Annual Report of Indiana Ginseng Dealings:

2022-23 Harvest and Sale Season

There was a total of **2,700 lbs** and **6 oz.** of wild ginseng harvested and certified in Indiana this year. Of this, 8 lbs., 11 oz. was woods grown, counted as wild. Of the wild ginseng, 1383 lbs, 2 oz. was dry and 1317 lbs, 4 oz. was gross wet weight, converting at rate of .32/pound to the net dry weight of 421 lbs and 8oz. This season, Indiana had a total of 19 dealers. While the wild portion of Indiana's Ginseng is down, the woods grown category showed significant growth in weight from zero to 8 lbs., 11oz.

Based on comparison between years, 2022 was down in harvest trends as well as in harvest numbers, while roots per pound remained steady. We believe this is due primarily to weather conditions because it is appearing in nearly all counties, but we have not compared the weather officially over the two years. This year was typical in that sales at the beginning of the season were extremely lively and the prices per pound had the same result in that the later in the harvesting or selling season, the higher the price. The average price per pound was \$700.00 at mid-season point (October), which is quite high compared to other years.

FINDINGS:

Present abundance of wild ginseng rating was based on this scale:

0 = Absent	No Activity
1 = Rare	Under 1 lb.
3 = Frequent	Over 1 lb.

At the end of the 2022 harvest season, 21 Indiana counties reported no activity; of these, 6 reported a decrease from last year; 21 counties show an increase in harvest but not enough to move to the next category, 56 counties show a decrease but not enough to move to the next category. Again, most (83) counties reported a harvest which remained relatively steady.

Trend data requested in wild ginseng population considers the comparison of the 2021 harvest season and this current 2022 season:

-2 = extirpated	0 lbs. of wild ginseng harvested 2 years in a row
-1 = decreasing	decrease of more than 50 lbs. of wild ginseng since previous year
0 = stable	within 50 lbs. of previous harvest of wild ginseng
+1 = increasing	50 or more lbs. of wild ginseng harvested over last season

None of Indiana's 92 counties reported a positive trend in harvest while 5 showed a negative trend, the balance of the counties showed a stable harvest. This year, fifteen counties are showing extirpation. While this would seem concerning, at this time, again only three are showing extirpation for a longer period: Adams, Howard, and Lake. One, Randolph, is off extirpation list this year with 5 oz being found there.

This year's root count was steady with 2020 at 276. This was taken from 10 samples in all areas of Indiana. Although Indiana generally produces smaller high-quality root for apothecary use and not the larger boutique roots used for expensive gifting, the 2022 root count held steady.

Growing conditions continue to be the driving force behind the harvest figures, not the
Indiana's Ginseng Annual Report 2022

species abundance. We do recommend continuing the harvest under the current rules and regulations and in May 2022, the rules for Ginseng in Indiana were readopted with no changes. However, to help ensure those who violate Ginseng laws in other states are not able to do similar business with similar violations in Indiana, we strongly recommend the adoption of reciprocal suspension among the 19 Ginseng states, such as is already in place for hunting and fishing licenses.

License applications/payments/issuances were accomplished online again, opening August 1 and closing COB August 28, 2022. There were no problems this year and all licenses were issued electronically by August 31, 2022. Indiana's Ginseng Dealers continue to be required to accomplish 100% of their submittals online and into the Ginseng Portal. Dealers may do this work via various platform (mobile/smartphone, notebook, laptop or desktop computer) and the database behind it allows for single entry accomplished directly by dealers. Various reports, all certificates, annual reporting, etc. are pulled from the logged transactions, verified, electronically signed by dealers and certified by conservation officers online. The Access Indiana website, to establish an account and enter the ginseng portal, is <https://www.in.gov/access/available-services.html> Also, the Indiana Ginseng website continues to be maintained at www.in.gov/dnr/nature-preserves/ginseng/

Looking forward to the 2023 season, we will continue to refine the Ginseng Portal and make it easier to use. With the 2024 Indiana Legislative session, we plan to introduce changes to Ginseng Law (IC 14-31-1) and rules (312 IAC 19) to ensure conformity to other licensing practices in the state. Part of this will include the introduction of harvester, grower, and researcher licenses as is removal of the cost- assigned dealer license from the Indiana code. Several rules may be considered for modification to follow norms established by Indiana's Fish and Wildlife division for ease of enforcement. Collaborative work continues between Nature Preserves, Law Enforcement, Fish and Wildlife and others. I would be grateful if USFWS would look these over for any concerns they might have.

