1	BEFORE THE INDIANA
2	RECYCLING MARKET DEVELOPMENT BOARD
3	
4	
5	PUBLIC MEETING
6	JANUARY 25, 2024
7	
8	
9	PROCEEDINGS
10	in the above-captioned matter, before the
11	Recycling Market Development Board, Bruce Burrow,
12	Chairman, taken before me, Lindy L. Meyer, Jr., a
13	Notary Public in and for the State of Indiana,
14	County of Shelby, at the Indiana Department of
15	Environmental Management, 2525 North Shadeland
16	Avenue, Conference Room C, Indianapolis, Indiana,
17	on Thursday, January 25, 2024 at 9:02 o'clock
18	a.m.
19	
20	
21	ACCURATE REPORTING OF INDIANA, LLC
22	543 Ponds Pointe Drive Carmel, Indiana 46032
23	TELEPHONE: (317)848-0088 EMAIL: accuratereportingofindiana@gmail.com

APPEARANCES: 1 2 BOARD MEMBERS: Bruce Burrow, Chairman 3 Kelly Weger Terry Guerin 4 Debbie Hackman Sandy Whitehead 5 Matt Gratz Craig Lutz 6 Tara Wesseler-Henry (via Zoom) Andrew Nunan (via Zoom) 7 8 ON BEHALF OF IDEM: Carl Wodrich 9 Deanna Garner Tom Leas 10 Pat Daniel Michael French 11 Aidan Whitney 12 ALSO PRESENT: 13 Jason Donati Jeremy Troutwine 14 15 16 17 18 19 20 21 22 23

1 9:02 o'clock a.m. January 25, 2024 2 3 CHAIRMAN BURROW: All right. Well, I 4 guess it's my job to --5 MS. GARNER: Oh, hold on. 6 CHAIRMAN BURROW: Oh, you need to get 7 your words in first? (Discussion off the record.) 8 9 CHAIRMAN BURROW: All right. Well, 10 first and foremost, thanks, everybody. It's great to see everyone. Happy 2024. It's going 11 12 to be a wonderful year once we get through the 13 fog, so everyone be cautious driving. And I 14 would like to call the meeting of the Indiana 15 Market -- Recycling Market Development Board to 16 order, January 25th, 2024. Welcome, everyone. 17 Do we want to do your housekeeping, 18 Deanna? MS. GARNER: Yes, let's go ahead, and 19 20 for those on Zoom, let's do our welcomes. Thank 21 you for joining us today. I am Deanna Garner, 22 Recycling Market Development Program Manager for 23 IDEM's Office of Program Support.

1	All microphones are currently muted. For
2	attendance tracking, please take a moment to
3	write your name and affiliation in the chat box.
4	We will be taking questions and comments from
5	participants at today's meeting. All
6	participants will be able to unmute themselves
7	and ask questions or make comments at the
8	appropriate times.
9	If you have a question or technical issue
10	during the presentation, please use the raised
11	hand or chat feature. To access these features,
12	at the bottom of top of your screen depending on
13	your device, you'll see a menu bar. In the
14	middle of that menu there is a chat icon which
15	you can click on to show the chat dialogue. You
16	should also see the raised hand option. Please
17	utilize the raised hand or chat features if you
18	have any questions or comments, and you'll be
19	called upon at the appropriate time.
20	For those on the phone, if you have a
21	question or comment you can raise your hand by
22	pressing star nine and you will call and we
23	will call on you at the appropriate time. When
I.	

1 called upon, you'll need to unmute your phone by 2 pressing star six. 3 If any members of the media have joined 4 us, please use the -- utilize the chat feature or 5 e-mail media@idem.in.gov if you have any 6 questions or would like to schedule an interview. 7 This meeting is being recorded and will be posted on IDEM's Web site, recycle.in.gov. 8 9 With that, I'll turn the meeting back over 10 to Bruce Burrow, our Chairperson. 11 CHAIRMAN BURROW: Thank you, Deanna. 12 The next order of business, obviously, is 13 consideration and approval of the October 26, 14 2023 RMDB meeting summary and transcript. Has 15 everyone had the opportunity to review the 16 document that was available for us when we came 17 in or those that were sent to us earlier? 18 MS. WEGER: Yep. 19 MR. GRATZ: Yes. 20 CHAIRMAN BURROW: Any comments or 21 concerns with regard to the summary? 22 (No response.) 23 CHAIRMAN BURROW: Hearing none, do I

1 have a motion to approve? 2 MR. GUERIN: So moved. 3 MS. HACKMAN: Second. 4 CHAIRMAN BURROW: I have a motion by 5 Mr. Guerin and a second by Kelly Weger, Ms. Weger 6 [sic]. And do I have any other discussion? 7 (No response.) 8 CHAIRMAN BURROW: Hearing none, we'll 9 do a roll-call vote. 10 Kelly? 11 MS. WEGER: Yes. 12 CHAIRMAN BURROW: Debbie? 13 MS. HACKMAN: Yes. 14 CHAIRMAN BURROW: Terry? 15 MR. GUERIN: Yes. 16 CHAIRMAN BURROW: Craig? 17 MR. LUTZ: Yes, sir. 18 CHAIRMAN BURROW: Sandy? 19 MS. WHITEHEAD: Yes. CHAIRMAN BURROW: 20 Matt? 21 MR. GRATZ: Yes. 22 CHAIRMAN BURROW: Is Tara on? 23 MS. GARNER: Yes.

1 CHAIRMAN BURROW: Tara? 2 MS. WESSELER-HENRY: Yes. 3 CHAIRMAN BURROW: Thank you. 4 I vote yes. The motion carries 5 unanimously. 6 MS. GARNER: There's -- you missed 7 Matt Gratz. Oh, I'm sorry; you got Matt --8 MR. LUTZ: Andrew. 9 MS. GARNER: -- but you -- Andrew. 10 CHAIRMAN BURROW: Andrew? 11 MR. NUNAN: Yes. 12 CHAIRMAN BURROW: Thank you. 13 MR. NUNAN: Thanks, guys. 14 CHAIRMAN BURROW: With that, everyone 15 voted affirmative, and the motion carries 16 unanimously. Thank you very much. 17 The next item on our agenda this morning 18 is an IDEM Update from IDEM Chief of Staff --19 please help me. 20 MS. STOVER: Parvonay. 21 CHAIRMAN BURROW: Parvonay Stover? 22 MS. STOVER: Yes. 23 CHAIRMAN BURROW: Thank you.

1 Welcome.

2	MS. STOVER: Good morning, everybody.
3	Thank you for having me here today. Thank you
4	all for being here today and braving the fog. It
5	was kind of an eerie drive in for me, but at
6	least it's not freezing anymore.
7	While I'm up here, I want to thank the
8	Board for all of your hard work every year
9	reading, evaluating, and awarding the Recycling
10	Market Development grants. The grants are a
11	really important part of Indiana's economy and
12	strong manufacturing base, and I know that a lot
13	of effort goes into that on your part, and that
14	work doesn't go unnoticed.
15	Since 2008, this work resulted in funding
16	for 135 projects, totaling almost 17 million
17	dollars, creating over 1,000 jobs, and diverting
18	over an additional 1.5 million tons of recyclable
19	materials annually, so that's really, really
20	fabulous and I thank you for your hard work on
21	that.
22	I also, while I'm up here, want to
23	acknowledge your work last year to kick off the

-	
1	Central Indiana Waste Diversion Projects. These
2	projects were an amazing opportunity to further
3	our efforts to excuse me further our
4	efforts for waste diversion activities, and I
5	know you guys are going to be funding a second
6	round next year to build upon the success of the
7	first round.
8	And Deanna tells me that applications will
9	be submitted and reviewed from December to June
10	of this year. So, more coming on that soon, and
11	again, I know this adds more work to your plate,
12	but it's so important to make sure that we have
13	another successful example of funding waste
14	division projects.
15	Shifting gears just a little bit, we have
16	a lot going on at IDEM these days. Staffing is
17	going really well. We have about 810, 812 staff
18	right now. We got additional funding in last
19	year's budget to hire 15 new Drinking Water staff
20	and two or three new positions for our Tanks
21	program, so we are in the process of hiring those
22	as we speak.
23	You may have heard that Peggy Dorsey, the
I.	<u> </u>

-	
1	head of our Office of Land Quality, is retiring
2	in April after 25 years of service with IDEM, so
3	she deserves that retirement, and we're going to
4	miss her. We have selected a candidate, and we
5	are just wading through the HR process. It
6	always takes longer than I would like, so as soon
7	as we get the go-ahead from across the street, we
8	are going to make an announcement, so, you guys
9	will hear something soon.
10	And we also have another vacancy in OLQ.
11	Corey Webb, the Deputy Assistant Commissioner who
12	reported to Peggy, also took a role at another
13	agency. So, we have that position posted as well
14	and we are accepting applications for the next
15	couple of weeks for that, so if you know anybody
16	who might be a good fit for that role, send them
17	our way.
18	So, like I said, we've been doing really
19	well with staffing. The Governor's Compensation
20	Study that was implemented last year has been a
21	huge help in getting higher quality and more
22	candidates for all of our open positions.
23	Prior to the Comp Study rolling out, we

-	-
1	would have positions open for months and months
2	at a time and get no qualified applicants, like
3	nobody at all. So, as soon as those salary
4	changes went in place, we started getting not
5	only candidates in general, but really good
6	candidates, so it put us in a position where we
7	could start to be picky about who we hired, which
8	is really, really exciting.
9	So, instead of getting no candidates for a
10	position, we might get 20, and a lot of them have
11	environmental experience and a lot of them are
12	really bright young people, just graduating with
13	backgrounds in science and, you know,
14	environmental policy and things like that. So,
15	that's that's really exciting, and it puts us
16	in a great position to be able to bring in a lot
17	of new young folks to help eventually run our
18	agency someday.
19	And speaking of that, we also hired a new
20	Staff Development and Training Director, Amanda
21	Hall. We have been getting a lot of feedback
22	from staff in my two years in this role that
23	folks want more training opportunities. We have
L	•

1 about a third of our staff that's eligible for 2 retirement right now, and those folks are leaving their positions, like Peq. 3 4 So, we are lucky to be bringing in a lot 5 of new young people, new fresh graduates, and 6 they are desperate for professional development 7 opportunities. They want to learn, they want to grow in their roles, and they want training, and 8 9 the agency never had a formal training policy in 10 place. 11 You know, each section or each branch, 12 each corner of the office would do their own 13 thing in terms of training, but we didn't have a 14 cohesive, agency-wide plan. So, Amanda came to 15 us from the correctional world, where she has 16 been doing this for decades, developing training 17 programs for agencies just like ours. 18 So, she came in and did a thorough 19 analysis of what training we have in all of those 20 little corners of the office: Where are our 21 What do we need? What kind of training do qaps? 22 people want? How are we training our supervisors 23 to thrive in their roles and eventually move up

1	into positions throughout the agency?
2	You know, the Commissioner and I are not
3	going to be in these roles forever. Our AC's are
4	not going to be in those roles forever. How are
5	we training people to eventually step up and take
6	those roles and run the agency in a meaningful
7	way once we're gone? So, Amanda's also
8	developing a leadership program, where I think
9	it's four different levels, like a 101, 201, 301
10	kind of level, where you can get as involved as
11	you want to and you can take a leadership
12	training program that's progressive and gets you
13	more and more and more experience that will be
14	meaningful towards eventually taking higher roles
15	in the agency.
16	So, we are really, really excited about
17	that. She has only been on board for about six
18	months and she has accomplished already what I
19	thought was going to take years to accomplish.
20	So, we're in a really, really good place. It's
21	really exciting right now.
22	One of our more daunting tasks, a little
23	less fun than training and staff development, is
L	

П

ſ	
1	working to streamline our IT processes. We have
2	figured out that we are a little bit siloed
3	sometimes as an agency, and again, every section,
4	every corner of the office often has their own
5	data management tool or their own system, their
6	own case management software, their own whatever,
7	and a lot of times data and information is housed
8	in Excel spreadsheets on somebody's desktop or an
9	access database that is not supported anymore.
10	So, we are looking into ways to get
11	everybody on one system or as few systems as
12	possible, which, again, for 810 staff in 65
13	different program areas, it's not an easy task.
14	So, we got a little bit of new money in the last
15	budget to dedicate to this IT project, so we're
16	trying to streamline all of the different systems
17	and programs that we have, reduce our dependency
18	on those old, unsupported softwares like
19	Microsoft Access, and figure out a better path
20	forward, a more cohesive path forward. So, more
21	to come on that.
22	Another fun one actually, this is a
23	really interesting thing that I'm lucky to be
l	ļ

ſ	
1	involved with EPA's Climate Pollution
2	Reduction Grant. If you haven't heard of this,
3	it's a two-phased grant, and we're in Phase 1
4	right now, and any state that wanted to take
5	advantage got up to three million dollars to do
6	planning to develop a greenhouse gas inventory,
7	identify potential reduction measures, and
8	eventually put a plan in place for their state to
9	reduce those greenhouse gas emissions.
10	So, we applied for that. We got the three
11	million dollars back in July, I think. We our
12	Office of Air Quality staff have been working
13	really hard ever since to put together that GHG
14	inventory, figure out where in the state
15	emissions are coming from, both what industries
16	and what geographic parts of the state, and
17	they're currently working on that plan to put
18	together to submit to EPA.
19	And then eventually that plan is going to
20	be part of the application for Phase 2, which is
21	an almost five-billion-dollar pot billion,
22	with a "b" of implementation money for states
23	to actually implement the plans that we put in
l	<u>!</u>

-	
1	place in Phase 1. So, we have to submit our
2	application for Phase 2, I believe, April 1st.
3	So, EPA has really, really aggressive deadlines
4	on this, which doesn't give us a ton of time, but
5	our Air Quality staff are really hard at work.
6	We did a series of public meetings in
7	Indianapolis, Fort Wayne, Portage, and then
8	Ferdinand in Southern Indiana, so we're trying to
9	get input from as many people as possible from as
10	wide a scope as possible. Another big portion of
11	the grant is making sure that the greenhouse gas
12	emissions have an impact on disadvantaged and
13	low-income communities, so we're also doing an
14	analysis of that to make sure that the ideas that
15	we're putting in place will actually have a big
16	impact on the communities that need it most.
17	So, we have two more public meetings
18	coming up in February. One is in Gary and one is
19	in Evansville, so we have information about those
20	on-line if you're interested in driving down or
21	tuning in, and again, more information to come.
22	It's a really exciting opportunity. We're
23	focused on voluntary measures, nonregulatory
L	<u> </u>

