The Indiana Department of Environmental Management (IDEM) has prepared this fact sheet to inform the public of the process involved in issuing a Hazardous Waste Management Permit Class 3 Modification to Essroc Cement Corporation.

The Solid Waste Disposal Act, commonly known as the Resource Conservation and Recovery Act (RCRA) was passed in 1976. This allowed for the regulation of the management of hazardous waste. In the State of Indiana, the IDEM is authorized by the Indiana Environmental Statute, IC 13-22, to administer the hazardous waste permit program and related hazardous waste management requirements. Any facility which treats, stores, and/or disposes of hazardous waste in the State of Indiana is required to obtain a final hazardous waste management permit. In addition, any hazardous waste facility receiving a permit is required to provide corrective action for all releases of hazardous waste or of hazardous waste constituents from any solid waste management unit on-site.

Facility Description

Essroc Cement Corporation is located at 3084 West County Road 225 South, Logansport, Indiana. Essroc manufactures portland cement in two cement kilns at their Logansport facility. The kilns use hazardous waste-derived fuel in the manufacturing process. Their state hazardous waste permit allows them to store hazardous waste in tanks and containers prior to being utilized as part of the fuel make-up.

Modifications to the State Permit

This modification will allow Essroc to increase their container storage capacity, and add three (3) additional storage tanks, as part of a bulk waste handling system.

Public Participation

The public comment period for this operating permit modification began on the date of the public notice, October 14, 2010, and ends on November 29, 2010. The official public notice was published on October 14, 2010, in the Pharos-Tribune, Logansport, Indiana. Written comments with supporting documentation should be mailed to:
