			All old VCT under carpet will be left down and not disturbed. Any hazardous material abatement work will be done by a sub-contractor and not by Blakley staff. . Because the material charges will vary from job to job you will select the number of man hours from the ePro Catalog. However, you will not select the material cost as a specific item from the ePro Catalog. All materials charges must be entered as a special request line. If you know the material cost for the work when you enter your initial requisition, you will include it on your requisition. When expediting to a purchase order you will need to enter the vendor ID and location. Do not add the vendor to your requisition. If the material is identified after your original purchase order is issued, you will enter a special request requisition for the material and then copy the material line onto your existing purchase order. This process will work just like any other change order. The QPA Contract is set up to allow for this function (open item reference) so that the spend will tie to the contract. If you have questions on how to do this, please contact Angel Hackett.
