

Indiana Department of Natural Resources  
Division of Forestry

**RESOURCE MANAGEMENT GUIDE**  
**Addendum**

**State Forest:** Morgan-Monroe  
**Forester:** Amy Spalding

**Compartment:** 17 **Tract:** 02  
**Date:** August 4, 2011

A management guide was prepared for this tract on November 14, 2008 recommending a timber harvest. This tract was marked for harvest and was put up for bid in the fall of 2009. The harvest occurred in the summer of 2010 with follow up Timber Stand Improvement in the spring of 2011. On May 25, 2011 a strong storm came through the Bloomington Area. This storm moved over this tract and possibly tornado or straight-line winds caused significant tree damage (i.e. windthrow and crown damage). Damage is concentrated on west to southwest aspects. At least one area approximately 3-5 acres was leveled of dominant sawtimber trees. A salvage operation to utilize these damaged areas is recommended with follow-up TSI.
