Common reasons to edit placements:

- Incorrect resource ID originally selected** – there is no need to delete an incorrect resource, it can be modified/corrected by clicking on the resource name that appears in “blue”. The resource search screen is displayed; enter the type of resource and a portion of the name. “Select” the correct resource from the list and the user is returned to the “Manage Placements” screen where an hourglass is displayed until the selected resource auto populates on the page. Once the resource has been replaced, click “Save” and the change will be saved to the case. In this example, Lois and Jay Peterson have been replaced with Lutherwood Residential Treatment Center. (see below)

Each selection activates the appropriate pop up screen to enter the data needed – for example if a THV, the data fields will ask the “date returned home” and “with whom is the child during the THV”. Complete the data fields and click “Add” to save to the existing placements on the “Manage Placements” screen.

In this example, the detention center stay which immediately preceded the Damar placement was mistakenly omitted. From type, select “Action” the “Add Placement”. Click on the magnifying glass by the resource ID to search and select the appropriate detention center. Enter the begin date and time and click “Add”. SIRYV – Staff Secure is now appearing as the first placement for this youth’s case.
