offsets, it is useful to track a moving average over four quarters, as represented by the red line on the chart.



Income withholding and unemployment compensation payments make up approximately 65% of Indiana's overall IV-D child support collections; therefore trends in this area are also important to track. The following chart indicates that these collections have been steadily rising from $77.4 million in December 2004 to $103.6 million in December 2008. As in the previous chart, the red line indicates the moving average over the previous four quarters.



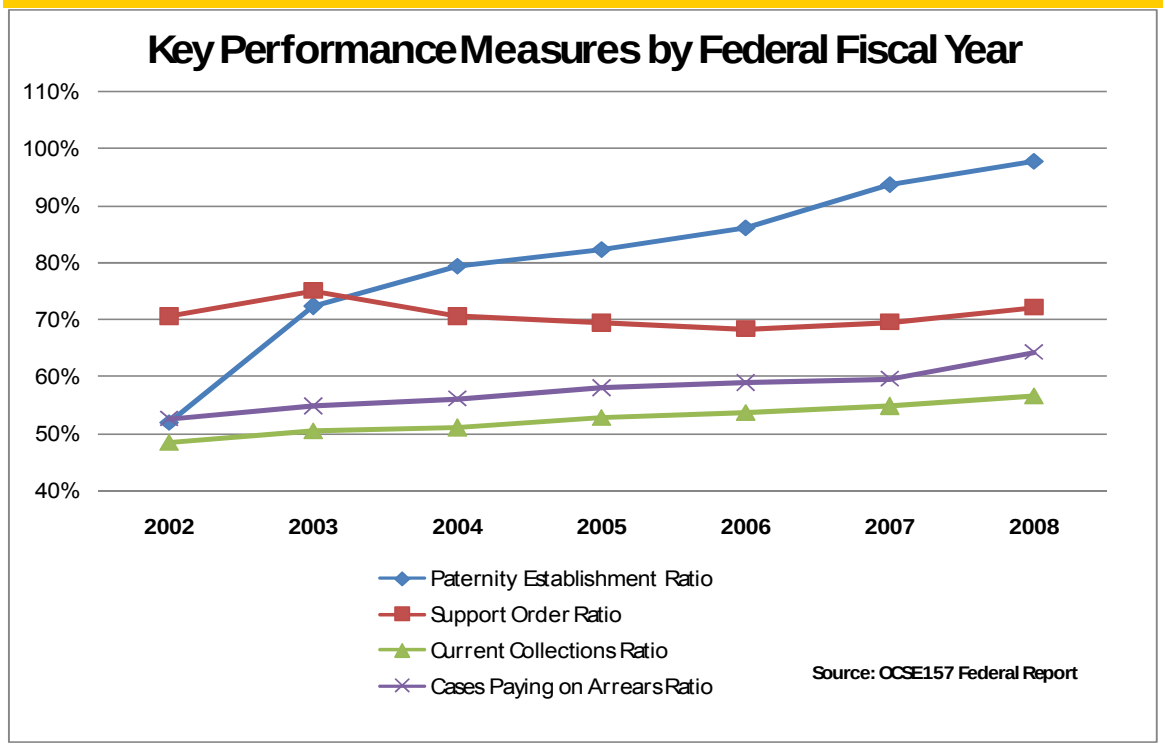
Another important measure of progress is Indiana's work on reducing its undistributed collections. (UDC). These are collections which cannot be disbursed to custodial parents for reasons such as missing addresses or incorrect court order information. Because of income tax offset collections, UDC also tends to be cyclical in nature, therefore the red line represents the moving average over the prior four months. UDC has been tracked only since November of 2007, but is on a consistent downward trend.



Finally, the federal Office of Child Support Enforcement (OCSE) uses several performance measures for state child support agencies. Always presented as ratios, these measures are:

- the number of children for whom paternity is established,
- the number of cases where a support order was established,
- the percentage of current child support collections as compared to the amount owed, and
- the number of cases that had at least one payment on child support arrearages.

