Level One/Two Audiology Provider Facilities
September 2011

This list was compiled from a survey sent to audiologists by the Early Hearing Detection and Intervention Program (EHDI) to facilitate families and professionals in finding services for children. The facilities were ranked by equipment available for infant audiologic testing as recommended by the Joint Committee on Infant Hearing (JCIH) and the National Center for Hearing Assessment and Management (NCHAM) and reported by survey responses. Level 1facilities have the recommended equipment to provide comprehensive diagnostic audiology services for newborns and young children to determine hearing status. Level 2 providers also provide comprehensive assessment, but are without one piece of the recommended equipment.*

Level One