_	
1	measures, to help bring federal dollars to the
2	state so companies can implement the
3	sustainability measures they are already doing.
4	So, we've gotten a lot of great project
5	ideas from colleges and universities, cities and
6	towns, private companies. We're even considering
7	some ideas that could benefit the state, like
8	electrifying the State Police, putting solar
9	panels on state buildings, things like that. So,
10	again, really exciting. I'm lucky to be involved
11	with that.
12	It's a really aggressive timeline for all
13	of this, so our staff are having to work really
14	fast, but hopefully something good will come from
15	it and we'll be able to bring a big amount of
16	federal money to the state to implement some of
17	these ideas.
18	So, let's see what else. I don't want to
19	take up too much of your time. Obviously we're
20	staying really busy at IDEM. That was all I had
21	planned to cover today, but I'm happy to address
22	any other questions if there's anything that you
23	think I missed, and if not, I will turn it over
l	I

1 to the next speaker. 2 CHAIRMAN BURROW: Does anyone have 3 any questions? 4 (No response.) 5 MS. STOVER: Well, thank you so much 6 for your time, thank you for the invitation, and 7 I will see you guys soon, I'm sure. CHAIRMAN BURROW: Thank you very 8 9 Sounds like a lot of exciting things going much. 10 on. 11 MS. STOVER: Yeah, I think so, too. 12 CHAIRMAN BURROW: All right. Next on 13 the agenda, we have the Finance Update, Hilary 14 Alderete? 15 MS. ALDERETE: Yes. CHAIRMAN BURROW: Chief Financial 16 17 Officer. 18 MS. ALDERETE: Hi. I'm Hilary 19 Alderete. I'm the CFO for IDEM. It's a pleasure 20 to be here today and talk about exciting finance 21 updates, as everyone looks so riveting all of the 22 time. 23 Just as a quick overview -- I'm sorry;

1 I'll use my checker, if it works. 2 MS. GARNER: I'm not over here very 3 often, and I may have to click for you. 4 MS. ALDERETE: Thank you. 5 MS. GARNER: Okay. 6 MS. ALDERETE: So, just a quick 7 overview of what funds -- both of the state --8 the solid waste management fee, it goes into the 9 Recycling Promotion and Assistance Fund. It's 10 fifty cents per ton, and it's divided between the 11 RPAF Fund and then the Solid Waste Management 12 Fund. 13 This is kind of a nice graphic to show you 14 what the collection is and then how it's 15 distributed statewide to the Solid Waste 16 Management Fund, funds for the community and 17 recycling, and then the RPAF Funds, the projects 18 that we talk about today that you approve. 19 And historically for Fiscal Year '23, we 20 are about 2.2 million, and then we have the 21 additional four million from last year as a 22 result of the House bill, and that was able to be 23 supported. That was not technically the

1 appropriation, but the bill allowed it to do an 2 augmentation for that. 3 The fund part, this just shows you the 4 history of what has been spent in terms of the 5 RPAF and the legislative appropriation, and then 6 the amounts for disbursement, and you can see 7 consistently we were around one to two million until Fiscal '23, where we spent -- we were 8 9 approved to spend up to six million. And then 10 this year we are down to two million, depending 11 on what the cap is for Fiscal '24. 12 '25 will look a little bit closer to what 13 we're doing for -- what we did for '23. For 14 Fiscal '23 we did allow, again, the six million, 15 two million for the RMPD grants, and then four 16 million for Central Indiana Waste Diversion 17 Projects, and then we actually spent 4.2 million 18 out of that six. 19 This shows you the revenues for each fund, 20 so last year, Fiscal '23, we received 2.5 million 21 for the State Solid Waste Management Fund, and 22 2.6 million in the Recycling Promotion --23 Recycling and -- Recycling Promotion and

1 Assistance Fund; sorry. 2 And cash balances, we have 5.5 -- had 5.53 at the end of Fiscal '23 for the State Solid 4 Waste Management Fund, and we ended the RPAF Fund 5 at 18.1. 6 I'm happy to answer any questions. 7 MR. GUERIN: Deanna, could we get a 8 copy of her presentation --9 MS. GARNER: Oh, yeah. 10 MR. GUERIN: -- sent out to us, 11 please? 12 MS. GARNER: Yeah. 13 CHAIRMAN BURROW: Any questions from 14 Board members? 15 (No response.) 16 CHAIRMAN BURROW: No. Thank you so 17 much. 18 MS. ALDERETE: You're welcome. 19 CHAIRMAN BURROW: It's nice to see 20 the funds growing and we have moneys available. 21 MS. ALDERETE: Yeah. I look forward 22 to talking later this year. 23 CHAIRMAN BURROW: All right. The

1 next item on the agenda will be IDEM Office of 2 Program Support Update, Carl Wodrich, Deputy Assistant Commissioner, Office of Program 3 4 Support. 5 Good morning, Carl. 6 MR. WODRICH: Good morning. I just 7 will add on to what Parvonay was saying about our Training Director, Amanda Hall, like she is 8 9 really phenomenal. I don't know how we lucked 10 out -- I don't even know how we lucked out 11 getting her. She's --12 MR. LUTZ: Carl, your voice, come on. 13 MR. WODRICH: She's really fantastic. 14 You know, she's been working with one of the 15 sections in OPS, and Julie Rhodes, the Pollution 16 Prevention and Compliance Assistance Team, 17 because Julie is a new manager, so we thought it 18 would be good -- Julie and Amanda have worked 19 together and they've been doing some 20 team-building stuff in that section with new 21 leadership and she's been doing a really great 22 job, and we look forward to doing a whole lot 23 more with her and the agency.

_	
1	A couple of our staff are going to be in
2	the pilot of the Leadership 101 training as well,
3	so I think there's a couple of folks from each of
4	the different parts of IDEM that are going to be
5	a part of that, so really excited to have her on
6	board, and it's really going to benefit, you
7	know, our Office of Program Support
8	significantly, especially our C-TAP program.
9	You know, the now that I've been here a
10	little while, I mean our Compliance and Technical
11	Assistance Program staff, I mean at the end of
12	the day they got bombarded with questions from,
13	you know, all of the different things that IDEM
14	does, more so from Office of Air Quality,
15	Permitting, and Compliance questions. I think
16	more than half of the questions and assistance
17	requests that we receive are for air quality and
18	related items, but we get hazardous waste, solid
19	waste, we get storm water questions, we get
20	drink we don't really get a lot of drinking
21	water questions, but we probably will start to if
22	there's some new regulations around PFAS and
23	things like that. There might be some things
L	

1 that we start getting more questions about 2 potentially. 3 But one of the things that I have 4 struggled with, and Julie has since she's been 5 brought on board, is training. We're bringing in 6 some new people into those positions, because --7 and even the existing staff, who have, you know, 8 decades with the agency, they just can't know 9 everything because regulations change. 10 So, I think it'll really benefit us in 11 that regard to having centralized training, access to those trainings from the other parts of 12 13 the agency that we may not even realize is coming 14 on, because we're 810 people, four floors in the 15 Government Center, and four regional offices. So, we're really excited about her. 16 17 We do have a couple of -- a few vacancies 18 in our office. I think I mentioned last time 19 that we were creating a new position in our 20 office, a Technology Solutions Manager, because 21 we have a lot of IT stuff and our IOS group, as 22 Par mentioned, they've got a lot on their plates, 23 they're trying to do some streamlining, so we

1 really needed somebody in the Office of Program 2 Support. 3 We are the only office of the four main 4 program areas that did not have a data technology 5 person in our office to help us with some of 6 these things like GIS mapping and our SharePoint 7 site and issues we have that come up with that, and it's data that needs to be modernized and all 8 9 of those things. 10 So, we did fill that position. 11 Unfortunately, it was an internal move, so we 12 filled the position and created a vacancy in our 13 C-TAP team, so now we have two vacancies to fill 14 on that team: Our Small Business Regulatory 15 Coordinator position, and then a more Central 16 Indiana C-TAP position. 17 Also, recently our Health and Safety 18 Director gave notice that she's going to IOSHA, 19 so we're going to be look -- we have a -- it 20 should be posted if not today, tomorrow. We're 21 looking for a new Health and Safety Director for 22 all of IDEM, and that position is within our 23 office as well.

1 So -- and then we are looking for a new 2 director of our Northwest Regional Office in 3 That position is vacant and posted Valparaiso. 4 right now as well. 5 And then at the October meeting I 6 mentioned our Clean Community Program was being 7 relaunched, and we had an annual meeting kickoff at the end of November, after the Thanksgiving 8 9 holiday, so that program is now open for 10 applications from communities who were not part 11 of our pilot. I think we had six pilot 12 communities that were in that program sort of 13 helping us retool it, figure out kind of what 14 they were looking for from a program from IDEM 15 that provides some environmental benefits to them 16 from the regulatory creating benefits to them. 17 So, that program is open. Missy Shaber, 18 who is in our Southeast Regional Office in 19 Brownstown, is manager of that program, so if you 20 guys -- if the communities that you interact with 21 might be interested in knowing more about that, 22 they can reach out to Missy Shaber. If you need 23 her contact information, it's -- we do have her

1 information on our Web page for that program, but 2 you can reach out to Pat or Deanna or I to get 3 that information. We'd be happy to share that 4 with you. MS. HACKMAN: The communities that 5 6 were part of the Clean Community Challenge, is 7 that just like wiped clean and nothing they've done has carried over to this, or --8 9 MR. WODRICH: Yes. So, I don't know 10 how many communities were in that before we 11 retooled it. Do you know, Pat? 12 13 Because that was all happening when I came 14 on board, so --15 MS. DANIEL: I think at the -- I 16 think at the highest level, I think there was 17 about 14 or 15. 18 MR. WODRICH: Yeah. So, I --19 MS. GARNER: So, for the projects 20 that are qualifying for this round, I think that 21 they have to be current, like projects -- I think that she said within the last two or three years. 22 23 MR. WODRICH: Yeah, we can give

1 credit for stuff that was started before this 2 program has been relaunched. 3 MS. GARNER: But obviously not like 4 ten years ago --5 MR. WODRICH: Ten years ago. 6 MS. GARNER: -- when the program kind 7 of fizzled. MR. WODRICH: It's more project 8 9 focused, and we've alleviated a lot of the 10 reporting requirements. There was an annual 11 report, and that was one of the major complaints 12 I heard as a reason why IDEM was rethinking how 13 to do this program for communities. 14 And really, the main regulatory incentive, 15 from what Missy Shaber has told me, that the 16 pilot communities were most excited about was 17 just getting that advance notice of an inspector 18 coming to inspect one of their, you know, 19 facilities. So, most of the other benefits they 20 really weren't all that concerned about or 21 interested in. It was really just getting that 22 notification of -- I think it's a 48-hour 23 notification of -- prior to an inspector showing

1	up, so there's no surprise at your door.
2	So, there's a long list of about a
3	couple of dozen varieties of projects that they
4	can choose from. And it's a tiered program as
5	well, which is new. The program before was
6	the requirements were all the same, whether you
7	were a very small community or the City of
8	Indianapolis.
9	And so, now it's more of a tiered system
10	where, if you're a really small community, you
11	don't have to do nearly as many projects, do
12	nearly as many things as a medium-sized or large
13	community like Indianapolis. So, the
14	requirements are greater for those cities that
15	have larger populations and lots more resources
16	available to them to be implementing projects.
17	So, I think that's all I have.
18	MS. GARNER: Did you mention the
19	Governors Awards?
20	MR. WODRICH: Oh, yeah. Thank you.
21	MS. GARNER: Yeah.
22	(Laughter.)
23	MR. WODRICH: There's so much going

TT.

1 on right now. Yes, Governor Awards are open for 2 nominations right now. They opened pretty much 3 at the beginning of the year, formally and 4 officially, but we've been accepting them since 5 we announced the awards from last year. So, our 6 application deadline is March 1st, so our meeting 7 and communications group, we've got a new social media person, and Natalie Rodriguez has been on 8 9 board now for about a year or so as our External 10 Relations Director.

11 And they've been doing a lot of really 12 awesome stuff. I don't know if you guys all 13 follow our social media posts on Linkedin or 14 Facebook and Instagram and stuff, but a lot more 15 frequent posts and variety of posts, and trying 16 to get the word out on all of the things that 17 IDEM is doing, because I don't think we probably 18 did the best job of that in the past. So, we're 19 trying to get that out, that information out and 20 disseminated through social media. I think we're 21 getting a lot more hits and shares and things 22 like that. 23 So -- but the Governors Awards, we're --

-	
1	we'll be pushing stuff out on social media about
2	that, too, but Caitlin Carroll in our office is
3	managing that program now, so if you have if
4	you guys want to apply for Governors Awards, or
5	if you know anybody who's doing cool stuff that
6	you want to nominate or encourage them to
7	nominate themselves, please do so.
8	So, thank you.
9	MS. GARNER: Yeah.
10	So, I do send the announcement to past
11	grantees. There is a recycling category for
12	Governors Awards for Environmental Excellence,
13	so but we don't always get a ton of
14	nominations in that category, so if you guys,
15	yeah, can think of anybody offhand, and even if
16	you don't have time to do the nomination, you can
17	let them know about it or you can let me know
18	about it and I might be able to do it. It's
19	there's kind of different ways we can go about
20	it, so I just wanted to plug it a little bit
21	more, because I think that recycling needs to be,
22	you know, recognized in the state, so I'd like to
23	see some great nominations for that.
L	L

1	MR. WODRICH: Yeah. The application
2	process is I think it's a little bit easier
3	now. Karen Tallee Holland, she was interim
4	managing the Governors Awards. She worked with
5	IOT, our Indiana Office of Technology, to make
6	the application nomination application a
7	Web-based form, so you can just go onto the Web
8	site and it'll automatically submit it.
9	So, it's not a paper form or a PDF
10	document that you have to fill out and e-mail.
11	You just submit it through the Web site that you
12	completed it, so it's made that a little bit
13	easier. So, we did get a lot more last year
14	overall than we did the prior the year before
15	that, so I think that probably helped a little
16	bit.
17	CHAIRMAN BURROW: Any questions for
18	Carl or Deanna?
19	MR. LUTZ: Yeah. Carl, just curious.
20	Through the IDEM presentations, they were
21	fantastic, but I heard a theme of training. How
22	could and I'm just curious, and this doesn't
23	have to be answered. I'm just curious. How
I.	Ł