Indiana's Paternity Establishment Ratio has increased 4.2% to 97.89% over FFY 2007 and the Support Order Establishment Ratio has increased 2.5% to 72.06% over FFY 2007 over the same period. The Current Support Ratio has increased 1.8% to 56.59 in FFY 2008 and the Cases Paying on Arrears Ratio increased 4.7% to 64.25%. The chart below indicates the trends in these measures since 2002:



Guide to Terms and Definitions:

IV-D Open Cases are the values included in Line 1 of the OCSE 157 Report to the Federal Government. The number of IV D cases open on the last day of the fiscal year, including the number of open cases at the end of the fiscal year as a result of requests for assistance received from other States. This number is based on the case counts from the Data Warehouse, and is therefore a "duplicated" count.

Current Assistance IV-D (Child Support) Case is a case where the children are: (1) recipients of Temporary Assistance for Needy Families (TANF) under Title IV-A of the Social Security Act or (2) entitled to Foster Care maintenance payments under Title IV-E of the Social Security Act. In addition, the children's support rights have been assigned by a caretaker relative to a State or Tribe, and a referral to the state or tribal IV-D agency has been made. Also a TANF IV-D Case or Foster Care IV-D Case.

Former Assistance IV-D Case is a case where the children formerly received Title IV-A (AFDC or TANF) or Title IV-E Foster Care services.

Never Assistance IV-D Case is a case where the children are receiving services under the Title IV-D program, but are not currently determined to be eligible for and have not previously received assistance under Titles IV-A or IV-E of the Social Security Act. A child support case is set up when a person requests a child support office to help them get child support money. The case file will have important papers such as birth certificates, court orders, information on the absent parent, etc. A never assistance case includes cases where the family is receiving IV-D services as a result of a written application for IV-D services, including cases where the children are

receiving state (not Title IV-E) foster care services, or a case in which they are Medicaid recipients not receiving additional assistance. Tribal and international cases are considered never assistance cases if the case status is unknown.

Temporary Assistance to Needy Families (TANF) Time-limited public assistance payments made to poor families, based on Title IV-A of the Social Security Act. TANF replaced Aid to Families with Dependent Children (AFDC-- otherwise known as welfare) when the Personal Responsibility and Work Opportunity Reconciliation Act (PRWORA) was signed into law in 1996. The program provides parents with job preparation, work, and support services to help them become self-sufficient. Applicants for TANF benefits are automatically referred to their State or tribal IV-D agency in order to establish paternity and child support for their children from the noncustodial parent. This allows the State or Tribe to recoup or defray some of its public assistance expenditures with funds from the noncustodial parent.

Paternity is the legal establishment of fatherhood for a child, either by court determination, administrative process, tribal custom or voluntary acknowledgment. A paternity acknowledgment involves the legal establishment of fatherhood for a child through a voluntary acknowledgment signed by both parents as part of an in-hospital or other acknowledgement service.

Paternity Establishment Ratio (also called the Paternity Establishment Percentage) is a Federal Performance Incentive measure calculated as the ratio of Line 6 ÷ Line 5a of the OCSE 157 Federal Report. The percentage may be higher than 100% for two reasons: 1) the denominator may include paternity established for children in closed cases, and 2) it does not include children over 21, while the numerator does.

Support Order Ratio is a Federal Performance Incentive measure calculated as the ratio of Line 2 ÷ Line 1 of the OCSE 157 Federal Report. It is a per case measure of how many cases in the IV-D caseload have a support order established.

Current Support Ratio is a Federal Performance Incentive measure calculated as the ratio of Line 25 ÷ Line 24 of the OCSE 157 Federal Report. This is a dollars measure of how much current support was collected in the year versus how much current support was owed. Note that this measure is added up month by month, and does not include dollars paid to arrears subaccounts.

Cases Paying on Arrears is a Federal Performance Incentive measure calculated as the ratio of Line 29 ÷ Line 28 of the OCSE 157 Federal Report. This is a per case measure of how many cases had at least one dollar paid on an arrears subaccount versus how many cases had arrears owed. Note that if the only payment to the arrears subaccount was by federal tax offset, the case is not given credit.

Federal Fiscal Year is the period from October 1st to September 30th of the following year.

State Fiscal Year is the period from July 1st to June 30th of the following year.

Calendar Year is the period from January 1st to December 31st of the same year.

Data the following tables/graphs depict Open Cases and Distributed Collections per County.
