State Board of Pharmacy.....	20
Key Information on Indiana's Health Workforce, by Information Category	22
Education/Pipeline.....	22
Workforce Development	23
Medicaid	25
Health Systems/Health Care	26

Introduction and Background

The collection of supplemental information, such as practice location and future employment plans, from health professionals during license renewal is a best practice for informing health workforce planning.¹ Over the last several decades, the State of Indiana has committed to collecting supplemental information from health professionals through survey questions administered during online license renewal. This data has been used to inform various initiatives, including: Health Professional Shortage Area designations at the Indiana State Department of Health's Primary Care Office², supporting State Loan Repayment Program implementation^{3,4}, Medicaid provider analysis and recruitment,⁵ Primary Care Needs Assessments⁶, and various technical reports and policy briefs on Indiana's health professionals⁷.

Until 2019, the survey questions collecting supplemental information from health professionals during the biennial license renewal process were voluntary. In 2018, Senate Enrolled Act 223⁸ transitioned collection of specified supplemental information from voluntary to mandatory licensees of selected health professional boards. At this time, the following information is required to be provided by licensees of the following health professional boards:

Information required to be provided by health professionals:

- The practitioner's specialty or field of practice.
- The following concerning the practitioner's current practice:
 - o The location or address.
 - o The setting type.
 - o The average hours worked weekly.
 - o The health care services provided.
- The practitioner's educational background and training.
- For a practitioner that is a prescriber (as defined in IC 25-1-9.5-4), whether the practitioner delivers health care services through telemedicine (as defined in IC 25-1-9.5-6).

Boards Affected by SEA 223-2018:

- Medical Licensing Board
- Indiana State Board of Nursing
- State Board of Dentistry
- Behavioral Health and Human Services Licensing Board
- State Psychology Board
- Indiana Board of Pharmacy

Within SEA 223-2018, legislation outlined that the information collected in this law must be compiled in an annual report. This report serves to fulfill that requirement and aggregate information and resources on Indiana's health workforce to enhance accessibility and utilization of this information.

Supplemental Information on Indiana’s Health Workforce, by License Type

The following sections of this report summarize supplemental information collected in accordance with Senate Enrolled Act 223-2018, including: educational characteristics, specialty, telemedicine, and services provided. Professionals included in these sections renew their licenses on a biennial basis, and as such, supplemental information are updated biennially. Supplemental information are presented for licenses included in SEA 223-2018. Additional information on other license types may be available upon request from the General Assembly or a state agency.

SEA 223-2018 was implemented in January 1, 2019. However, due to the asynchronous nature of biennial renewal cycles for the various health professional boards, complete information on all included license types will not be available until a biennial cycle has been completed: Complete biennial reporting will be available in the 2021 Annual Report. This report has been structured for biennial reporting, and as such, includes shell tables where additional information will be incorporated once it is available for reporting. Additionally, each page contains references indicating where additional related resources may be found. All licensure survey instruments may be found at <https://bowenportal.org/index.php/resources/> and filtering by “Survey Tools.”

Medical Licensing Board

License Type: Physician/Osteopathic Physician

Table 2

Indiana Physicians	
Total Renewed Licenses	28,448
Actively Practicing in Indiana	17,384
Completed Medical Degree in Indiana	5,073 (33.2%)
Completed Residency in Indiana	5,541 (36.2%)
Specialty Breakdown of Total Physicians	
Primary Care Specialties	5,950 (34.2%)
Psychiatry	661 (3.8%)
Other Specialties	10,774 (62.0%)
Primary Settings of Total Physician Workforce	
Office/Clinic	8,589 (50.8%)
Hospital	6,217 (36.8%)
Federal Government Hospital	141 (0.8%)
Research Laboratory	17 (0.1%)
Medical School	297 (1.8%)
Nursing Home/Extended Care Facility	57 (0.3%)
Home Health Setting	22 (0.1%)
Hospice Care	26 (0.2%)
Federal/State/Community Health Center	348 (2.1%)
Local Health Department	18 (0.1%)
Telemedicine	671 (4.0%)
Volunteer in a Free Clinic	30 (0.2%)
Other	499 (2.9%)
Services Provided	
Addiction Services*	2,057
Obstetric Services†	1,888
Populations Served	
Pediatric Populations‡	10,874
Adults	15,211

Inmates	4,858
Geriatrics	12,643
Disabled Persons	9,903
Individuals in Recovery	5,331
Medicaid Providers §	
Accepting New Indiana Medicaid Patients	14,287 (82.2%)
Not Accepting New IN Medicaid Patients	3,097 (17.8%)
Telemedicine Providers †	2,767 (15.9%)

*Includes any services captured within Table 2.9 of the [Data Report](#), including: screening for addiction, addiction counseling, MAT – Methadone, MAT – Buprenorphine, MAT – Naltrexone. A full breakdown of unique addiction services by specialty is available within the [Data Report](#).

†Includes any services captured within Table 2.10 of the [Data Report](#), including: high-risk pregnancies screening, high-risk pregnancies treatment, pre-natal services, labor and delivery, post-natal services, and OUD-affected pregnancy services. A full breakdown of unique obstetric services by specialty is available within the [Data Report](#).

‡Includes newborns, children (ages 2-10), adolescents (ages 11-19). A full breakdown of unique age category by specialty is available within the [Data Report](#).

§See Table 2.5 in [Data Report](#) for additional information on physicians' reported patient panel characteristics.

† A full breakdown of telemedicine providers by specialty is available within Table 2.8 of the [Data Report](#).