In conclusion, weather continues to be the greatest factor for fluctuations and change in the Indiana harvest of Ginseng.

Respectfully submitted,

Laura Minzes,
Indiana Ginseng Coordinator
May 9, 2023

AMERICAN GINSENG EXPORT PROGRAM (CITES)

Return this report form to: U.S. Fish and Wildlife Service
 Division of Management Authority (DMA)
 Branch of Permits, MS:IA
 5275 Leesburg Pike
 Falls Church, VA 22041-3803

STATE OR TRIBE: Indiana
HARVEST YEAR: 2022
PREPARED BY: Laura Minzes, Ginseng Coordinator

Below, please provide the amount of ginseng harvested:

Source of Ginseng	Harvested (dried lbs.)	Harvested (green lbs.)	Certified (dried lbs.)	Certified (green lbs.)	Estimated number of roots per pound (dried)
WILD	1,383 lbs. 2 oz.	1,317 lbs. 4 oz.	1,383 lbs. 2 oz.	1,317 lbs. 4 oz.	276 roots/lb.
WILD SIMULATED (not reported as wild)					
ARTIFICIALLY PROPAGATED (as defined under 50 CFR 23.64)	None	None	None	None	

If the information requested has not changed from last year, please indicate "No Change."

1. Program administered by (Department or Agency name): No Change
2. Ginseng certification by (Department or Agency name): No Change
3. Has the State/Tribe or its enabling legislation, ginseng regulations, or ginseng certification form been modified in the last year? If yes, please provide copies, as appropriate.

Ginseng Rule/Reg 312 IAC 19 was readopted with no changes.

4. Does the State or Tribal agency certify all wild ginseng harvested? If no, when would the agency not certify wild ginseng harvested in the State or on the Tribal lands, Can uncertified ginseng be sold or transported outside the State or Tribe?

No Change

5. Does the State or Tribal agency certify all artificially propagated ginseng harvested? If no, when would the agency not certify artificially propagated ginseng harvested in the State or on the Tribal lands? Can uncertified ginseng be sold or transported outside the State or Tribe?

No Change

6. When does State or Tribal agency certify wild/artificially propagated ginseng (e.g., at time of harvest, at time of sale)?

No Change

7. How does the State or Tribal agency handle wild/artificially propagated ginseng entering the State or Tribe from another State or Tribe? Is this procedure the same for both certified (by another State or Tribe) and uncertified ginseng?

No Change

8. Do all resident and non-resident individuals and companies dealing in (i.e., buying or selling) ginseng in the State or Tribe have to be registered or licensed? If no, please explain.

No Change

9. Can wild and/or artificially propagated ginseng be sold at any time during the year?

No Change

10. How often are dealers required to report the sale, purchase or export of ginseng (e.g., monthly, quarterly)?

No Change

11. Does the State or Tribe track unsold and/or un-exported ginseng from one season or one year to the next? Please explain process.

No Change

12. What is the wild ginseng harvest season in the State or Tribe?

No Change

13. Does the State or Tribe have a harvest season for artificially propagated ginseng? If so, what is it?

No Change

14. Within the wild and artificially propagated ginseng reported above, are there other sub-categories of ginseng production that are tracked in the State or Tribe? If so, please describe each sub-category (e.g., woods grown, wild simulated) and, if available, what quantities have been harvested and certified in the last year?

No Change

15. Is there a minimum allowable size/age for the harvest of wild and/or artificially propagated ginseng in the State or Tribe?

No Change

16. Is the harvest of wild ginseng allowed on State or Tribal lands? If yes, is a harvest permit required?

No Change

17. Does the State or Tribe require ginseng diggers to be licensed?

No Change

18. Does the State or Tribe require ginseng diggers to have written permission from private landowners to harvest ginseng? Do dealers need to supply copies of the written permissions when the ginseng is certified?

No Change

19. Please provide the average age of wild-harvested ginseng in the State or Tribal lands.

No Change

20. Please provide an estimate of the average number of roots per pound (dry weight) of wild ginseng harvested in the State or on the Tribal lands for the last harvest season, and describe the methodology used to calculate the estimate.

