STATISTICAL AND ECONOMIC DATA

The Statistical Data are presented to give report users a better historical perspective and assist in assessing current financial status and trends of the governmental unit. Economic Data are presented to allow broader understanding of the economic and social environment in which State government operates.

State of Indiana

State Facts

AREA	36,185 square miles, including 253 square miles of water. Length, 275 miles breadth, 144 miles. Highest altitude, 1,257 feet in Wayne County; lowest altitude, 320 feet in Posey County.
CLIMATE	Four distinct seasons. Average temperatures in July range from 63 to 86 degrees Fahrenheit; January ranges from 17 to 35 degrees Fahrenheit. Record high: 116 degrees at Collegeville in 1936. Record low: 35 below zero at Greensburg in 1951. Average annual precipitation is 40 inches.
STATE CAPITAL	Indianapolis (combination of Indiana and Greek word "polis" meaning city -- thus, Indianapolis means "city of Indiana").
STATE MOTTO	The Crossroads of America. Adopted 1937.
STATE FLOWER	Peony. Adopted 1957.
STATE TREE	Tulip tree (yellow poplar). Adopted 1931
STATE BIRD	Cardinal. Adopted 1933.
STATE SONG	"On the Banks of the Wabash," by Paul Dresser. Adopted 1913
STATE POEM	"Indiana", by Arthur Franklin Mapes, Kendallville. Adopted 1963.
STATE STONE	Indiana limestone. Adopted 1971.
STATE SEAL	The seal depicts a pioneer scene--a woodsman felling a tree, a buffalo fleeing from the sound of the axe and the sun gleaming over a distant hill. In use since 1801, the seal was officially adopted in 1963.
STATE FLAG	The Indiana flag displays 19 gold stars surrounding a gold torch centered on a rectangular field of blue. The torch stands for liberty and enlightenment. Thirteen stars in the outer circle represent the 13 original states; the five in the inner circle represent the five states next admitted to the Union. The star above the torch stands for Indiana, the 19th state. Adopted 1917.
STATE NAME	The name Indiana means "land of the Indian". It was coined in 1800 when Congress carved the new state of Ohio from the Northwest Territory and designated the remaining vast area as the Indiana Territory. The territorial name was retained when Indiana became a state in 1816.
NICKNAME	The nickname for someone of Indiana birth or long residency is "Hoosier", a word whose origin has never been determined. Some have said it stemmed from the pioneer custom of greeting night callers with, "Who's yere?" Others claimed it came from "hoosier men", referring to laborers for an early- day Indiana contractor named Sam Hoosier. Still others traced the word to the term "husher", meaning a river boat worker strong enough to "hush" any challenger, or to "hoozer", a dialect word meaning hill-dweller.

* Indiana Code 6-8.1-7-1 prevents the disclosure of the top ten sales tax payers in Indiana as required by GASB Statement No. 44. This schedule is presented as a substitute for that requirement.

** Industry category is provided to the Department of Revenue on Sales Tax information submitted by retail merchants on their Business Tax Application. In the past, type of industry field was not required on the form. Thus, businesses started prior to the addition of the industry category field were classified as unknown. The industry category field was added in recent years.

* Indiana Code 6-8.1-7-1 prevents the disclosure of the top ten sales tax payers in Indiana as required by GASB Statement No. 44. This schedule is presented as a substitute for that requirement.

** Industry category is provided to the Department of Revenue on Sales Tax information submitted by retail merchants on their Business Tax Application. In the past, type of industry field was not required on the form. Thus, businesses started prior to the addition of the industry category field were classified as unknown. The industry category field was added in recent years.

Note: The data from 1996-2000 uses the Standard Industrial Classification (SIC) system and the data from 2001-2006 uses the North American Industry Classification System (NAICS). The basis for industry classification is different between the two systems. From 2001-2006, the Services industry includes only professional and technical services, administrative and waste services, education services, accommodation and food services, and other services.

¹ Average effective rate equals tax collections divided by income.

² This assumes (a) a family of four that consists of husband, wife, and two children and (b) state taxable income equals federal adjusted gross income minus renter's deduction minus exemptions. The State income tax rate for the entire 10 years was 3.4%.

Notes:

(a) In 2005, Business-type activities had no Revenue bonds/notes payable because of the reclassification of some funds from blended component units to discretely presented component units. Starting in 2005, governmental activities had no revenue bonds/notes payable because of the reclassification of some funds from internal service funds to discretely presented component units.

(b) The State did not begin reporting government-wide statements until it implemented GASB 34 in 2002.

¹ Due to unavailability of data for State Population and State Personal Income for 2008.