1	could industry help and assist with that training
2	and that or could it be an opportunity that we
3	could, you know, partner with some of those
4	folks? I'm just thinking, you know, simple tours
5	of "Here's how things get done, businesses get
6	done." And I'm sure Bruce and Terry could
7	attribute the proactive training with industry
8	partners could help, you know
9	CHAIRMAN BURROW: I'm going to do
10	MR. LUTZ: gather some of those
11	CHAIRMAN BURROW: some of this
12	training tomorrow, actually.
13	MR. LUTZ: Yeah. We all we get
14	kind of training overload in our industry, but it
15	could be something I'm was just curious
16	that we could maybe bridge together and help
17	support, you know, the IDEM staff and team
18	members, training on, "Hey, did you know? This
19	is how kind of we do business," and would that
20	help in kind of
21	MR. WODRICH: I don't know that I
22	have a good answer to that, but it is a good
23	MR. LUTZ: I gave you a segue. You
l	I

didn't have to answer it. 1 2 (Laughter.) 3 MR. WODRICH: Yeah. I -- I guess I 4 would just maybe recommend, you know, I can 5 connect any of you that might be interested in 6 doing something like that with Amanda Hall --7 MR. LUTZ: Okay. MR. WODRICH: -- directly, because 8 9 she might be able to better answer that question 10 than me --11 MR. LUTZ: Okay. 12 MR. WODRICH: -- because she's really -- like Par said, she's been doing a 13 14 wholesale inventory since she arrived of all of 15 the different trainings that are happening, you 16 know, in all of the different sections and 17 programs within the program offices and across 18 the agency that are happening, trying to 19 centralize all of that. So, she probably has a 20 better handle than anybody at this point what the 21 training is that we currently are doing, what 22 does that look like, and are there gaps? 23 MR. LUTZ: And opportunities that

1 maybe we -- that the industry could help support 2 and --3 MR. WODRICH: For sure --4 MR. LUTZ: Okay. 5 MR. WODRICH: -- yeah. I appreciate 6 that. 7 MR. LUTZ: Maybe we can take that off-line. 8 9 MR. WODRICH: Yeah. 10 CHAIRMAN BURROW: Any other 11 questions? 12 (No response.) 13 CHAIRMAN BURROW: Carl, thank you 14 very much. The theme is very familiar. We in 15 industry all hear it all of the time, and the 16 people, they want continued training, they want 17 to be challenged, they want to be educated and 18 have the opportunity to move up. So, that's how 19 we keep them engaged, keep them on the team, and 20 congratulations, and thank you, guys --21 MR. WODRICH: Yeah. 22 CHAIRMAN BURROW: -- for your effort. 23 MR. WODRICH: I mean to be perfectly

1 frank, I'm just humbled through leadership. You 2 know, I've been in state government my whole 3 career, 23 years, so I just kind of had to figure 4 it out as I go along, I haven't had a lot of 5 opportunity for leadership training myself 6 personally. I've tried to find those in a few 7 places, but yeah. CHAIRMAN BURROW: Well, unfortunately 8 9 I've had --10 MR. WODRICH: So, it'll be really 11 good for --12 CHAIRMAN BURROW: -- I've had the 13 opportunity over 40 years to have four different, 14 five different styles of leadership trained to 15 me, and as generations change, you know, there's different tacks that we take to get performance 16 17 results. 18 MR. LUTZ: Yeah. 19 CHAIRMAN BURROW: So, it's quite 20 interesting. So, thank you very much. A lot of 21 good things happening. 22 The next item on the agenda, we have the 23 Status of Existing -- or Update on Existing

1 Grants. 2 Ms. Garner. 3 MS. GARNER: All right. So, I'm 4 going to start with Fiscal Year '22, which we had 5 those six out of the eight that had a year 6 extension, so all but one of those are now 7 closed. Plus 5/Revive, you know, was here last board meeting and asked for the renewal for the 8 9 additional year. So, the rest of them are 10 closed. Some of them are scheduling site visits, 11 but everything has gone really nicely with those. 12 Fiscal Year '23, we're coming to a close 13 on most of those grants, they're expiring soon. 14 There's a few waiting for final reports and 15 reimbursements. One, Intech, they are the tire processor, they're going to need an amendment and 16 17 additional time. They will be buying the 18 equipment before their grant ends at the end of 19 February, but it's a slight change in equipment. 20 It's still for tire shredding, but it's at 21 a different stage of the process, so we are going 22 to give them an amendment to move forward on 23 But we like to keep the grants open until that.

the equipment's delivered and installed and operating so that we can have a better -- keep that on track, to make sure it is on par with the projects that we have, you know, funded.

5 And then, of course, with those closing 6 out, we're scheduling a lot of site visits. Tom 7 and I are going to be visiting a lot of 8 facilities in the next month, so that's always an 9 exciting part, I think, to see the equipment 10 operating.

11 And lastly, Fiscal Year '24 that we just 12 awarded in October, they're all being in stages 13 of execution or about to be executed except 14 for -- GDC was one that we awarded \$98,000 to, 15 and in just a little bit I'm going to give more 16 of an update on what we're going to do, but they 17 withdraw. They didn't want to wait for the 18 project to be executed, so -- to be able to 19 purchase it, so they already made their purchases 20 before we had a grant agreement in place.

So, I have some other agenda lined up for updates from past grantees. We have two past grantees that are going to be presenting to you

-	-
1	so you can hear kind of their I'm sorry
2	their progress on their projects. Too many "p"
3	words. And then after we have those
4	presentations, we can discuss maybe something
5	we do have the ability to take that 98,000 and do
6	something with it since we are in the same fiscal
7	year. So, that is on the agenda after these
8	presentations.
9	So, with that, my first on the agenda I
10	have is Muncie Sanitary District. Jason Donati
11	is here. We might have to take a few minutes to
12	set up. I know he has a PowerPoint that he wants
13	to share. Muncie Sanitary District, if you
14	remember, we helped with some arms on their
15	recycling trucks as well as new parts. They were
16	going from the Blue Bag to the carts, and I've
17	heard great success, so I'm excited to hear about
18	how it goes.
19	(Discussion off the record.)
20	MR. DONATI: All right. I'm ready.
21	MS. GARNER: We're ready for you.
22	MR. DONATI: Everybody ready? Okay.
23	Well, thank you for inviting Muncie
L	I

_	
1	Sanitary District to be here and give you an
2	update on our new recycling program. I'm super
3	excited to share with you what we've been up to.
4	My name's Jason Donati. I'm the new
5	Superintendent of Sanitation and Recycling for
6	our department. That's a new position I've been
7	in for about a month. Previously when I
8	presented to you, I was the Sustainability
9	Coordinator, so I've kind of changed positions
10	recently with the retirement of our great
11	superintendent previously, Phil Reagon, who some
12	of you may know, who's been in the industry for
13	quite a while.
14	So, basically I'm just going to go over,
15	you know, how the program's gone for we've
16	been doing this new program since August 1st,
17	2023. So, I've got some numbers, I've got some
18	pictures and some fun stuff for you. I passed
19	around a new activity book that we're
20	distributing to schools and stuff like that, so
21	feel free to take that with you.
22	But here's a picture of one of the new
23	trucks. We did purchase two new recycling
	•

1	trucks, so this is one of them, 594. So, as
2	you're all well aware, we received \$468,798 to
3	purchase the automated help purchase the
4	automated parts of two auto car LaBries and 7,000
5	96-gallon blue cycling toters or carts. We call
6	them toters because it's the toter brand, but
7	carts.
8	And then I just wanted to throw in that
9	that also helped us get a \$50,000 grant from the
10	Recycling Partnership. We had applied for some
11	funds to help with education and outreach and
12	really utilize the Recycling Partnership and
13	their expertise in helping to get the word out
14	and getting people to sign of up for our program.
15	So, that's been helpful, and I'll share a little
16	bit more about that.
17	You know, why we do this, this is just a
18	quote taken from the Recycle Indiana Recycling
19	Infrastructure and Economic Study. I'm
20	passionate about waste and figuring out how to
21	recycle as much as possible and not send organic
22	matter, yard waste, to the landfill. It's
23	something I'm very passionate about and have been
ļ	

TT

passionate about for quite a while, so we're all well aware of how much of this material is going to the landfill and how we need to improve our efforts to reduce that.

5 And so, Muncie has been recycling for over 6 25 years through a Blue Bag program previously, 7 and it was somewhat successful. Our recycling 8 percentages would be anywhere between 26 to 32 9 percent diversion, but it wasn't the most 10 efficient process, and that's why we transformed 11 the program. We came to you all for assistance 12 with the new trucks, and our goal is to get to 13 that 50 percent number, as well as that's the 14 state's goal, so that's what we're striving for. 15 The first thing we did was create a

16 Recycling Advisory Board, because we didn't want 17 to do this in a silo. Our community was used to 18 single-stream recycling through the Blue Bag 19 program, and it was a big change for our 20 community. So, we created a Recycling Advisory 21 Board. Rep. Sue Errington, who's been great -- I 22 don't know if she's on the Zoom call. 23 If you are, hi, Sue.

-	-
1	Rep. Errington, but she's on our Advisory
2	Board. And then we have drivers, solid waste
3	district reps, and then other members of the
4	community. And we would meet quarterly to
5	discuss the program changes, get ideas and
6	feedback from them, and that helped me
7	tremendously create the program and do all of the
8	work that needed to be done to make this
9	transformation happen.
10	We offer an opt-in residential recycling
11	cart program with weekly pickups. We decided to
12	go that route because we had previously visited
13	other communities and asked them, you know,
14	"How's your program going, and what would you do
15	differently?" And we heard from a few
16	communities that they recommended not giving
17	everyone a recycling cart, because they saw a lot
18	of contamination and issues related to that.
19	So, we decided to create an opt-in program
20	that you actually would take a pledge and do that
21	education up front and you would sign up, and
22	then we would deliver that to you free of charge,
23	no extra cost to a resident or household, because
l	

1 we thought it was important to really address 2 that up front and do that education up front, and 3 we have found that to be a very successful way of 4 doing it, just based on our experience. 5 So, that opt-in program, you would go to 6 our Web site or you would fill out a postcard 7 that we direct mailed. We put this postcard together with the Recycling Partnership, so they 8 9 had case studies and they had a lot of knowledge 10 and information on what worked best. 11 We did actually two different mailers. We 12 did a general mailer, an inkempathetic [phonetic] 13 mailer, and then we actually tracked what got the 14 best response, so it helped them with some of the 15 work that they're doing and what people can do in 16 the future. But we had a great response with 17 direct mail and we had a great response on-line 18 and actually through social media as well. 19 Here's a map of just green dots of how 20 spread out people who have opted in and signed up 21 for the program have spread out throughout 22 Muncie. We noticed early on that not all of 23 Muncie was signing up, so we did -- would

1	strategically do direct mail to those
2	neighborhoods and areas, and I would go out and
3	do the outreach specifically to neighborhood
4	associations, try to get in the door anywhere I
5	could to get the word out. And so, we are
6	pleased to see more of a balanced opt-in
7	participation throughout the city.
8	And then there's our coloring book and
9	activity book as well.
10	This is a picture of a truck dumping the
11	Blue Bags, and this is so, this is pre the new
12	program. And initially what I see is a lot of
13	cardboard; right? And we call it the Amazon
14	effect. Everyone's getting boxes and boxes, and
15	your item's in three boxes. So, we noticed this
16	over the years and more people ordering on-line.
17	This cardboard wasn't getting recycling
18	because it was being thrown into a trash toter.
19	It wasn't being ripped up or put into a Blue Bag,
20	and we were missing a lot of that cardboard that
21	we needed to get and recycle. And so, that's one
22	of the reasons why we went to a cart program was
23	to capture a lot of that cardboard. A lot of
ļ	I

T

_	
1	people would set their cardboard on the curb, and
2	with an automated system, it's hard to get out
3	and get that.
4	But so, this is what a typical truck
5	would look like pre the new program. You see
6	some Blue Bags, some still intact, you see a lot
7	of cardboard that isn't in a Blue Bag, and then
8	you just you just see a process before it
9	would have to go to a conveyor system, the Blue
10	Bags would have to get ripped open, and we would
11	have to hope that the Blue Bags contained
12	recycling material, and there were just a lot of
13	issues over the 25 years of doing that.
14	This is the first week of the new program
15	with the two new trucks. I know this is super
16	exciting seeing trucks dump. It is for me,
17	but but so, you'll see, you know,
18	immediately that these two trucks, the two new
19	trucks, they're picking up on maybe a Thursday
20	route, which is a big route. Immediately I was
21	just blown away with the content and the small
22	amount of contamination. So, the education up
23	front really does work.
L	

-	
1	And this is actually a live video that I
2	did on Facebook where we show the trucks dumping,
3	and then I went into the pile and pulled out
4	materials that were contamination for just public
5	education and outreach, and this video got shared
6	hundreds of times, and so many people came up and
7	said, "Hey, this was super tangible and helpful
8	and helped me understand what I wasn't supposed
9	to put in there, and really helped, you know,
10	clear things on what should go in there and what
11	shouldn't." But I was super pleased with, you
12	know, that that was the first week and how
13	well the program has been doing.
14	MS. WHITEHEAD: Jason, you're not the
15	only recycling nerd in here; don't worry.
16	MR. DONATI: I know. I try to
17	contain my excitement, but
18	MS. WHITEHEAD: You're good, but
19	you've got I love it.
20	MR. DONATI: I feel pretty
21	comfortable here with other recycling nerds.
22	Yeah, like I my as soon as I got the job, I
23	immediately hopped on the back of the truck and
L	

1 worked with my crew, because I was like, first of 2 all, I want to see what everybody does; second of all, I'm a geek, and I'm like lifting it up, "Oh, 3 4 you know, that's not supposed to be in there," 5 and we're dumping and --6 MS. WHITEHEAD: How else do you know 7 unless you go out and do it? MR. DONATI: Exactly. And I don't 8 9 want to ask any of my crew to do something I 10 wouldn't do. 11 MS. WHITEHEAD: Right. 12 MR. DONATI: So, I really enjoy being 13 on the back and going to houses. 14 So, here's some of our numbers. The first 15 six months of the program we've collected 490 16 tons, so 980,000 pounds of commingled recycling 17 material. We've exceeded our expectation of 18 signups, so we're at 10,226 households, so 19 about -- we have about 25,000 households in 20 Muncie, so 41 percent of our households. 21 Our goal within the first couple of years 22 was to get the 50 percent of our households, and 23 that's the goal that we've created with the

1 Recycling Partnership, too. We're well on our 2 way to that. I think we'll get there in three 3 months, because people are still signing up; 4 that's why the plus sign is there. 5 And we're caught up now. There was a lag 6 in delivery for a while, but now I've got a crew 7 that's delivering two to three days a week, and 8 so, if you're ordering a toter, you're likely 9 going to get it maybe that day or the next day. 10 So, that's exciting that we're caught up. And 11 then we've also seen some decrease in our trash 12 tonnage, so 2023 compared to 2022, 481.92 tons 13 less trash coming in. 14 So, when I asked Jason King, who's the MRF

15 manager, the material recovery facility manager 16 of East Central Recycling, "What do you think 17 about the material coming in?" He's a geek, too, 18 and he's like -- he says that it's the cleanest 19 he's ever seen and he's excited about it, and 20 he's blown away with the material coming in. Ιt 21 really is -- that education up front, I can't 22 stress enough, has been very successful. 23 And then we worked with the Recycling

Partnership to really build the brand of what -the images that are tested that work well, the information that is tested that works well, and so we're -- we hand out -- when we deliver a toter, we offer 48 or 96, because it's base constraints. Most of our households have gone to 96 gallons.

