STATE OF INDIANA

DEPARTMENT OF LOCAL GOVERNMENT FINANCE

INDIANA GOVERNMENT CENTER NORTH
100 NORTH SENATE AVENUE N1058(B)
INDIANAPOLIS, IN 46204
PHONE (317) 232-3777
FAX (317) 232-8779

November 5, 2008

The Honorable Tamara Martin
Grant County Assessor
401 South Adams Street, Room 528
Marion, IN 46953

Dear Ms. Martin:

RE: 2008 Annual Adjustment Ratio Study

The Department of Local Government Finance has reviewed the information and data you originally submitted for the Grant County 2008 ratio study as well as the supplemental information. The Department hereby approves the ratio study results based on the study presented without verifying the actual data in order to allow the preparation and delivery of the real property list to the County Auditor pursuant to IC 6-1.1-5-14.

Further studies may be warranted in order to ensure that the annual adjustment process was followed. Additionally, we would encourage you to use all possible sales, which lend greater validity to the sales ratio study.

In conjunction with our Data Analysis section, please continue to ensure your sales disclosure file database is compliant. For assessment year 2009, your 2007 and 2008 sales disclosure data files must be compliant with the rules of the DLGF.

If you have any questions or concerns, please feel free to contact Barry Wood, the Assessment Division Director, at (317) 232-3762 or by e-mail at Bwood@dlgf.in.gov.

Sincerely,

Cheryl A.W. Musgrave
Commissioner

cc: Barry Wood, Assessment Director

An Overview of Grant County's 2008 Annual Trending
July 24, 2008

The following steps were taken to conduct the 2008 annual trending in Grant County:

Step 1: Re-Delineation of Neighborhoods

The vast majority of neighborhoods in Grant County were completely re-examined and, where necessary, re-delineated for annual trending in 2008. This would include the creation of new neighborhoods and the combination of neighborhoods as well. This portion of trending included all property classes. Some new neighborhoods were established for new construction and/or to establish more accurate assessments.

Step 2: Calculation of New Land Values

New land values were calculated for 2007 and in only limited circumstances did sales warrant new land values for 2008. For residential property, small adjustments may have been made based on sales, but the market adjustment factor was the primary means of updating residential property values. For commercial and industrial properties, land values generally stayed consistent between January 1, 2006 and January 1, 2007. Some market areas or some use types warranted influence factors; these factors were reviewed and adjusted accordingly.

Step 3: Calculation of New Residential Factors & Residential Studies

Per 50 IAC 14, a preliminary ratio study was conducted for vacant and improved residential at the township level. This study dictated which property classes required further analysis, stratification, reassessment or calculation of a new neighborhood factor. In some instances, especially in rural areas of Grant County, the preliminary ratio study indicated that assessments were both accurate and uniform. In other neighborhoods, further review was required. This resulted in the calculation of new neighborhood factors.

With regard to rental homes, the county has assembled a detailed income and expense data base that has allowed for the calculation of market rents, expenses, capitalization rates, and gross rent multipliers. This database is the primary method of valuing all rental homes, and in some cases larger apartment complexes.

Where appropriate neighborhoods were stratified based on similar characteristics of improvements. In townships where sales were few, 2005 and 2004 were added to increase the sample size for the improved and vacant residential tests.

Step 4: Updated Commercial & Industrial Improvement Values

New commercial and industrial cost table updates were the starting point for updating commercial and industrial improvement values. The county also changed the year of depreciation from 1999 to 2007. The Nexus Group Construction Cost Index (NCCI^{sm}) was used to update these cost tables. In addition to the small percentage changes across all use and wall types, some uses were re-examined as a whole (ex. golf courses, nursing homes, mobile home parks, etc.) often resulting in sizeable percentage changes. On average, gross costs increased approximately 7% between 2005 and 2007. However, adjustments above and below this average was applied for specific use types where more detailed construction costs were available. These detailed

construction cost models have been constructed by Nexus Group and applied uniformly by property class based on specific usage, wall type and other characteristics.

In addition to updating the cost tables, sales, income, and appraisal data was used to update commercial and industrial improvement values. In cases where these methods produced widely divergent values, the most appropriate valuation method was used for the specific property class. When comparable non-sold properties were identified and values from sales and/or income justified changes, the non-sold property was likewise adjusted. Income data collected from the field and through the appeals process was also used by property class or for specific, unique properties. In some specified cases where little or no comparable property existed within the township or county, this comparison process extended beyond the county borders so as to identify the most appropriate comparisons and valuations.

In townships where sales were few, 2005, 2004 ,2003 and 2002 were added to increase the sample size for the improved and vacant commercial and industrial tests.

Time adjustments were calculated based on the Office of Federal Housing Enterprise Oversight. Grant County was compared to the Kokomo, Indiana figure calculated.
