Over the last couple of years I have met numerous individuals and families impacted tragically by carbon monoxide. Sadly these events were all preventable if an inexpensive CO alarm had been in place. These people have lost precious loved ones that are missed horribly. My own son lost one of his dearest friends. I will never forget his sadness. I urge you and the members of the Fire Prevention and Building Safety Commission to please adopt the language of the 2018 International Residential Code, whole and intact, to help Indiana avoid preventable deaths caused by lack of carbon monoxide alarms. Please.

And thank you for contributing your time towards the good of every Hoosier. You have tough roles and not often enough thanks are given for being a positive force in our state.

Sincerely,
Marie Gilliland