But we also have a repositionable sticker 8 9 that we give them and that they can put on their 10 fridge or the wall or anything like that. We did 11 that instead of a magnet because it was more 12 versatile. And then we also give them an 13 11-gallon kitchen container that they would put 14 in their garage or kitchen or wherever they want, 15 to put that material in because they no longer Then the idea 16 have a bag or anything like that. 17 is that they would take that and dump it in the 18 larger toter, and that has been very popular. 19 And then we're just continually educating

20 about what doesn't go in it. When I was on the 21 back of the truck, I saw, you know, old fans, 22 electronics that definitely shouldn't be in 23 there, a lot of styrofoam, clothing, stuff like

1 that. And then there's obviously the list of 2 things we don't accept, but we do accept at the MRF some of those items. So, we're just doing 3 4 constant education. 5 So, we had to get rid of -- well, let's 6 just say our old mascot retired. He was a Blue 7 Bag, Mr. Blue. He actually was featured on HBO, 8 you know, as a joke --9 MS. GARNER: Yes. 10 MR. DONATI: --- because he was a 11 funny character, but -- so, we had to get rid of 12 him. He retired, and we came up with this 13 concept of Recyclor the Recyclon, because the 14 kids in our community love our trucks. They sit 15 at the windows and they wave, and our drivers are 16 trained to watch for that and give them a 17 coloring book or a little toy truck or -- because 18 we know how important that is. 19 And these kids just absolutely love the 20 trucks, and so, the concept of Recyclor was a 21 transformer kind of based on our trucks with the 22 new recycling toter feet, and then he also has a 23 Petersen grapple arm and a LaBrie arm for the --

1 picking up the stuff. It's been very popular. There's -- we don't have a mascot outfit or 2 anything, but a lot of the kids are really 3 4 enjoying that. 5 MR. LUTZ: Yet. 6 MS. GARNER: Yet, yeah. 7 CHAIRMAN BURROW: Yet. 8 MR. DONATI: Yeah, yet, yet. So, 9 again, our goal -- first goal within the first 10 three years was to get to 12,500. We're already 11 at 10,226 plus. We are -- we're giving out these 12 11-gallon containers, and another thing that 13 we're doing to reduce contamination with shredded 14 paper is we're offering free shredding to anybody 15 that signs up, so we cover the bill. We want 16 people to take the certificate to the MRF, get 17 their material shredded, and then we'll -- we can 18 cover that program instead of them putting their 19 loose shredded paper into the recycling toter, 20 which can cause a problem, contaminate glass and 21 all of that in the recycling stream process. 22 I want to give a shout-out and thanks for 23 featuring us, social media, and you had a staff

1 member come that was excellent and interviewed us 2 and actually followed us around during the 3 delivery and stuff, and posted it on social 4 media, Linkedin, and we've gotten a lot of great 5 feedback with that, and I had a small interview 6 with that. So, just a shout-out for that. Thank 7 you for doing that and spreading the word. 8 The other great thing that's come from

9 this is we're able to do community events better, 10 so we've done concerts at Ball State, we've done 11 Iron Man, which is a really big competition that 12 comes to the reservoir near Muncie, we've 13 expanded into the downtown area with three yard 14 recycling dumpsters, and it's just allowed us to 15 really expand our recycling efforts.

16 This is actually from the Iron Man event. 17 I did a waste audit at the Iron Man event a 18 couple of years ago, and it's basically a small 19 city in our town for one day, and there was so 20 much waste it just, you know, broke my heart. 21 And so, I immediately met with the organizers and 22 said, "We need to help you recycle this material 23 and take the rest of the material that's not even

_	
1	used to like local soup kitchens and stuff like
2	that." And so, now we have a really good program
3	where we're collecting, you know, plastic,
4	cardboard and other items to keep that out of the
5	landfill, and this program's helped that as well.
6	What's next? We need more trucks. We are
7	at capacity. We've got two trucks. We started
8	with two routes. We're obviously, you know,
9	10,226 households. We've had to add two of our
10	extra trucks, so we're running four routes a day,
11	and we're out of trucks. So, we need more
12	trucks, and so, you may potentially see an
13	application or, you know, more interest from me
14	for that, because we want this program to
15	continue to grow, and we're looking at ways to
16	continuously expand that.
17	We also want to expand our three yard
18	recycling containers to organizations like, you
19	know, soup kitchens, nonprofits, downtown
20	businesses, because that's going really well.
21	We're looking at a dual-compartment rear loader
22	for alleys and special events. We've tried to
23	get everybody to the street, but there's like six
L	

1	percent of our routes that are that they can't
2	go to the street because of safety concerns:
3	Hills, highway one way, you know, stuff like
4	that. And so, we think that maybe a dual
5	compartment like 70/30 recycled trash, smaller
6	truck, you know, 12 to 16 yards, will be able to
7	help address that issue, but then we could also
8	use it at special events.
9	And then the other thing that I really
10	want to move into is a yard waste organics cart
11	program. We did apply for the SWIFR grant from
12	the EPA to help purchase more trucks and to
13	implement and start the yard waste organics cart
14	program, but we didn't get that grant, and so
15	but we have that proposal and we're still looking
16	at ways to fund that and get that program off the

Π

17 ground. 18 And then lastly, that's just a truck picking up a cart, and our way of saying thank 19 you for supporting Muncie and believing in our 20

21 new program, and it's exceeded our expectations, 22 and we couldn't have done it without this Board and all of the expertise that you all offer and 23

1 have helped with.

2	And that's the end of my presentation.
3	I'll answer any questions anybody might have.
4	MS. WHITEHEAD: Do you have an open
5	or operating yard waste facility now?
6	MR. DONATI: No. We what we're
7	hoping to do is establish some land, get it
8	permitted, where we would accept yard waste, and
9	in the SWIFR grant we had put in money for a
10	front loader, a windrow turner, and different
11	equipment that we would need to actually turn it
12	into compost.
13	And then we'd also like to explore our
14	street sweepings, because I know Noblesville, for
15	a couple of years, had a successful program where
16	they were actually able to take their street
17	sweepings, test it, and then use it for municipal
18	projects. They couldn't use it in other ways,
19	but there's a very specific way that you could
20	use that, because I'd like to see none of that
21	material going to a landfill in any way.
22	Right now we basically do a
23	leaf-collection program, and we it goes to the

1 MRF and it ends up getting chipped or turned into 2 mulch and stuff like that. So, a lot of it is 3 staying out of the landfill, but I'd like to 4 partner with like our soup -- our food bank, and 5 we do have a business that's collecting kitchen 6 scraps, you know, so the high nitrogen stuff, but 7 I'd like to figure out community partnerships and ways to really create some community composts and 8 9 stuff like that. So, that's about as much as 10 we've got so far. 11 MR. LUTZ: First, Jason, great job. 12 Thank you. MR. DONATI: 13 MR. LUTZ: Thank you very much. And 14 whoever -- and if it was you, kudos. The name 15 Recyclor the Recyclon --16 (Laughter.) 17 MR. LUTZ: -- that's about as best as 18 I've heard in a while. 19 MR. DONATI: Thank you. 20 MR. LUTZ: I wish I would have 21 thought of it, but, you know. 22 MR. DONATI: I'm waiting for 23 transformers to reach out to us.

1 MR. LUTZ: Oh, right, yeah, yeah. 2 Just curious as -- you know, and as you go 3 through and you evolve and look to grow, yeah, 4 exciting seven months of an opt-in program 5 that's 41 percent, and I think that's going to 6 continue to grow. Another way to, you know, look 7 at costs and curb costs is do what's an audit on the route, especially with the 95-gallon carts, 8 9 96-gallon carts, look inside, or, you know, you 10 do a kind of a study of pounds-per-setout --11 MR. DONATI: Uh-huh. 12 MR. LUTZ: -- type thing. I know --13 trust me, been there done that -- it is easy on a 14 weekly setout --15 MR. DONATI: Uh-huh. MR. LUTZ: -- and every other week 16 17 setout is not undoable based on the cost and --18 MR. DONATI: Uh-huh. 19 MR. LUTZ: -- fleet expense, so you 20 would save on carbon footprints and --21 MR. DONATI: Yep. 22 MR. LUTZ: -- things of that nature 23 as well. So, you know, as you evolve and grow,

1 that -- you know, and help in the overall type 2 thing could be it. 3 MR. DONATI: Yeah, that's a really 4 good point, and, you know, one thing we've also 5 noticed and our trash route drivers have noticed 6 is less trash. 7 MR. LUTZ: Yeah, yeah, sure. MR. DONATI: And it -- so, their 8 9 routes are becoming easier and more manageable. 10 MR. LUTZ: Yeah, but the up-front 11 cost of a LaBrie autocart truck, especially 12 C&G's --13 MR. DONATI: Uh-huh. 14 MR. LUTZ: -- pretty pricey, so --15 MR. DONATI: And growing. Yeah, yeah, yeah. 16 MR. LUTZ: So, I 17 mean that could be another way to kind of help 18 get you to, you know, the threshold of --19 MR. DONATI: Yeah. 20 MR. LUTZ: -- I don't know if you had 21 a 60- or 70- or 80-percent participation rate, 22 that could get you to where you need to go 23 without just cart expense, as opposed --

1 MR. DONATI: Yes. 2 MR. LUTZ: -- to two, three more 3 trucks. 4 MR. DONATI: Yeah, that's a great 5 point. Thank you for that. 6 Yes. 7 MR. GUERIN: How exactly are you 8 handling the paper shredding aspect that you said 9 before? 10 MR. DONATI: The paper shredding --11 MR. GUERIN: The people have been 12 throwing it in the recycling. You said you took 13 care of the shredding. How do you do that? 14 MR. DONATI: Yeah. East Central 15 Recycling has a large shredder, and so, if a 16 resident comes in with that certificate, they 17 record it, they go in over to the shredder and 18 they shred all of their paper, and then they just 19 keep track of that, and we get billed for how 20 much is shredded, and then that way that shredded 21 paper gets baled as shredded paper instead of it 22 going into our drop-off and into the toters. 23 Some of the concerns we've heard in the

1 community was things blowing around, like they 2 were worried about putting it in there loose, and on a windy day, you know, it gets knocked over. 3 4 We've seen a little bit of that, not as much as 5 we thought we would, but that's kind of the idea 6 of the whole shredding program is they pull in, 7 they have that certificate that has their name 8 and address, they record it, and then they pull 9 around and a staff at East Central Recycling 10 helps them shred that paper, and then they just 11 keep track of all of that. 12 MS. GARNER: So, how do they go about 13 getting that certificate? Is that something like 14 that's on-line, or --15 MR. DONATI: Yes, I e-mail it to them, yeah. 16 17 MS. GARNER: Okay. 18 So, I e-mail it to them MR. DONATI: 19 or I provide copies at the office for people that 20 may not have access to printers and stuff like that, and then eventually we're -- we haven't 21 22 gotten there yet because we're still kind of 23 catching up, but we're going to -- we're going to

_	
1	be doing a monthly newsletter. The other thing
2	that I forget to mention is, with the opt-in
3	program, we collected a lot of data, so we have
4	at least your phone number, and most 75
5	percent of you, we have your e-mail. So, we'll
6	be able to continue with that communication about
7	contamination and issues like that, community
8	events, and also like the shredding certificates,
9	stuff like that. So, yeah.
10	MR. GUERIN: This probably is not a
11	problem for you, but it would be for the other
12	Jason.
13	MR. DONATI: Yeah.
14	MR. GUERIN: People who put
15	recyclables in the grocery store bags, plastic
16	bags, and then take them at the bag-out and throw
17	it in the recycling cart
18	MR. DONATI: Yes.
19	MR. GUERIN: how much of a problem
20	do you note is that for Jason, because he has to
21	break that bag open?
22	MR. DONATI: It is a problem. We
23	haven't we've seen a little bit of it. You

-	-
1	know, we're still doing waste audits where I
2	watch the trucks dump or I'm on the back lifting
3	up carts. So, what we're doing is we have two
4	code enforcement officers right now, potentially
5	adding one or two more with the program growth,
6	but we're trying to stay on top of that, where if
7	our drivers notice that or they see something
8	like that, we're trying to notify them and let
9	the resident or homeowner know that you're not
10	supposed to bag this material, but it can
11	obviously be a problem in the MRF.
12	But I've been shocked at how a lot of
13	people were still putting it in Blue Bags, not a
14	lot of people, but some people, and so, we're
15	just kind of reiterating and doing education.
16	They're just hesitant to do for whatever
17	reason, they're hesitant to put it in there loose
18	because for 25 years they've bagged it.
19	MS. WHITEHEAD: It's change.
20	MR. DONATI: It's change and it
21	freaks them out.
22	CHAIRMAN BURROW: A very scary thing.
23	(Laughter.)
ļ	

1 MR. DONATI: Or they're like, "I've 2 got to get rid of my Blue Bags. I've got a stash 3 of 500." So, it's a little bit of a problem, but 4 not as bad as we thought it would be. 5 CHAIRMAN BURROW: Well, Jason, I'd 6 like to commend you. I mean I think your passion 7 and excitement with regard to engaging your clients is what's making the program a success, 8 9 in all honesty. 10 MR. DONATI: Thank you. CHAIRMAN BURROW: So, you and your 11 12 whole staff appear to be doing a wonderful job. 13 MR. DONATI: Thank you. 14 CHAIRMAN BURROW: And I've worked 15 with communities that -- you know, they like to 16 make rules --17 MR. DONATI: Yeah. 18 CHAIRMAN BURROW: -- and then they 19 don't want to talk to anybody after they make a 20 rule --21 MR. DONATI: Yeah. 22 CHAIRMAN BURROW: -- and they don't 23 get anything done.

