Giving direction through a complete selection of highway signs

Indiana Correctional Industries manufactures highway signs used to regulate and direct vehicle movement on the thousands of miles of Indiana highways. All signs made by Industries are in strict accordance with the specifications set by the Indiana Department of Transportation using their Manual on Uniform Traffic Control Devices. Our sign data is continually updated.

Industries provides a complete selection of road and highway signs and related materials for state, county and municipal requirements. This includes all those meeting INDOT and Federal Highway Administration specifications.

All highway signs are made according to specifications for grade of aluminum with either high intensity or engineering grade reflective sheeting. Neither grade will crack or peel in cold weather and both have a life expectancy of seven years.

Specialty Signs

Indiana Correctional Industries manufactures quality street signs and attractive informational signs for cities, counties, parks, recreational areas, campus grounds, buildings, institutions and many other locations. The same quality and workmanship goes into the specialty signs as our highway signs. Industries reproduces the graphics through the silk screen process and has computerized letter cutting capabilities.
