"We have deep concern for the safety of all people. We ask that you and the members of the Fire Prevention and Building Safety Commission to please adopt the language of the 2018 International Residential Code, whole and intact, so as to help Indiana avoid preventable deaths caused by lack of carbon monoxide alarms."

Indiana legislators must update their building code to require carbon monoxide alarms and smoke alarms in all new residential construction statewide along with every level of Rental property.

After reading the article by Dot Kesling in The South Bend Tribune stating her daughter passed in 2009 from carbon monoxide I cannot believe 10 years have passed and INDIANA still does not have this legislation passed! Ridiculous and frustrated.
