Comments:Origin DES - 07011018. SR 23 Dam project required mitigation for impacts to 0.75 acre of forested wetland, 0.09 acre of emergent wetland and 1,069 LF of stream impacts. The off-site mitigation included all but 759 LF of stream mitigation that was provided on-site that is still being monitored. The off-site mitigation has failed due to the lack of hydrology developing at the site. The USACE is requiring 3 credits of forested wetland, 0.27 credit of emergent wetland and 310 credits (LF) of stream. We are in the process of purchasing 0.27 emergent wetland credits from the Kankakee Sands Mitigation Bank. The forested wetland (\$285,000) and stream (\$155,000) mitigation credits must be purchased from the DNR IN SWMP program (total cost \$440,000). This credit purchase will replace what was proposed off-site.