1 MR. DONATI: Uh-huh. 2 CHAIRMAN BURROW: But you're amongst 3 a group of recycle nerds, so --4 (Laughter.) 5 CHAIRMAN BURROW: -- feel free to 6 nerd out. 7 MR. DONATI: Yeah. That feels so 8 good. 9 CHAIRMAN BURROW: Great job. Thank 10 you very much. 11 MS. WHITEHEAD: It's awesome to watch 12 this --13 MR. DONATI: Thank you. MS. WHITEHEAD: -- I mean, and see 14 15 what you're doing. I mean your thoroughness and 16 education, I mean it's just outstanding. 17 MR. DONATI: Thank you. I appreciate 18 that. 19 MS. WHITEHEAD: Yes. 20 MS. HACKMAN: And I give kudos to 21 your boss --22 MR. DONATI: Yeah. 23 MS. HACKMAN: -- and whoever's on

1 that board that said, "It's okay. Go with it." 2 MR. DONATI: Yeah. 3 MS. HACKMAN: "We know it's going to 4 cost a lot of money, but it's the right thing to 5 do." 6 MR. DONATI: Yeah, I -- yeah, my 7 board and administrator have been very supportive from the beginning, and that makes a world of 8 difference. 9 10 MS. HACKMAN: Yeah. 11 MR. DONATI: And then the team that I 12 have, you know, we did hire two -- we had to hire 13 two new employees to accommodate the program. 14 We're going to have to hire probably two more, 15 you know, or work with efficiency and stuff, 16 but -- so, it's creating jobs, it's -- we've 17 gotten great feedback from the community. 18 Like I said, we've had a few people say, 19 "Well, I thought it might work, but this isn't 20 going to work for me, " and that's been very 21 minimal, you know, I'd say ten households, you 22 know, compared to the 10,000-plus we're serving. 23 So, overall, they've adapted to the change, and I

1 don't hesitate to say, "Muncie," you know, to the 2 residents, "you're doing a great job," you know, 3 because they are, really, because you never know 4 with change. Twenty-five years of doing 5 something, that's amazing. 6 And then the Recycle Partnership has 7 really helped with a lot of the direct communication, because they've tested a lot of 8 that, and so, that's been really helpful. 9 10 MR. LEAS: Yeah, Jason, I also 11 compliment you on an excellent effort and job 12 done and getting the data and oversight. That is 13 very important for this kind of project. 14 MR. DONATI: Uh-huh. 15 MR. LEAS: And your ability to communicate with the households is a confidence 16 17 builder, and so, you have that link with the 18 households, and your system is set up such that 19 you can measure the output --20 MR. DONATI: Uh-huh. 21 MR. LEAS: -- from the households. 22 You know how many households are coming in, you 23 know how many tons are --

1 MR. DONATI: Yes. 2 MR. LEAS: -- going out as 3 recyclables. MR. DONATI: Uh-huh. 4 5 MR. LEAS: And so, then as you go 6 back to say, "Well, how many pounds of 7 recyclables are being generated per household?" --8 9 MR. DONATI: Yeah. 10 MR. LEAS: -- you can look at 11 individual households, and then you can get 12 multifamily-type units recycling, you can start 13 to discern how many pounds of recyclables are 14 bing generated per household. 15 MR. DONATI: Uh-huh. 16 MR. LEAS: And you can expand upon 17 those numbers. If -- especially working with 18 TRP, of course, they've done a study that's 19 similar, and you would fall in line very good 20 with their studies --21 MR. DONATI: Uh-huh. 22 MR. LEAS: -- of how many pounds 23 should be generated as recyclables, you know,

1 glass --2 MR. DONATI: Yep. 3 MR. LEAS: -- plastic containers, 800 4 pounds per year is what they have found. 5 MR. DONATI: Uh-huh. 6 MR. LEAS: And when backtracking your 7 numbers, you could say, "Well, households --" you know, if you're doing the best, there should be 8 9 800 pounds of pure recyclables per household that 10 could be collected --11 MR. DONATI: Yeah. 12 MR. LEAS: -- and we're generating 13 maybe a hundred pounds or two hundred pounds or 14 four hundred pounds of collection. 15 MR. DONATI: Uh-huh. 16 MR. LEAS: And so, again, you engage 17 them and say, "There's more material to be had 18 from a household that we're not getting --" 19 MR. DONATI: Yep. 20 MR. LEAS: -- even though it's very 21 clean, and we applaud and encourage you in that 22 way, but you have the means to communicate with 23 them.

1 MR. DONATI: Yeah. 2 That's a great -- I don't MR. LEAS: 3 I mean certainly don't take that for know. 4 granted. 5 MR. DONATI: Yeah, absolutely. Yeah, I'm really excited about that, and like the calls 6 7 that I've had to make about contamination, like early on, where a driver notifies me, and I just 8 9 call them. 10 MR. LEAS: Yeah. 11 MR. DONATI: And I just very gently 12 explain to them how the program works, and, you 13 know, some people get a little flustered, they 14 feel like you're attacking them, and --15 MR. LEAS: Sure. 16 MR. DONATI: -- you're just like, 17 "No, it's -- you don't have -- this isn't 18 mandatory. You don't have to do the program. 19 We're here to help," and, you know, at the end of 20 the conversation they do understand, and they 21 say, "Well, I'll try to do -- I'll do better." 22 And they do. You know, we haven't -- we haven't 23 had repeat issues -- maybe one or two where we

1 had to pull a toter because they just weren't 2 doing it right at all, but it's been very 3 minimal, and -- but that -- being able to contact 4 that household is really important. 5 MR. LEAS: Yeah. 6 MR. DONATI: And it's going to help 7 for the long-term success of the program for 8 sure. 9 MS. HACKMAN: Deanna, I think this 10 would be a good nominee for the Governors Award 11 in recycling. 12 MR. DONATI: Thank you. MS. GARNER: I have the --13 14 MS. HACKMAN: Deadline March 1st. 15 MR. DONATI: Thank you. 16 MR. LEAS: Is the tonnage tracked 17 when it goes into the MRF? I guess is that where 18 it gets -- come in per truck? Does it --MR. DONATI: Yes. 19 20 MR. LEAS: -- get tracked that way? 21 MR. DONATI: Yeah, which is way 22 easier than obviously the previous way of doing 23 it, but yeah. So, they pull in, they hit the

1 scale, the scale house identifies it as 2 recycling. 3 MR. LEAS: What's coming in? 4 MR. DONATI: Yeah. 5 MR. LEAS: I know the MRF reports 6 what goes out --7 MR. DONATI: Yeah. MR. LEAS: -- but in addition, they 8 9 track what's coming in? 10 MR. DONATI: Yeah. And a lot of the 11 skepticism related to the Blue Bag program has 12 gone away, because they're -- you know, I don't 13 know how many times I went and presented it, and 14 they're like, "Is it even getting recycled?" 15 MR. LEAS: Yeah. MR. DONATI: You know, "This -- like 16 17 I just don't believe this program works," and 18 this, that and the other, and no matter how many 19 times you showed them pictures or explained it to 20 them, they just still didn't believe it, but that 21 skepticism has gone away with this program. They 22 just -- they say, "Okay. This is what we want." 23 Some people say, "This is what we wanted 25 years

1 ago," but others, they're just -- their 2 confidence that the material is actually getting recycled and that their effort is worth it has 3 4 increased tremendously, so --5 MR. LEAS: Yeah. Thanks. 6 CHAIRMAN BURROW: Congratulations. 7 Don't think your --8 MR. DONATI: Thank you. 9 CHAIRMAN BURROW: -- job's ever done, 10 though. 11 MR. DONATI: No, no. 12 MS. HACKMAN: Yeah. 13 (Laughter.) 14 MR. DONATI: I know it's relentless 15 and it's ongoing. Well, thank you all for the opportunity to update you and present. 16 17 MR. LEAS: Nice job. MR. DONATI: I'll stick around for 18 19 any questions. 20 (Applause.) 21 CHAIRMAN BURROW: Thank you. 22 MS. GARNER: All right. That was a 23 great presentation, and we do have a second

1 presentation lined up from Jeremy Troutwine, with 2 DAK Americas, also known as Alpek Polyester. He 3 is on Zoom. 4 Jeremy, are you still with us? You 5 should --6 MR. TROUTWINE: Yes. 7 MS. GARNER: Okay -- hopefully be 8 able to share your screen. It might take a 9 second. 10 MR. WHITNEY: There's a green button 11 on the bottom --12 MS. GARNER: Yeah. 13 MR. WHITNEY: -- that says, "Share 14 screen." 15 MS. GARNER: And I'll let you go 16 ahead and present your project and some of the 17 results that you guys have had as well. Thank 18 you for being here. 19 MR. TROUTWINE: I'm not sure how you 20 guys are seeing this. Here's --MS. GARNER: Under "Slideshow." 21 22 MR. TROUTWINE: -- the presentation. 23 MR. WHITNEY: If you click

1 "Slideshow," there should be a "present" button. 2 There you go. 3 MS. GARNER: There we go. 4 MR. TROUTWINE: All right. So, my 5 name is Jeremy Troutwine. I'm with Alpek 6 Polyester out of the Richmond site, and this is 7 our Recycling Market Development or IDEM review. First off, I would like to thank everyone on the 8 9 Board for allowing us to participate and 10 supporting us through this project. 11 We internally call this project Avenger. 12 You know, the first time around developing the 13 plan, we didn't really do some things that we 14 should have the current way to position 15 ourselves, and so, this was our second attempt at 16 that, and we feel that it went pretty well, you 17 know, and I also want to give a special thanks to 18 Deanna. She was a very good support and resource 19 through this, so we do appreciate all of the help 20 with that. 21 We'll go through and kind of review our 22 process just real quick, just to kind of give 23 everyone an update on what it is that we do. We

_	
1	recycle PET, so we take the bottles from
2	curbside, we run it through mechanical
3	separation, trommels, eddy currents, metal
4	separation, and then we finally go through bottle
5	sortation, which we'll go further into that
6	was actually the target of this project and
7	then we wash the bottles, dry them, and then we
8	turn that into flake and further process the
9	flake, finally making our PET pellet, which go
10	back to bottle. So, it's a circular economy here
11	in Indiana, bottle-to-bottle transformation of
12	the PET bottles that we receive from MRF's and
13	the suppliers.
14	As far as the project that we did, we were
15	struggling to get not only quality but the yield
16	and throughput with our existing equipment, so we
17	developed this program to further extend our
18	sortation process. So, this is the layout that
19	we had starting off. We had three optical
20	sorters that really separated the clear PET from
21	the rest of the stream. Even though we are a PET
22	recycler, we get it from curbside material, which
23	means we have a lot of different other products,
l.	

1 non-PET, whether it be aluminum, cardboard, PEPT, 2 you know, just different items, and we were 3 really overwhelming the system, you know, that we 4 originally built. 5 So, you know, fast-forwarding to our 6 project and scope of work in the front of our 7 process, we installed three additional optical sorters, which allowed us to separate the 8 9 material sooner in the process, divert the 10 non-PET items, the PEPT, to a byproduct stream 11 before going into the wet trommel. 12 It also helped us to separate the 13 cardboard and papers before going into the wet 14 trommel and that full bottle wash, which allowed 15 us to clean up our water streams and really kind 16 of capitalize further downstream on yields and 17 throughputs. So, this was a big benefit on many 18 different levels, yield, throughput, quality, so 19 it impacted, you know, us at three different 20 levels throughout our process. 21 This is just capturing some of the work 22 that went into it. Basically we had to remove a

third of our operating plant and then reinstall

-	
1	new equipment. I think there was somewhere along
2	the lines of 33 conveyors, three optical sorters.
3	We had to move and reinstall some equipment, such
4	as an eddy current we had to reposition, you
5	know, and we did all of this within two weeks,
6	you know. So, you know I feel that the planning
7	and the efforts really kind of paid off with the
8	downtime of only two weeks to accomplish this
9	project.
10	So, when we get down to the nuts and bolts
11	of, you know, what did this project really do for
12	us, you can see here in the trend, this is our
13	two-through-sevens or our non-PET byproduct
14	stream. This would be our PEPT. We were really
15	able to reduce the amount of generation by an
16	average of 226,000 per month, so, you know, we
17	really were able to reduce our byproduct stream
18	and capitalize on some of those products that
19	were going to a landfill.
20	So, within that two-through-seven or
21	non-PET stream, we were able to recover 1.5
22	percent of that stream as our PET
23	bottle-to-bottle sales, so, you know, this
ļ	<u>I</u>

1 project helped us streamline and clean up the 2 byproducts for additional PET that we were 3 missing, and capture that and put that back into 4 bottle sales. 5 So -- and then as far as throughputs and 6 overall yield, our overall yield did make a step 7 change, an increase of about three percent, and this is for clear PET that goes bottle to bottle 8 9 into our pelletizing process that, you know, 10 moves further downstream within the circular 11 economy. 12 We were also able to increase our 13 throughputs up to 5.5 million, which was the 14 targeted projection of this project, which is an 15 increase of about 230,000 pounds of clean, clear 16 flake going to pellet, which equates to about 410,000 pounds of curbside material that we were 17 18 able to get through our machine with the 19 increased capacity. 20 So, that's a real quick summary of the 21 project. One, with this project, it did allow us 22 to -- we utilized this project as a milestone or 23 a good foothold in order to leverage other

1 projects which we are now putting in action. We 2 just completed another project in December to 3 further bottleneck downstream of this. So, the 4 benefits that we've seen so far on this project, 5 you know, we've not seen the whole benefit yet. 6 We've hit our targets for what we thought we 7 would. Now with further debottlenecking of 8 9 downstream equipment, we'll see a greater benefit 10 than what we even realized we would, and we're 11 already starting to see that with the project 12 that we completed in December, which was 13 debottlenecking our wash line. We have two other 14 projects coming up this quarter that will help 15 further bottle -- increase the bottlenecks going 16 from our wash line -- through our wash line, 17 which will further increase our throughputs and 18 capabilities of getting curbside material through 19 our process. 20 The second project that we were able to 21 leverage because of this not will only hit our 22 throughputs, but it will also target our yields. 23 So, this really allowed us to open up different

1 projects and debottleneck our entire system, so, 2 you know, without the support and the help from 3 your guys' Board and committee, we wouldn't have 4 been able to leverage the ongoing performance of 5 this plant and the opportunities of this plant. 6 So, again, thank you, and we appreciate 7 everything you guys did for us. 8 CHAIRMAN BURROW: Thank you, Jeremy. 9 A very detailed overview. Thank you very much. 10 It looks like great success with some numbers. 11 Any questions from Board members? 12 MS. GARNER: Just real briefly, we 13 did fund them \$300,000 for those three optical 14 sorters he mentioned at the front there. I just 15 wanted to provide that. 16 Go ahead, Terry. 17 MR. GUERIN: I may have missed it, 18 but what do you do with the non-PET plastics? 19 MR. TROUTWINE: So, the non-PET 20 plastics -- and that's really been an up-and-down 21 stream for us. We really struggled. We went 22 from selling it to landfilling it back to selling 23 that material, just recent. So, this project

1 helped us also leverage the sales by cleaning 2 that byproduct stream and removing more of the 3 PET and the nonplastic items from that stream, 4 allowing us to renegotiate with our buyers on 5 taking that material, because this project did 6 very much allow us to clean that stream up. 7 MS. HACKMAN: Jeremy, this is Debbie Hackman. 8 With your increased productivity, do 9 you see any problem in acquiring enough material 10 to keep the machines busy? 11 MR. TROUTWINE: At this point, no. 12 We've been able to acquire enough material that 13 we've not seen any shutdowns because of lack of 14 material, so our suppliers are keeping us fed. 15 We've seen that in the past, but fortunately this 16 year, we've not struggled with that. 17 MS. HACKMAN: Where does your 18 feedstock come from? Is it local mainly, or --19 MR. TROUTWINE: Some of it is local, 20 but really all over the U.S. We even get some 21 from Canada. We get some from, you know, here in Indiana, Ohio, even California and Michigan, 22 23 New Jersey, I mean all over.

