Violation issued by:     Local Building Department             State Fire and Building Code Enforcement Section  
 Local Fire Department

**7. DESCRIPTION OF REQUESTED VARIANCE**

Name of code or standard and edition involved 2014 Indiana Fire Code	Specific code section Section 3103.5
---	---

Nature of non-compliance (include a description of spaces, equipment, etc. involved as necessary)  
 Having a tent up for more than 30 days in the same location.  
 The variance is needed so that Johnny's Market has shelter to conduct business.  
 His seasonal business runs from mid April to just before Christmas every year.

**8. DEMONSTRATION THAT PUBLIC HEALTH, SAFETY, AND WELFARE WILL BE PROTECTED**

Select one of the following statements:

- Non-compliance with the rule will not be adverse to the public health, safety or welfare; or  
 Applicant will undertake alternative actions in lieu of compliance with the rule to ensure that granting of the variance will not be adverse to public health, safety, or welfare. Explain why alternative actions would be adequate (be specific).

Facts demonstrating that the above selected statement is true:  
 Johnny's Market has been operating on the premises for over 25 years. He provides farm-fresh products which, if anything, is good for the public health and welfare.  
 We've had the very same setup for the last three years with no problems.  
 The tent occupies the same footprint as the permanent structure he used to have.  
 The tent itself was manufactured by Anchor Industries, Evansville IN., a leading manufacturer for over 150 years. Originally supplied with 1" dia. 30" long stakes we will be using 42" long stakes. Additionally, the stakes are doubled up on the high stress corner areas. The tent has been certified to be flame retardant (copy attached) by Anchor Industries. The tent will be maintained regularly by American Tent & Awning Co. Inc

**9. DEMONSTRATION OF UNDUE HARDSHIP OR HISTORICALLY SIGNIFICANT STRUCTURE**

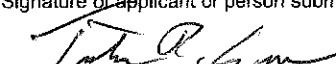

Select at least one of the following statements:

- Imposition of the rule would result in an undue hardship (unusual difficulty) because of physical limitations of the construction site or its utility services.  
 Imposition of the rule would result in an undue hardship (unusual difficulty) because of major operational problems in the use of the building or structure.  
 Imposition of the rule would result in an undue hardship (unusual difficulty) because of excessive costs of additional or altered construction elements.  
 Imposition of the rule would prevent the preservation of an architecturally or a historically significant part of the building or structure.

Facts demonstrating that the above selected statement is true:  
 Johnny had a permanent pole barn type structure on the site that was destroyed by a runaway IPL bucket truck and had to be torn down the rest of the way. He had plans to build a similar structure but found out that the area was in a flood plane. No available pole barn plans would meet the code requirements for that situation, ultimately driving costs way up.  
 In light of the current changes going on in the area, a permanent structure doesn't make sense anyway. Johnny is not sure how long he'll be able to continue doing business at this location. He would like to continue to offer the area's only truly farm fresh products for as long as possible. Therefore, we ask that this variance be for all future years
