

SURVEY AND FOCUS GROUP RESULTS

The survey was disseminated to 82 LCC coordinators, who oversee the 92 substance abuse reduction coalitions (one per county) in Indiana. There were 91 responses to the survey, and of those who started, 73 completed the survey. Forty LCCs were represented in the focus group project, or about 43% of the state's coalitions.

LCCs believe that these 6 attributes make them unique in addressing substance use and misuse

COLLABORATION

Ability to convene cross-discipline stakeholders

STRATEGIC PLANNING

Strategically plan substance use reduction strategies

FUNDING

Fund local entities in alignment with use reduction strategies

EDUCATION

Educate communities on substance use and misuse

AUTHORITY

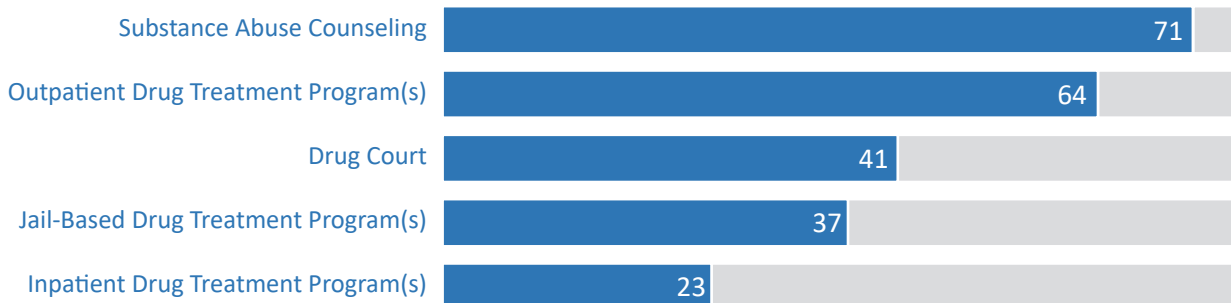

Serve as an authority for substance-related topics

PROBLEM SOLVING

Solve problems that impact the community

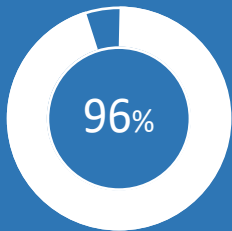

TOP 5 DRUG TREATMENT SERVICES AVAILABLE BY NUMBER OF COUNTIES

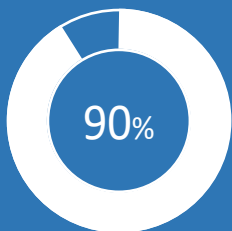

85%

Percent of LCC efforts that affect youth grade 7 through 34 years of age

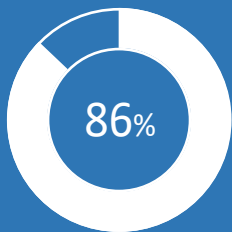

Top 5 substances being addressed by Local Coordinating Councils

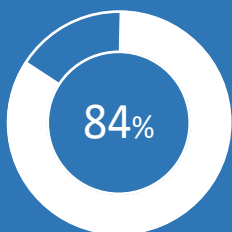

ALCOHOL

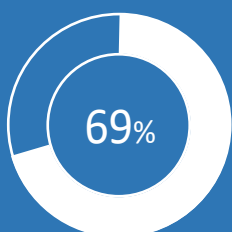

PRESCRIPTION DRUGS

METH

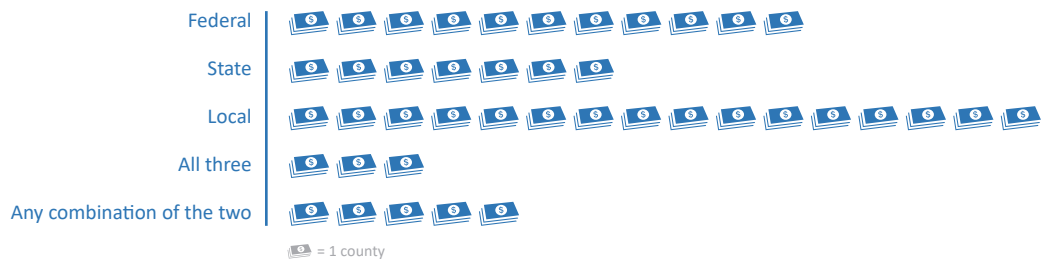

MARIJUANA (CANNABIS)

HEROIN

LCC FUNDING

For the most part, our LCCs are operating only on Drug Free Community funds. However, to supplement those funds, here's a breakdown of the counties that are taking advantage of federal, state and local support.

The main reason LCCs were unable to utilize their full allotment in any funding area was because there were not enough applicants.

RELEVANT

TOP 5 SYSTEM INTERACTIONS

LCCs report that they are interacting with systems such as law enforcement (91%), treatment (88%), K-12 Education (87%), the judicial system (70%), and local government (67%) to name a few.

- Law Enforcement
- Treatment
- Education (K-12)
- Judiciary
- Local Government

3 IDEAS TO EXPAND LCC EFFORTS

- Raise awareness about LCC efforts and substance abuse issues
- Expand funding opportunities
- Improve collaboration, communication and connection efforts

SUBSTANCE ABUSE CONCERNS AND EFFORTS

Respondents were asked to report the severity of their county's overall drug problem (scale: severe, moderate, mild, and normal), where 37 counties (50%) claimed that the problem is moderate and 34 counties (46%) claimed that it was severe.

MODERATE

SEVERE