1 MS. HACKMAN: And it's post-consumer? 2 MR. TROUTWINE: Yes. 3 MS. HACKMAN: Thank you. 4 CHAIRMAN BURROW: Any other questions 5 from Board members? 6 (No response.) 7 CHAIRMAN BURROW: Anyone on-line have a question for Jeremy? 8 9 (No response.) 10 CHAIRMAN BURROW: Hearing none, thank 11 you very much, Jeremy. Keep up the good work. 12 MR. TROUTWINE: All right. Thank 13 you. 14 MS. GARNER: Thanks, Jeremy. 15 CHAIRMAN BURROW: All right. Next on the agenda, we're going to do the --16 17 MS. GARNER: GDC. 18 CHAIRMAN BURROW: -- update from 19 Deanna. 20 MS. GARNER: Before we get to the 21 Legislative Updates, I do want to circle back to 22 the grantee that withdrew that we awarded funding 23 to, 98,000. So, because this is still in that

1 same fiscal year that we awarded in October, 2 there is an ability to take that and do something 3 with it. 4 My suggestion would be to look at the 5 grantees that we awarded funding to that did not 6 receive the full amount they requested and see if 7 we want to possibly award them that additional funding that's now available. 8 Those two grantees 9 were CT Polymers and Indiana Shingle Recycling. 10 So, I can give a brief overview, too, of their projects. CT Polymers was purchasing 11 12 additional equipment, quite a bit of equipment, 13 to be able to create plastic pellets from 14 recyclable materials and being able to better 15 shred the fines of the plastic film. The 16 expansion was expected to have ten to twelve 17 full-time employees, an additional 10,000 tons 18 per year of recycled plastics, scrap plastics, 19 PEPT and PET. 20 Indiana Shingle Recycling, if you recall, 21 is the shingle recyclers, so they were also 22 looking for equipment to better process and 23 recycle the shingles, shredder feed and discharge

1 feed hopper. Indiana Shingle Recycling asked 2 for 495,000 and we awarded them the remaining 3 that we had of 360,213. 4 And I apologize I don't have more notes 5 for you guys on all of this. This was very --6 like I found out yesterday, basically. СΤ 7 Polymers was awarded the five hundred that -- or requested five hundred thousand and was awarded 8 9 three hundred thousand. 10 MS. WHITEHEAD: And you probably --11 MS. GARNER: So, I can --12 MS. WHITEHEAD: Do you have any 13 updates from either of them? Probably not yet, 14 huh? 15 MS. GARNER: Not yet. CT Polymers is ready to go and purchase everything. 16 They're 17 just waiting on the grant execution, so they're 18 excited to --19 MS. WHITEHEAD: Yes. 20 MS. GARNER: -- move forward on the 21 project, I know. 22 MR. LUTZ: So, you're asking -- so, 23 you're asking to take the moneys that was

1 awarded -- was it \$98,000? 2 MS. GARNER: Ninety-eight thousand 3 nine hundred and ninety-two, to be exact, yeah. 4 MR. LUTZ: Okay. And then reallocate 5 them to these two that had already been awarded, 6 but just up their kitty? 7 MS. GARNER: That's my suggestion. 8 The Board can --9 MR. LUTZ: Okay. 10 MS. GARNER: -- I mean the Board can even look at other ones that weren't awarded, but 11 12 that --MR. LUTZ: That would -- okay. 13 14 MS. GARNER: -- would be kind of 15 complicated at this point. 16 MR. LUTZ: What --17 MS. WEGER: There were only two that 18 didn't --19 MS. GARNER: Get their full amount 20 requested, yeah. MR. LUTZ: So, I'd make a motion that 21 22 we split the available funds in half. 23 MS. GARNER: Or you guys can also do

1 the full funds to one or the other. 2 MR. LUTZ: I will make a motion to 3 split and give each one half. 4 CHAIRMAN BURROW: I have a motion by 5 Mr. Lutz to split the available balance in half 6 and award half to CT Polymers and half to Indiana 7 Shingle Recycling; correct? 8 MR. LUTZ: Yes. 9 MS. HACKMAN: Second. 10 CHAIRMAN BURROW: Second by 11 Ms. Hackman. Any questions, discussion? 12 (No response.) 13 CHAIRMAN BURROW: Hearing none, we'll 14 do a roll-call vote. 15 Ms. Weger? MS. WEGER: Yes. 16 17 CHAIRMAN BURROW: Ms. Hackman? 18 MS. HACKMAN: Yes. 19 CHAIRMAN BURROW: Mr. Guerin? 20 MR. GUERIN: Yes. 21 CHAIRMAN BURROW: Mr. Lutz? 22 MR. LUTZ: Yes. 23 CHAIRMAN BURROW: Ms. Whitehead?

1 MS. WHITEHEAD: Yes. 2 CHAIRMAN BURROW: Ms. Wesseler-Henry? 3 (No response.) 4 MS. GARNER: She is on there. 5 CHAIRMAN BURROW: Or Mr. Gratz? 6 MR. GRATZ: Yes. 7 CHAIRMAN BURROW: Thank you. And Mr. Nunan? 8 9 MS. GARNER: He had to leave. 10 CHAIRMAN BURROW: All right. We 11 don't have Tara's vote, but hearing that, we have 12 a unanimous vote to pass the motion as presented. 13 So, thank you very much, Craig. 14 MR. LUTZ: You're welcome. 15 CHAIRMAN BURROW: Thank you, Deanna. 16 We want to make our money used as appropriately 17 as possible. 18 MR. LUTZ: Yes. 19 MR. GUERIN: Mr. Chairman? 20 CHAIRMAN BURROW: Yes. 21 MR. GUERIN: I'm not sure -- I can't 22 recall whether I was allowed to vote on Indiana 23 Recycle -- or Indiana Shingle Recycling or not.

1 CHAIRMAN BURROW: If you were -- if 2 you did recuse yourself at that primary vote, 3 then we need to strike your vote from the record. 4 MR. FRENCH: Mr. Guerin is excluded 5 from Shingle -- from Indiana Shingle Recycling. 6 I was? MR. GUERIN: 7 MR. FRENCH: You were. MR. GUERIN: But not the other. 8 9 CHAIRMAN BURROW: Do we need to do 10 anything on a formal -- more formal basis, 11 Deanna, to strike his vote? 12 MS. GARNER: Yes, yes, yes. We have 13 not had to strike a vote before, so just do it 14 again. 15 CHAIRMAN BURROW: So, we just need to 16 do another motion, please. 17 (Discussion off the record.) 18 MR. LUTZ: Do you want to -- before 19 we -- can you review anybody -- of the two that 20 were recused so we do it right the first time? 21 MR. FRENCH: As in review who has 22 been recused? 23 MR. LUTZ: Recused of both of these.

1 MR. FRENCH: I'd have to go and look 2 at individuals. So, if anybody has a question, 3 let me know. Terry, I can tell you, for Indiana 4 Shingle, is recused. 5 MS. GARNER: I'm looking at my -- I'm 6 pulling up my notes. 7 MR. FRENCH: Yeah. MS. GARNER: It's taking me a long 8 9 time. 10 MR. FRENCH: If -- you have a master list of who was excluded? 11 12 MS. GARNER: Yeah. 13 MR. FRENCH: Okay. 14 MS. GARNER: Yeah. So, Indiana 15 Shingle Recycling, Terry was the only one, and 16 then CT Polymers, there was none --17 MR. LUTZ: Good. 18 MS. GARNER: -- no recusals. 19 MR. LUTZ: Good. So, we need to --20 do I need to make a motion to revote, or do we 21 just --22 MS. GARNER: Or do a motion to 23 strike.

1 CHAIRMAN BURROW: We have to make a 2 motion to -- we can make a motion to strike. 3 MR. LUTZ: I'll make a motion to 4 strike the previous vote. 5 CHAIRMAN BURROW: Do I have a second? 6 MS. HACKMAN: Second. I seconded 7 that. 8 CHAIRMAN BURROW: Okay. I think we 9 can do all in favor, aye. 10 MS. WHITEHEAD: Aye. 11 MS. HACKMAN: Aye. 12 MR. GRATZ: Aye. 13 MS. WESSELER-HENRY: Aye. 14 MR. GUERIN: Aye. 15 MS. WEGER: Aye. 16 MR. LUTZ: Aye. 17 CHAIRMAN BURROW: And any opposed? 18 (No response.) 19 CHAIRMAN BURROW: Hearing none, the 20 previous motion has been stricken. Do I have a 21 new motion? 22 MR. LUTZ: I'll make a motion, second 23 motion, to split the available funds evenly

between CT Polymers and Indiana Shingles. 1 2 CHAIRMAN BURROW: And do I have a 3 second? 4 MS. HACKMAN: Second. 5 CHAIRMAN BURROW: Thank you, Ms. Hackman. 6 7 Any other discussion? 8 (No response.) 9 CHAIRMAN BURROW: Roll-call vote. 10 Ms. Weger? MS. WEGER: Yes. 11 CHAIRMAN BURROW: Ms. Hackman? 12 13 MS. HACKMAN: Yes. 14 CHAIRMAN BURROW: Mr. Guerin is going 15 to recuse himself. 16 MR. LUTZ: Yes. 17 CHAIRMAN BURROW: Mr. Lutz? 18 MR. LUTZ: Yes. 19 CHAIRMAN BURROW: Ms. Whitehead? 20 MS. WHITEHEAD: Yes. 21 CHAIRMAN BURROW: Mr. Gratz? 22 MR. GRATZ: Yes. 23 CHAIRMAN BURROW: Ms. Wesseler-Henry?

r	
1	MS. WESSELER-HENRY: Yes.
2	CHAIRMAN BURROW: And Mr. Nunan is
3	off, and I vote yes. With that, the motion
4	carries unanimously.
5	MR. LUTZ: Yes.
6	CHAIRMAN BURROW: Thank you. Thank
7	you, Craig.
8	Thank you, Terry, for pointing that out.
9	Now we have the Legislative Updates.
10	MS. GARNER: Okay. I did include
11	this in your Board packet, if you got a chance to
12	see it. If anybody wants a copy of it, I kind of
13	made a summary, so I don't know if you want to
14	pass those around, but there are a couple of
15	bills out there this session that do affect the
16	Board, so I just wanted to give you guys a brief
17	update on those.
18	House Bill 1026 does change the expiration
19	date of Board member terms, clarifies language on
20	per diem, mileage, and travel expenses. Nothing
21	changes regarding those. You are all eligible
22	for those as a side bar. Nobody right now is
23	claiming expenses, but at any time, if you want

1 to claim expenses, please reach out to me and we 2 can get the appropriate paperwork in place to get 3 the reimbursement started. 4 And then the one note of interest in the 5 House Bill 1026 is that the Board meetings will 6 take place at the offices of the Chairperson, and 7 they struck out where they could take place at either the Lieutenant Governor's Office or 8 9 Commissioner of the Department of Environmental 10 Management's offices. 11 So, I brought that up to our legislative 12 liaison. It did pass in the House already with 13 this language in it, so there is a chance in the 14 Senate for amendments to take place, but he 15 didn't feel too confident that that may happen, so that's just something moving forward that we 16 17 would be looking at possibly Bruce Burrow hosting 18 us in future meetings. 19 (Laughter.) 20 MS. HACKMAN: How about your living 21 room? 22 MS. WEGER: So, that would be every 23 meeting?

1 MS. GARNER: Every meeting, exactly. 2 MS. HACKMAN: And it says "will," not 3 "can." 4 MS. GARNER: No -- yeah, exactly. 5 It's very -- like doesn't give another option in 6 this, the way --7 MS. HACKMAN: That is just --MS. GARNER: -- that the language is 8 9 It's very interesting. Obviously -stated. 10 CHAIRMAN BURROW: Unfortunately --MS. GARNER: -- it'd be like --11 12 CHAIRMAN BURROW: -- we're going --13 MS. GARNER: -- Rumpke or, you 14 know --15 CHAIRMAN BURROW: -- to have to submit another grant request to build a bigger 16 17 conference room. 18 (Laughter.) MS. GARNER: But I found it very 19 20 interesting. I don't know -- I don't know what 21 they were thinking when they threw that in there. 22 I didn't get any feedback from the authors or 23 anything, so --

ſ	
1	MS. HACKMAN: And that's just
2	specifically this Board? It's not all of the
3	boards?
4	MS. GARNER: Correct, specifically
5	this Board. This bill goes through a bunch of
6	the different boards and administration and makes
7	a lot of these changes, but this particular one's
8	specific to the Board.
9	And then just to point out, too, that the
10	term like they've changed that language so
11	that four members would expire December 31st,
12	2025, four members then in 2027, and it says as
13	the Governor determines, determined by the
14	Governor.
15	So, I'm still kind of reaching out to them
16	and trying to figure out what that means for your
17	terms that expire this July, and how to determine
18	which four are going to be, you know, expiring in
19	2025, and are we still renewing things from
20	this there's a lot of questions around how
21	we're going to implement that new change that I
22	don't have answers to yet, so
23	MS. WHITEHEAD: And that nobody asked

you about? 1 2 MS. GARNER: Oh, no, no, this was 3 not -- this was definitely brought to my 4 attention after the fact, and actually it was 5 brought to my attention because of the fiscal 6 impact -- asking about fiscal impact of the per 7 diem and travel expenses, and the other things was upon my review of it at that point. 8 9 So, any questions regarding House 10 Bill 1026 before I move on to the --11 MS. HACKMAN: Yeah. Who sponsored 12 this? 13 MS. GARNER: You know, I don't know. 14 MS. HACKMAN: It's not one of us; 15 right, someone that sits on our Board, I mean? 16 MS. GARNER: No, it was nobody that 17 sits on the Board. It was not a name I was 18 familiar with. 19 MS. HACKMAN: Okay. I can look it 20 That's fine. up. 21 MS. GARNER: Okay. 22 MS. HACKMAN: Silly me, I thought you 23 had -- you'd know off the top of your --

1 MS. GARNER: Sometimes I do. 2 MS. HACKMAN: -- head because they 3 call and talk to you. 4 MS. GARNER: Oh. 5 MS. HACKMAN: I guess you wouldn't --6 MS. GARNER: I just know from our 7 legislative liaison, and it was authored by 8 Rep. Karen Engleman, co-authored by Rep. Kyle 9 Pierce, Pat Boy, and Edward DeLaney. Yeah, if 10 you guys want to reach out to them, too, and 11 express your concern about that. 12 So, the next bill that affects the Board, 13 and this is just fine, House Bill 1278 repeals 14 the Indiana Code where the Office of Energy has 15 to consult the Board on the revolving loan 16 program and grants. So, they came to that last 17 meeting to consult with us; right? So, they're 18 just being proactive and having that like removed 19 from statute. So, that's fantastic. 20 Oh, the last kind of legislative update 21 will transition us into the next agenda item, and 22 Bruce, if you want me to move on. 23 CHAIRMAN BURROW: Sure.

