

Disclaimer: Below is a list of companies that have shown an interest in providing dust control products or services in Indiana. Inclusion on this list does not constitute an endorsement of the firms or their products by IDEM or the State of Indiana. Effective July 1, 1989, Indiana Code (IC) 13-30-2-1 (formerly IC 13-7-4-1) prohibits the application of used oil to any ground surface based upon environmental concerns (view the Indiana Code on the Indiana General Assembly's website at [iga.in.gov/legislative/laws/2017/ic/titles/013#13-30](http://iga.in.gov/legislative/laws/2017/ic/titles/013#13-30)). The materials listed here have not been evaluated by IDEM with respect to environmental/hazards or other objectionable characteristics, but based on current knowledge do not contain used oils.

For technical and compliance assistance concerning best practices for fugitive dust control and the use of dust suppressants, please contact the Compliance and Enforcement Branch within IDEM's Office of Air Quality at (317) 233-0178. If you prefer to speak with someone confidentially, you may contact IDEM's Compliance and Technical Assistance Program (CTAP) at (800) 988-7901 (in-state) or (317) 232-8172.

Indiana has experienced situations where pollution problems have occurred because of the use of dust suppressants. As with any product applied to the land, the product should be carefully evaluated as to its formulation, place and manner of application to prevent problems from being created. Spills that have the potential to threaten ground water or surface water should be immediately reported to IDEM's Office of Emergency Response at 1-888-233-7745 (toll free).
