PHONE (317) 232-3777
FAX (317) 232-8779

October 30, 2008

The Honorable Jamie Shepherd
Howard County Assessor
236 North Main Street
Kokomo, IN 46901

Dear Ms. Shepherd:

RE: 2008 Annual Adjustment Ratio Study

The Department of Local Government Finance has reviewed the information and data you originally submitted for the Howard County 2008 ratio study as well as the supplemental information. The Department hereby approves the ratio study results based on the study presented without verifying the actual data in order to allow the preparation and delivery of the real property list to the County Auditor pursuant to IC 6-1.1-5-14.

Further studies may be warranted in order to ensure that the annual adjustment process was followed. Additionally, we would encourage you to use all possible sales, which lend greater validity to the sales ratio study.

In conjunction with our Data Analysis section, please continue to ensure your sales disclosure file database is compliant. For assessment year 2009, your 2007 and 2008 sales disclosure data files must be compliant with the rules of the DLGF.

If you have any questions or concerns, please feel free to contact Barry Wood, the Assessment Division Director, at (317) 232-3762 or by e-mail at Bwood@dlgf.in.gov.

Sincerely,

Cheryl A.W. Musgrave
Commissioner

cc: Barry Wood, Assessment Director

Procedures for Annual Adjustments
Howard County

Residential

Step 1: The Residential land values were trended by sales of vacant land within the neighborhood. Sales were used of vacant parcels as well as improved parcels that were vacant at the time of sale. In neighborhoods where there were no vacant land sales, the land was trended using an allocation of land to building using improved sales. Values were adjusted using trending factors; there were no base rates changed.

Step 2: After the land factors were established, those values were added to the current improvement values and compared to the improved sale prices. A separate trending factor was then applied to the dwelling of the property to raise or lower the values to an acceptable median level. If there were no sales in the neighborhood, then consideration was given to homes for sale in the neighborhood or the neighborhood was trended using similar neighborhoods or a township trending factor.

Step 3: The newly established trending factors were applied to all properties within that neighborhood and a sales ratio study and abstract were ran to verify the changes.

Commercial / Industrial

Step 1: The C/I land values were trended by sales of vacant land within the neighborhood. Sales were used of vacant parcels as well as improved parcels that were vacant at the time of sale. In neighborhoods where there were no vacant land sales, the land was changed by comparing them to like neighborhoods. Values were adjusted using trending factors; there were no base rates changed.

The land values for rural commercial and industrial properties were trended with the same factor applied to the residential land.

Step 3: After the land factors were established, those values were added to the current improvement values and compared to the improved sale prices. A separate trending factor was then applied to the improvements of the property to raise or lower the values to an acceptable median level. If there were no sales in the neighborhood, then consideration was given for sales of an earlier time period in the neighborhood or the neighborhood was trended as similar

neighborhoods. If earlier sales were used they were time adjusted by 1% to January 1, 2007.

For income producing properties, income data sheets were mailed out and GRM's or capitalization of income was used to assist in determining the values.

Step 4: The newly established trending factors were applied to all properties within that neighborhood and a sales ratio study and abstract were ran to verify the changes.

To: Department of Local Government Finance

You will find in this workbook the sales ratio and equalization study for Howard County. Please notify the Howard County Assessor as soon as possible with any questions or with the certification of acceptance.

There is a Grouping Tab. We combined sales for commercial and industrial properties. This is because Center, Harrison, Howard, and Taylor Townships all share the same neighborhoods down the US31 Corridor. In order to insure the proper annual adjustments for the commercial and industrial properties, we included parcels from 2005. We gathered sales, cost data, and income data to adjust the commercial and industrial properties in Howard County.

We thought we would answer some questions you may have ahead of time.

1. Center Township - Vacant Commercial properties were combined with other commercial properties due to neighborhoods crossing township borders.

2. Industrial land carries the same neighborhood number and price as commercial, so they were trended the same.

3. Honey Creek Commercial - We did not have any valid commercial sales in our timeframe in Honey Creek Township. However, Russiaville (in Honey Creek Township) and Greentown (in Liberty Township) are small towns that were trended with the same factors due to their comparability.

We tried to use all possible sales, even including foreclosures that represented the market in that neighborhood. We tried to identify neighborhoods that had a problem with foreclosures to insure they were treated correctly. We would like to point out, that while doing the trending there were a drop in the number of 2007 sales we had. This was really evident in commercial properties. With the economy doomly publicized, the tax payers are expecting their assessments to go down even if the sales compared to the assessments show the values should go up. This is evident by the increasing number of appeals each year. This is evident in Howard County where we had nearly 900 appeals for 2007 pay 2008. For this reason we lowered values where possible, but still kept our medians within the IAAO standards.

Please respond as soon as possible.

Thank You,

Jamie Shepherd
Howard County Assessor