-	
1	MS. GARNER: So, everybody's probably
2	wondering about legislation regarding the Central
3	Indiana Waste Diversion Project. We were told
4	that there would hopefully be an amendment this
5	session regarding those to clarify those
6	conflicts of language, and there has not been any
7	bills or amendments made this session, and we
8	don't well, I think it's too late at this
9	point to submit any of that.
10	So, the Board is left with interpreting
11	the language as is. So, the so, what I'd like
12	for us to discuss briefly is those two major
13	conflicts of timing and then the amount allowed
14	for disbursement; right? So, if you recall,
15	there was it says two years or was it a
16	year after award that the next round will
17	commence? I am comfortable with saying that we
18	are working on that next round, we're working on
19	the paperwork. It is commencing, but we can
20	stick to that time line that's also in the
21	language of allowing applications open in July,
22	with a review by IDEM and recommendations
23	provided to the Board in December.
l	Į

_	
1	So, those two would be this year, 2024.
2	You guys would receive those recommendations in
3	December, and we don't have the next Board
4	meeting until end of January, beginning of
5	February, and that's when we would then award
6	the next round of waste diversion projects would
7	be the 2025 first meeting in 2025. But I'm
8	open to discussions if you want, or interpret
9	that language otherwise.
10	CHAIRMAN BURROW: What's the pleasure
11	of the Board?
12	MS. WHITEHEAD: I think if you are
13	comfortable with it, because it's you and your
14	staff that have to work on it, I'm good with it.
15	MS. GARNER: The one thing with that
16	July through December is it's pretty set in
17	stone, so, yeah, even if we're not comfortable
18	with it, we'll make it work. The October is
19	the deadline for submitting. I didn't throw that
20	deadline in there, but that's also written into
21	the statute that we'll accept applications
22	through.
23	MR. LUTZ: Oh, July to October
L	L

1 MS. GARNER: July through October. 2 MR. LUTZ: -- is when it -- open in 3 July, closed in October. 4 MS. GARNER: Yeah. 5 MR. LUTZ: Then it comes to --6 MS. GARNER: We have them and we 7 review them until December. 8 MR. LUTZ: Until December. 9 MS. GARNER: December is when we have 10 to provide recommendations. 11 MR. LUTZ: Then you provide -- then 12 it -- so, then once you provide recommendations 13 in December, it'll come to -- it'll come to the 14 Board? 15 MS. GARNER: (Nodded head yes.) 16 MR. LUTZ: And then on -- in the 17 Januaryish 2025 meeting is when we'll have the 18 full-blown meeting specifically to the Central 19 Indiana Waste Diversion Round 2 projects to 20 review; yeah? 21 MS. GARNER: (Nodded head yes.) 22 MR. LUTZ: Okay. Do you need a 23 motion?

1 MS. GARNER: I don't think so. 2 MR. LUTZ: Okay. 3 Yeah. Then -- so, then MS. GARNER: 4 if you guys -- any discussion else on that? Ι 5 think that's kind of straightforward. 6 CHAIRMAN BURROW: As long as we're 7 not having a meeting at my office. 8 (Laughter.) 9 MS. GARNER: I can't tell you whether 10 that will be or not. 11 MS. WEGER: Is there office space for 12 lease here? 13 (Laughter.) 14 MS. GARNER: I did wonder if you 15 could -- if we could maybe do some sort of partnership or something and -- I don't know. 16 17 We'll have to look into it. 18 CHAIRMAN BURROW: Well, I may have to 19 step down and make Terry Chair --20 (Laughter.) 21 CHAIRMAN BURROW: -- if we're going 22 to have it at my house. 23 MS. GARNER: So, the second part, of

1 course, was the funding conflicts. I sort of 2 read the language again. At one point in the 3 bill it says that the Board may use funds 4 allocated but not used in a previous round of 5 grants --6 MR. LUTZ: Right. 7 MS. GARNER: -- to award grants to applicants in a subsequent round, but then it 8 9 goes on to say to implement the second round of 10 grants described in this chapter, the Board shall 11 award not more than a total of two million 12 dollars. 13 MR. LUTZ: Because at the one time we 14 were talking about there was available -- of the 15 initial four million, there was a million left 16 over, that we thought that this two million was 17 actually going to balloon up to three million --18 MS. GARNER: Right. 19 MR. LUTZ: -- and then it was like 20 the amendment was -- or the question was, is can 21 you give that, and we were -- the kind of thought 22 was -- but because they did not change, it's 23 still two million max. Is it back to the two

million? 1 2 MS. GARNER: It's up to your 3 interpretation of what that says, like if -- if 4 that's the final word, that it says not more than 5 two million, or if that's --6 MR. LUTZ: I don't -- yeah. 7 MS. GARNER: -- not more than two million plus what was from the subsequent round. 8 9 MR. LUTZ: Right. 10 MS. GARNER: And to clarify with what 11 happened with the subsequent round, we also had 12 the one withdraw. So, we --13 MR. LUTZ: Yeah. 14 MS. GARNER: -- had 1.7 million left 15 on the table from the subsequent round --16 MR. LUTZ: Yeah. 17 MS. GARNER: -- or the previous --18 MS. WEGER: Can you read the language 19 again? 20 MS. GARNER: Yes, yeah. It says, the 21 first part, use funds allocated but not used in 22 previous round of grants to award grants to 23 applicants in a subsequent round. Then it says

1 to implement the second round of grants described 2 in this chapter, the Indiana Recycling Market Development Board shall award not more than a 3 4 total of two million dollars to applicants. 5 MR. LUT7: Wow. 6 MS. WEGER: I can interpret that as 7 being the second pot of money, the second round. MS. HACKMAN: Yeah. I think --8 9 MR. GUERIN: Well, what if we just 10 took the first interpretation and --11 MS. HACKMAN: Stopped at that. 12 MR. GUERIN: -- see what happens? 13 MS. WHITEHEAD: That's what I -- I 14 agree with that, because I think that's how I 15 felt. I don't know about you all, but I think we 16 all kind of felt at the end of that grant round 17 that we would be able to grant that money to 18 someone else because --19 MR. GUERIN: If we --20 MS. WHITEHEAD: -- we hadn't used it. 21 MS. WEGER: And that -- but that first piece of language, I think, is very clear. 22 23 MS. WHITEHEAD: Yeah.

1 MS. HACKMAN: Yeah. 2 MS. WEGER: So, I think the second 3 piece is maybe just less clear. 4 MS. WHITEHEAD: Yes. MR. WODRICH: It muddies it for sure. 5 6 (Laughter.) 7 MS. GARNER: And I guess one thing that we can take into consideration, and Bruce 8 9 can speak on this, is we did have a meeting with 10 the bill authors, and you can say what -- you 11 know, their intent and what --12 CHAIRMAN BURROW: Well, their intent 13 was to get the language changed, and that 14 obviously didn't happen, but they were very much 15 in agreement with our concerns and our request to 16 change. It's just for whatever reason, in 17 legislature changes don't always get made. 18 MS. WEGER: Well, I think that's 19 helpful to understand the original intent. I 20 would interpret it meaning we can allocate those 21 remaining funds the next round. 22 MS. WHITEHEAD: Period. 23 MS. WEGER: (Nodded head yes.)

1 (Discussion off the record.) 2 CHAIRMAN BURROW: Is there anyone 3 that we should check with, Deanna, to make sure 4 we don't get our hand slapped going down the 5 road? 6 MR. LUTZ: Mr. French? 7 MR. FRENCH: We could definitely check with our rules team and Office of Legal 8 9 Counsel to double-check on this for sure, yeah. 10 MS. GARNER: So, I mean the last feedback we received from you guys was to let the 11 12 Board determine this; right? 13 MR. FRENCH: I mean yeah, I would be 14 content with that. You know, we can ask Nancy, 15 because she's usually the rules person within 16 OLC, just to make sure that she's on board with 17 it, but yeah. I -- I honestly am not a 18 rules-specific attorney, that's not something 19 I've done in the past, but I don't see any issue 20 with what you guys have said with using the 21 original interpretation. That said, I, you know, 22 wouldn't know why not to. So, you know --23 MR. LUTZ: Just like throwing the red

1 flag and --2 CHAIRMAN BURROW: Pat? 3 MS. DANIEL: I was going to say, 4 Deanna, if you talk to rules, that second part, 5 where it says no more than two million, it says 6 per this chapter; right? 7 MS. GARNER: Yeah. MS. DANIEL: Okay. Is the other 8 9 language in a different chapter? And I think 10 that's what a rule writer -- or a rule 11 interpreter would look at. If that's in a 12 different chapter and if that language 13 specifically says as per this chapter, then we 14 could include the two; you know what I mean? 15 MS. GARNER: So, yeah, the first one's in IC 13-20-26. They're both in --16 17 MS. DANIEL: Are they both in the 18 same chapter? 19 MS. GARNER: -- 26, and then I don't know what two and three is. I think those are 20 21 I think the chapter is 26; right? subsets. 22 MR. FRENCH: Yes. 23 MS. GARNER: Okay. So, yeah, they

1 are in the same chapter. 2 MS. DANIEL: They are in the same 3 chapter? 4 MS. GARNER: Yes. 5 MR. LUTZ: Red flag. 6 MS. GARNER: All right. Well, what 7 I'm hearing is that the Board would like to use those funds --8 9 MR. LUTZ: Yes. 10 MS. GARNER: -- pending that rule 11 says that we can do that. 12 CHAIRMAN BURROW: That's our 13 understanding, yes. MS. GARNER: All right. We will go 14 15 ahead, then, and I will follow up with the rules 16 and legal and make sure that we can still go 17 forward, but -- okay. 18 So, at the next Board meeting, we will be 19 approving the application and guidelines for both 20 RMDB grants and the Central Indiana Waste 21 Diversion grants so that I can have those ready 22 for July to post. I definitely appreciate you 23 guys' feedback at any time, comments, anything

1 that you thought from last year. I'll go ahead 2 and send out copies of the previous forms so that 3 you can have them, but anything that you'd like 4 to see different that maybe you didn't feel 5 worked out very well last time that I can 6 incorporate in the new version is helpful to me. 7 Bruce and I had a short conversation about 8 applications versus proposals, even. Sometimes 9 we have troubles with applications and boxes to 10 fill out, because people do the bare minimum in 11 those boxes, as we've seen in the last round of 12 grants, except for this -- this language says 13 specifically that they must be providing 14 applications for the Central Indiana Waste 15 Diversion Project. So, just -- that we can make sure that those are completed and we're getting 16 17 the information we want. I know last time we 18 asked for a lot of additional information. 19 CHAIRMAN BURROW: Deanna and our --20 my conversation more centered around, you know, 21 rewarding the applicant for providing a thorough 22 and complete application in -- somehow in our

23

scoring matrix, and --

ſ	
1	MS. GARNER: And so, that, for RVP,
2	I'm looking at that. The issue that arises with
3	the Central Indiana, and maybe the Board can
4	speak on this, too, we didn't do scores for the
5	Central Indiana Diversion Project, because it
6	just says that the IDEM provides recommendations.
7	So, we looked at them and we provided what we
8	have liked about them and what we've disliked
9	about them, concerns we had, and then we let the
10	Board make those determinations based on that.
11	If you want to see you know, if you
12	guys want to do the scoring, I can try to put
13	something together, but the IDEM won't be scoring
14	it, it would just be the Board still. But yeah,
15	that's something else that we have encountered
16	with the in working within what's in the
17	legislation.
18	CHAIRMAN BURROW: Well, somehow I
19	hope that we can get applications, that people
20	realize they're receiving grant funding. They
21	should be able to submit a detailed request so
22	that you guys aren't chasing them around and
23	calling them, you know, five or six times to get
l	<u>I</u>

1	a document.
2	MS. GARNER: Right. And that is a
3	continuing discussion that we have within our
4	offices as well is at what point are we like just
5	saying, "It's an incomplete application," and
6	tossing it; right? We want these projects to be
7	successful and we want to award funding, so we do
8	help them along the process, but we also can't
9	constantly handhold them.
10	MR. LUTZ: Yeah.
11	MS. GARNER: So, it's a balancing
12	line between those two things, because at some
13	point you have to just say, "Hey, you're not
14	eligible. This is not a complete application."
15	MS. HACKMAN: You have a checklist;
16	right; to try to
17	MS. GARNER: We do, yeah. A lot of
18	times there's never even from the get-go, I
19	mean we'd eliminate 60 percent of our applicants
20	if we just relied on that checklist.
21	MS. HACKMAN: That's what a lot of
22	the grant applicants do I mean, you know
23	MS. GARNER: Yeah.