State of Indiana

Property Tax Schedules

For Year Ended December 31, 2006

Payable 2007

In the State of Indiana property taxes are levied by local units of government and overseen by the Indiana Department of Local Government Finance. The State of Indiana levies two rates of taxation against all taxable property in the state and Indiana Law fixes those rates. There is an eight ten thousandths per one hundred dollars assessed value rate for the Indiana State Fair Board and a sixteen ten-thousandths rate for the Indiana State Forestry Fund.

Property taxes are collected by county treasurers and distributed by county auditors. County auditors are required by Indiana Law to file, with the Auditor of State, reports of property taxes charged, collected and distributed. It is from those reports the property tax information is provided on the following pages.

Property taxes paid by each property taxpayer in Indiana are reduced by a credit referred to as a property tax replacement credit. The credit is paid by the state to county treasurers and is funded by a portion of state sales tax, individual income tax and riverboat wagering taxes. County auditors distribute the credit to taxing units. The property tax replacement credit percentage is determined by a formula established by Indiana Law and is computed by the Indiana Department of Local Government Finance. There are two separate property tax replacement credits. One credit applies to real estate and individual personal property. The other property tax replacement credit applies to business personal property. The two credit percentages are different within each taxing district and there are different credit percentages for each taxing district. Both of the credit percentages are based on the type of taxes levied within each taxing district. The average real estate and individual personal property credit is in the mid-twenty percent range and the business personal property credit is in the mid-teen percent range.

Residential property owners, who qualify, receive an additional credit on their property taxes. This credit is referred to as the homestead credit. There is a state homestead credit funded by a portion of the state sales tax, individual income tax and riverboat wagering taxes and in some counties there is a local (COIT) homestead credit funded by a portion of their county option income tax and a local (CEDIT) homestead credit funded by county economic development income tax. The state and local homestead credit is given on the residential taxes after the taxes have been reduced by the property tax replacement credit. The state homestead credit is paid by the state to county treasurers and, where applicable, the local homestead credit is paid by county auditors to county treasurers. County auditors distribute the homestead credit to taxing units. On the following schedules the state paid homestead credit and the locally funded homestead credit are shown in separate columns. The state and COIT homestead credit percentages are determined by a formula established by Indiana Law and are computed by the Indiana Department of Local Government Finance. The CEDIT homestead credit percentage is calculated by county auditors and is based on net residential assessed values and the amount of CEDIT revenue available to fund the homestead credit. There are different state and COIT homestead credit percentages for each taxing district in a county, because the state and COIT homestead credit percentages are based on the type of taxes levied within each taxing district. The state homestead credit percentage range is nine to fifteen percent, the COIT homestead credit percentage range is three to eight percent. The CEDIT homestead credit percentages vary by county, because of differences in net residential assessed values and the amount of CEDIT revenue available to fund the homestead credit. The CEDIT homestead credit percentage range is four to nineteen percent.

Beginning with taxes payable in 2007 an additional unfunded residential property tax credit was authorized by the state legislature. The credit is known as the excessive residential property tax credit. Lake County is the only county that adopted the credit for 2007 payable taxes. The credit is equal to the amount the net residential taxes on the residential property exceeds two percent of the gross residential assessed value. The credit is not presented in a separate column on the following schedules, because the credit is unfunded. The total excessive residential property tax credit for Lake County for 2007 is \$15,777,827.

State of Indiana

Property Tax Schedules

For Year Ended December 31, 2007

Payable 2008

In the State of Indiana property taxes are levied by local units of government and overseen by the Indiana Department of Local Government Finance. The State of Indiana levies two rates of taxation against all taxable property in the state and Indiana Law fixes those rates. There is an eight ten thousandths per one hundred dollars assessed value rate for the Indiana State Fair Board and a sixteen ten-thousandths rate for the Indiana State Forestry Fund.

Property taxes are collected by county treasurers and distributed by county auditors. County auditors are required by Indiana Law to file, with the Auditor of State, reports of property taxes charged, collected and distributed. It is from those reports the property tax information is provided on the following pages.

Not all counties completed 2008 property tax billings in 2008, because of a delay in indexing property values for market value changes. On the following schedules, where applicable, it has been noted that the data is not available. In the 2009 comprehensive annual report complete schedules for 2008 payable property taxes will be included.

Property taxes paid by each property taxpayer in Indiana are reduced by a credit referred to as a state property tax replacement credit. Property tax replacement credit dollars are paid by the state to county treasurers to replace the credit granted to property taxpayers. The state property tax replacement credit is funded by a portion of the state sales tax, individual income tax and riverboat wagering taxes. County auditors distribute the state property tax replacement credit dollars to taxing units as property taxes. The state property tax replacement credit percentage is determined by a formula established by Indiana Law and is computed by the Indiana Department of Local Government Finance. There are two separate state property tax replacement credits. One credit applies to real estate and individual personal property. The other state property tax replacement credit applies to business personal property. The two credit percentages are different within each taxing district and there are different credit percentages for each taxing district. Both of the credit percentages are based on the type of taxes levied within each taxing district.

