To Fire Prevention and Building Safety Commission

This letter is to address variance number 17-09-27, submitted by David Stark on behalf of Seymour Community Schools in regards to Margaret R. Brown Elementary School.

I have consulted with City of Seymour Building Commissioner Jeremy Gray on this issue. The doors that are affected by this variance are not egress doors, and will not affect the evacuation of students or staff from the rooms in any way.

We agree that this variance should be granted and recommended that the Commission approve this request.

Thank you for your consideration.
