**Eric J. Holcomb**  
*Governor*

**Bruno L. Pigott**  
*Commissioner*

March 4<sup>th</sup>, 2019

A link to IDEM's 2019 screening level tables (Tables A-6 and A-7) is, or soon will be, available on the IDEM Screening and Closure Level Tables webpage at <http://www.in.gov/ide/landquality/2395.htm>. IDEM's 2019 Screening Level Table is effective beginning March 4, 2019. The six-month transition period ends September 4, 2019. The explanatory text is unchanged from 2018.

The 2019 version of Table A-6 includes all of the chemicals found in the 2018 table with the exception of cypermethrin. Table A-6 contains new entries for the following chemicals: lanthanum, anhydrous lanthanum chloride, lanthanum chloride heptahydrate, lanthanum nitrate hexahydrate, lanthanum acetate hydrate, tert-butyl acetate, and weathered toxaphene. The name for propyzamide was changed to pronamide.

The 2019 version of Table A-6 also incorporates updates by the U.S. EPA for fifteen chemicals, based upon new source data for chemical parameters and toxicity values. However, these changes pertain to chemicals that do not commonly drive risk.