Counties can adopt a local option income tax to fund a local option income tax property tax replacement credit applicable to all property types. Not all counties have adopted this property tax replacement credit. For the counties that have adopted this credit the dollar amount of the credit is presented in the following schedules in a separate column labeled local option income tax property tax replacement credit. The property tax credit percentage is a uniform credit percentage calculated by county auditors. The uniform credit percentage is based on the local option income tax available to fund the credit and total gross property tax liability. Local option income tax property tax replacement credit dollars are paid by county auditors to county treasurers to replace the credit granted to property taxpayers. The local option income tax replacement credit dollars are distributed to taxing units as property taxes.

Homestead property owners, who qualify, receive an additional credit on their property taxes. The credit is referred to as homestead credit. Homestead property is defined as owner occupied residential property. There is a state homestead credit funded by a portion of the state sales tax, individual income tax and riverboat wagering taxes, a state homestead credit referred to as house enrolled act (HEA) 1001-2008 state homestead credit funded by the general revenues of the state and in some counties there is a local (COIT) homestead credit funded by a portion of the county option income tax, and/or a local (CEDIT) homestead credit funded by county economic development income tax and/or a local option income tax (LOIT) homestead credit funded by county local option income taxes. The state and local homestead credit is given on the homestead taxes after the taxes have been reduced by the property tax replacement credit. The state homestead credit dollars are paid by the state to county treasurers to replace the state homestead credits granted to homestead property taxpayers and, where applicable, the local homestead credit dollars are paid by county auditors to county treasurers to replace the local homestead credit

granted to homestead property taxpayers. County auditors distribute the homestead credit dollars to taxing units as property taxes. On the following schedules the state paid homestead credits and the locally funded homestead credits are shown in separate columns.

The state homestead credit percentage is determined by a formula established by Indiana Law and is computed by the Indiana Department of Local Government Finance. State homestead credit percentages vary by county and by taxing districting within a county because the state homestead credit percentages are based on the type of taxes levied within each taxing district.

The HEA 1001-2008 state homestead credit percentage is a uniform percentage calculated by county auditors based on the amount of HEA 1001-2008 state homestead credit dollars distributed by the state to the county and the total homestead property tax liability after property tax replacement credit. For payable 2008 property taxes a total of \$620 million was distributed to counties for HEA 1001-2008 state homestead credit. The allocation basis of the \$620 million was payable 2007 state homestead credit dollars distributed to counties. The HEA 1001-2008 state homestead credit percentages vary by county because of differences in homestead property tax liability after property tax replacement credit and the amount of HEA 1001-2008 state homestead credit dollars each county receives.

The COIT homestead credit percentage is determined by a formula established by Indiana Law and is computed by the Indiana Department of Local Government Finance. COIT homestead credit percentages vary by taxing district in a county because the COIT homestead credit percentages are based on the type of taxes levied within each taxing district.

The CEDIT homestead credit percentage is calculated by county auditors and is based on net homestead assessed values and the amount of CEDIT revenue available to fund the homestead credit. The CEDIT homestead credit percentages vary by county, because of differences in net residential assessed values and the amount of CEDIT revenue available to fund the homestead credit.

The LOIT homestead credit percentage is a uniform percentage calculated by the Indiana Department of Local Government Finance based on the amount of local option income tax available to fund LOIT homestead credit and the total homestead property tax liability after property tax replacement credit.

There is an additional residential property tax credit available for counties to adopt known as the local option income tax (LOIT) residential property tax replacement credit. Homestead property owners and residential rental property owners qualify for the LOIT residential property tax replacement credit. The LOIT residential property tax replacement credit is given on the residential taxes after the taxes have been reduced by the property tax replacement credit. The LOIT residential property tax replacement credit percentage is a uniform percentage calculated by county auditors and is based on the amount local option income tax available to fund the credit and the total residential property tax liability after the property tax replacement credit.

There is also a county economic development income tax (CEDIT) residential property tax replacement credit available for counties to adopt, but no county has adopted this credit.

Beginning with taxes payable in 2008 an additional unfunded homestead tax credit was established by the state legislature. The credit is known by Indiana Law as the excessive residential property tax credit and is commonly known as the circuit breaker credit. The circuit breaker credit equals the amount the net homestead property tax liability exceeds two percent of the gross homestead assessed value. At the time of this publication there were no circuit breaker credits in any counties reporting to the auditor of state.