In 2023, the average number of roots per pound in Indiana was 276. Indiana Has 8 regional ecological districts. Five of those districts have ginseng dealers and those respective regional ecologists counts 2 different pounds of Ginseng, averaging the total. All totals are turned into the Ginseng Coordinator who then averages the amount.

21. Does the State or Tribe require or encourage diggers to plant seeds from harvested wild ginseng plants at the site of harvest? If so, please describe any guidelines. Does the State or Tribe allow diggers to plant ginseng seeds from other sources (e.g., commercial sources)? Based on the best available information, what is the effect of the current harvest level of American ginseng in the State or on Tribal lands on the wild population (e.g., positive, negative, no impact)?

No Change

22. Please provide an assessment of the status of ginseng in the State or on Tribal lands (i.e., stable, increasing, declining). If population levels are increasing or declining, please provide the State or Tribe's professional assessment of the reason for the change and any steps being taken to address these changes.

Ginseng in the State of Indiana seems to be holding steady since the volatility of COVID-19 and the introduction of the Ginseng Portal in 2020.

23. On a separate sheet of paper, please provide a brief description of any research, including ginseng population monitoring, being conducted in your State or Tribe on American ginseng.

No Change

24. Please provide details of any ginseng-related violations found and/or prosecuted in the State or on Tribal lands during the last year.

In 2022 Indiana Conservation Officer's received 29 ginseng related complaints from ICO Dispatch. Our officers documented 37 violations

10 for harvesting during closed season
1 for harvesting illegal ginseng
2 for dealing ginseng w/out a license
23 for taking ginseng w/out consent of a landowner
1 ginseng export violation

PRIVACY ACT STATEMENT

Authority: The information requested is authorized by the following: the Bald and Golden Eagle Protection Act (16 U.S.C. 668), 50 CFR 22; the Endangered Species Act (16 U.S.C. 1531-1544), 50 CFR 17; the Migratory Bird Treaty Act (16 U.S.C. 703-712), 50 CFR 21; the Marine Mammal Protection Act (16 U.S.C. 1361, et seq.), 50 CFR 18; the Wild Bird Conservation Act (16 U.S.C. 4901-4916), 50 CFR 15; the Lacey Act: Injurious Wildlife (18 U.S.C. 42), 50 CFR 16; Convention on International Trade in Endangered Species of Wild Fauna and Flora (TIAS 8249), 50 CFR 23; General Provisions, 50 CFR 10; General Permit Procedures, 50 CFR 13; and Wildlife Provisions (Import/export/transport), 50 CFR 14.

Purpose: The collection of contact information is to verify the individual has an eligible permit to conduct activities which affect protected species. This helps FWS monitor and report on protected species and assess the impact of permitted activities on the conservation and management of species and their habitats.

Routine Uses: The collected information may be used to verify an applicant's eligibility for a permit to conduct activities with protected wildlife; to provide the public and the permittees with permit related information; to monitor activities under a permit; to analyze data and produce reports to monitor the use of protected wildlife; to assess the impact of permitted activities on the conservation and management of protected species and their habitats; and to evaluate the effectiveness of the permit programs. More information about routine uses can be found in the System of Records Notice, Permits System, FWS-21.

Disclosure: The information requested in this form is voluntary. However, submission of requested information is required to process applications for permits authorized under the listed authorities. Failure to provide the requested information may be sufficient cause for the U.S. Fish & Wildlife Service to deny the request.

PAPERWORK REDUCTION ACT STATEMENT

We are collecting this information subject to the Paperwork Reduction Act (44 U.S.C. 3501) in order provide the U.S. Fish and Wildlife Service the information necessary, under the applicable laws governing the requested activity, for which a permit is requested. Information requested in this form is purely voluntary. However, submission of requested information is required in order to process applications for permits authorized under the applicable laws. Failure to provide all requested information may be sufficient cause for the U.S. Fish and Wildlife Service to deny the request. According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. OMB has approved this collection of information and assigned Control No. 1018-0093.

ESTIMATED BURDEN STATEMENT

We estimate public reporting for this collection of information to average 43 hours and 30 minutes, including time for reviewing instructions, gathering and maintaining data and completing and reviewing the form. Direct comments regarding the burden estimate or any other aspect of the form to the Service Information Clearance Officer, Fish and Wildlife Service, U.S. Department of the Interior, 5275 Leesburg Pike, MS: BPHC, Falls Church, VA 22041-3803, or via email at Info_Coll@fws.gov.