1 MS. HACKMAN: -- grants do, so --2 MS. GARNER: I know. 3 MS. HACKMAN: -- they don't give you 4 second chances. 5 MS. GARNER: I know. 6 MS. WHITEHEAD: And this year you'll 7 have two sets of grants to --MS. GARNER: Yes. 8 9 MS. WHITEHEAD: -- review, so --10 which makes your time even more valuable. So --11 MS. GARNER: Yeah. 12 MS. WHITEHEAD: -- I would be strict 13 on if they don't have everything that's supposed to be in there, yeah. 14 15 CHAIRMAN BURROW: I agree with Sandy. I think there's a point in time where we have to 16 17 tell the children, "No," and --18 MR. WODRICH: Quite honestly, 19 though --20 MR. LUTZ: "No candy for you." 21 MR. WODRICH: -- the 1012 also does 22 talk about, you know, you can reopen a second 23 round if you don't like the project proposals you

1 get or if people don't fully complete it, then, 2 yeah. You know --3 MS. GARNER: That is --4 MR. WODRICH: -- you can be more 5 strict about it and say, "Well, try next time," 6 if there is a next time. 7 MS. WHITEHEAD: I mean we get a nice group of selections; right? I mean --8 9 MR. WODRICH: Yeah. 10 MS. WHITEHEAD: -- there are a lot of 11 good grants that come in. 12 MS. HACKMAN: Uh-huh. And some --13 MS. WHITEHEAD: So, why pull your 14 hair out if --15 MS. HACKMAN: And some we don't get to give to them because there wasn't enough 16 17 money, so --18 MS. WHITEHEAD: Yeah. MS. HACKMAN: -- that may have done 19 20 everything right, but --21 MS. GARNER: I mean this last RMDP grant round, honestly, the quality of the 22 23 applications as they came in, we probably would

1 not have had two million ineligible to award if I 2 had just tossed them out at the very beginning 3 when they were submitted. It's -- yeah, it's not 4 something you guys get to see, but the process of 5 applications and people, the work they put into 6 them, is always kind of disappointing when they 7 come through. 8 MS. WHITEHEAD: Well, that's crazy. 9 That's just crazy. 10 MS. GARNER: It -- from my 11 background, yeah, it is, because you're trying to 12 give money --13 MS. WHITEHEAD: Yeah. MS. GARNER: -- right? So, you'd 14 15 think there'd be some quality control in what 16 you're applying, and we have the -- we provide 17 the checklists and other things, so --18 CHAIRMAN BURROW: How can we help 19 Deanna and staff, you know? 20 MR. LUTZ: That's -- it's a slippery 21 slope; right? 22 MS. GARNER: Yeah. 23 MR. LUTZ: I mean the balance between

1 coaching --

1	coaching
2	CHAIRMAN BURROW: Right.
3	MR. LUTZ: to consulting or
4	CHAIRMAN BURROW: Uh-huh.
5	MR. LUTZ: you know, and yet you
6	do not want to discourage, because we want to
7	keep this process going, and in order for the
8	process to going [sic], we have just like, you
9	know, material, we have to have infeed, you have
10	to have inbound material. So, it's kind of a
11	we want to give moneys out, and in order to give
12	moneys out, we've got to get that, yet we
13	don't you know, simple errors and omissions we
14	can coach through, but
15	CHAIRMAN BURROW: Blatant disregard
16	for requests.
17	MR. LUTZ: Yeah, for the rules and
18	the regulations, that's where it's kind of like
19	that yeah, where is that fine line? I don't
20	know.
21	MS. WEGER: Deanna, is there
22	MR. LUTZ: Job security, I guess, I
23	felt for Deanna.
L	

1 MS. WEGER: -- is there any kind of 2 like an on-line Webinar in advance of the 3 application? 4 MR. LUTZ: "Here's what good looks 5 like," yeah, that's --6 MR. WODRICH: Yeah, we did do that 7 last time for the --MS. GARNER: The Central Indiana ones 8 9 we did --10 MR. WODRICH: Yeah. 11 MS. GARNER: -- do the on-line, and 12 we had very few questions. It was very 13 disappointing as far as people seeking guidance. 14 We don't do one for RMDP, we just have the 15 guidelines out there, and that is worth considering. 16 17 MR. LUTZ: Is -- could I -- could you 18 put like best in class, "This is what great looks 19 like, this is what good looks --" and use other 20 ones that got full, or is that a kind of a 21 confidentiality type --22 MS. HACKMAN: Well, you can make one 23 "This is what we would like." up,

1 MR. LUTZ: Okay. There you go. 2 MS. GARNER: That's the best way to 3 do it, yeah. 4 MR. LUTZ: Okay. 5 MS. GARNER: If we got permission --6 I mean pretty much the applications, for the most 7 part, are in the public domain, because it happens at a public meeting and all of these 8 9 other things. 10 MR. LUTZ: Are they easy to get to? 11 So, sometimes they're kind of like hidden, 12 hidden, hidden. 13 MS. GARNER: Yeah. No, we don't post 14 them anywhere, and we make people do a public 15 request for information to get a sample one at this point. 16 17 MR. LUTZ: Yeah, that would be --18 might be -- yeah, they're there; however, you've 19 got to the dig through and go through, so it's 20 like --21 MS. GARNER: But I think having a 22 sample --23 MS. HACKMAN: Kind of like --

1 MS. GARNER: -- is the best. 2 MS. HACKMAN: -- in this box you 3 should explain, you know, just like, you know, 4 numbers or where you're going to get your 5 material or, you know --6 MR. WODRICH: I would say having a 7 good sample is probably sufficient enough. Ι don't know that you need to say like, "This was a 8 9 terrible one." 10 (Laughter.) 11 MR. WODRICH: But I think if there's, 12 you know, a really good project proposal that you 13 guys, Deanna --14 MS. GARNER: Yeah. 15 MR. WODRICH: -- and the Board has 16 seen, then --17 MS. GARNER: Yeah. 18 MR. WODRICH: -- you would like, you 19 know --20 MS. HACKMAN: Or you could have bits 21 and pieces from the cover, you know, just to make 22 a sample. 23 MS. GARNER: Yeah, yeah, I can look

1 into that. 2 MS. WHITEHEAD: So, you said you'll 3 send the current guidelines to us so we can look 4 at them? 5 MS. GARNER: Yeah, yeah, I'll do 6 that. 7 That might be good to MR. WODRICH: add to the discussion, too, as sort of what you 8 9 guys on the Board might be wanting to see as 10 well, especially for the Central Indiana Waste --11 MS. GARNER: So, the -- I mean --12 MR. WODRICH: -- Diversion Project. 13 MS. GARNER: -- they'll have the --14 actually a review of the guidelines at the next 15 meeting. 16 MR. WODRICH: Right. 17 MS. GARNER: So, any feedback in 18 advance, just sending me an e-mail, and I'll 19 definitely send out my guidelines. Instead of 20 doing the two weeks with the Board packet, I'll 21 set a goal to send it out a little bit earlier. 22 MS. HACKMAN: The guidelines for the 23 grants?

1 MS. GARNER: The drafts of the 2 guidelines for both grants. 3 MS. HACKMAN: The sooner the better, 4 as far as --5 MS. GARNER: Yeah. 6 MS. HACKMAN: -- I'm concerned. 7 MS. GARNER: Yeah. 8 MS. HACKMAN: Two weeks is 9 probably -- you know, if you could do it 10 tomorrow, I'd be -- this afternoon would be good. 11 (Laughter.) 12 MS. GARNER: Okay. I don't have them 13 yet, but yes, I'll look into sending them early 14 is what I'm saying. 15 MR. LUTZ: I think coloring books 16 work well. 17 (Laughter.) 18 CHAIRMAN BURROW: So, are you going 19 to put together a mock application with examples 20 of what's expected, or is -- we talked around 21 about a lot of ways to coach these people. MS. GARNER: Right. I can look into 22 23 trying to do that.

1 CHAIRMAN BURROW: Is that something 2 the staff can put together? 3 MS. WHITEHEAD: That's also --4 CHAIRMAN BURROW: Are you staff? 5 MS. GARNER: I'm staff. 6 (Laughter.) 7 MS. GARNER: This is why I'm --MR. WODRICH: The staff are the 8 9 people in the room. 10 MS. HACKMAN: I'm sure that you know 11 in the back of your head, you've probably got 12 some rolling around and saying, "That was a 13 really good application." 14 MS. GARNER: Yeah. 15 MS. HACKMAN: And you could just pick 16 theirs and change --17 MS. GARNER: Right. 18 MS. HACKMAN: -- words to protect the 19 innocent and all, you know, or something. 20 MS. GARNER: Yeah. 21 MS. WHITEHEAD: It also might be 22 better to do what you're saying, Debbie, and give 23 an explanation, because there are so many

1 different types of projects that, you know, 2 someone might look at that and go, "Well, that's not about what I'm doing, " you know. 3 4 MR. LUTZ: Yeah. 5 MS. WHITEHEAD: So, maybe explaining 6 what you want -- I mean I'm not saying -- I've 7 looked at the application before, I've filled out the application before, and it asks good 8 questions, and they're very straightforward --9 10 MS. GARNER: Yeah. 11 MS. WHITEHEAD: -- but I don't know, 12 maybe there needs to be some other kind of 13 explanation. 14 MS. GARNER: I think with the RMDP 15 grants, like I told -- I discussed with Bruce, 16 what I want to do is revise the scoring metrics 17 so that there is an explanation of -- like in 18 the 20 point category, like 15 to 20 means that 19 you provided this level of detail, this -- you 20 know, additional metrics within there, and then 21 provide those in the guidelines, so that -- we 22 tried -- so -- and just to say, we tried this 23 with community recycling grants last year, and it

1 was hit or miss. Actually it was effective, but 2 it's kind of what you're saying, "This is what -exactly what we're looking for, this is how we 3 4 will score it." If people cannot take the time 5 at that point to read --6 MR. LUTZ: Uh-huh. 7 MS. GARNER: -- that that we've provided them, then they kind of deserve the 8 9 scores they get; right? 10 MS. WHITEHEAD: I know the CRGP 11 applications was a lot more straightforward this 12 year and didn't have as much repetition. 13 MS. GARNER: Exactly, yeah. 14 MS. WHITEHEAD: The repetition is 15 kind of crazy sometimes in applications, and CRGP 16 was a lot better. 17 MS. GARNER: Yeah, yeah. We 18 worked -- the manager worked very hard to get 19 that streamlined and clear, and those metrics 20 were -- I mean they were -- I mean really, I got 21 to participate in scoring, and the metrics told 22 you more or less how to score. If they provide 23 this, this and this, it was like ten points, if

1 they didn't provide it, you know, nothing, you 2 know. 3 MR. LUTZ: Yeah. 4 MS. GARNER: And that did help some, 5 but it didn't help with the quality of the 6 applications. That's what's disappointing. Like 7 it just seems that some people don't read through the guidelines. 8 9 CHAIRMAN BURROW: As an example of 10 what she's -- the details she's looking for, it's 11 one applicant, "Describe your outreach program." 12 The answer was, "Yes." 13 (Laughter.) 14 MS. GARNER: Yeah, outreach, you 15 know, outreach to the public. That's literally 16 how they answered it, so --17 MR. LUTZ: An open-ended question --18 CHAIRMAN BURROW: Kind of mind 19 boggling. 20 MR. LUTZ: -- answered with a 21 closed-ended answer. 22 MR. WODRICH: Yeah. I mean it might 23 require -- I know that the Indiana Postal Zone

1	Package Program, they give out annual grants
2	every year, and they were having the same
3	difficulties. When I was at DNR, they got to the
4	place where they were doing like an annual grants
5	workshop in person to help people like make sure
6	that they're doing the things you're talking
7	about Deanna, not just saying "yes" to a question
8	that is not a yes-or-no answer; right? Like you
9	need to describe what you're planning to do for
10	that, so
11	MS. WHITEHEAD: And you did a
12	presentation at our association, our solid waste
13	district.
14	MS. GARNER: We very frequently,
15	yeah, worked with the Association of Solid Waste
16	Management Districts, with Circular Indiana when
17	they were doing stuff, when you know, we do
18	our best to get that out there as much as
19	possible when there's opportunity to present on
20	them, and we provide best practices on how to
21	fill out the applications.
22	MS. HACKMAN: So, is there any
23	correlation between the applicants themselves and

1 their quality? So, like the businesses, were 2 they good, the maybe local ones weren't so great? 3 Because I just know that there's one county that 4 their commissioner said, "You will apply for this 5 grant," and they didn't want to do it. 6 MS. GARNER: Right. 7 MS. HACKMAN: Guess who that was. 8 (Laughter.) 9 MS. GARNER: So, there's some 10 correlation, but it's not -- I wouldn't say it's 11 just local or it's just that -- it's like if they 12 have grant experience, if they have a grant 13 manager on staff, if they just have people who 14 are good communicators versus, you know, those 15 who don't often have to write a proposal or an application. 16 17 MS. HACKMAN: Someone that drove a 18 truck yesterday, and today they're told they --19 MS. GARNER: Right. 20 MS. HACKMAN: -- have to write a 21 grant. 22 MS. GARNER: Right. And you're 23 exactly right, that does happen where these

1 people have no idea of what they're getting into, 2 maybe they've never even written long paragraphs 3 since, you know, college or, you know, whatnot, 4 asked to provide these detailed explanations, and 5 you can see that, obviously, in some of them, but 6 it's not always like --7 MS. HACKMAN: You can't. 8 MS. GARNER: -- organizations, 9 businesses have that high quality and local 10 municipalities don't. It's kind of across the 11 board. 12 MS. WHITEHEAD: It's just people. 13 MS. GARNER: Yeah. 14 MS. HACKMAN: Just -- you know, we 15 address it with the Association, and I don't know if that was good or, you know, if that helped. 16 Ι 17 don't know what -- the Association in Indiana 18 counties, if we, you know, maybe suggest to them 19 to do some grant -- I mean not you, but somebody 20 to provide some grant-writing assistance or -- I 21 know the extension does it, they have a program. 22 MS. WEGER: I could imagine -- I mean 23 even if you offer an example with redacted

1 information of "Here's a good one," I don't think 2 that's enough. I think we would have to literally put a little call-up box, when it says, 3 4 you know, "Eight new employees," to say, "This is 5 good, this is a concrete number," and highlight, 6 you know --7 MS. HACKMAN: How do you get to the call-up box? You could have done that, too. 8 9 MS. WEGER: Well, yeah, I think 10 there'd be ways to make it also so somebody 11 doesn't have to do critical thinking, you know, 12 instead of reading through and interpreting like, 13 "What is it about this?" we can make it a little 14 clearer, "We're looking for numbers, we're 15 looking for lists, we're looking for, you know, more than 'yes.'" 16 17 MS. HACKMAN: Take a guess. This 18 would be wrong. MS. WHITEHEAD: So, I guess we'll all 19 20 try to give more input on the guidelines that you 21 send us and try to be more -- more critical 22 thinkers on it ourselves to see if there's 23 anything we can add.

1	CHAIRMAN BURROW: I think that's
2	exactly what Deanna was hoping to hear.
3	MS. GARNER: Yes, and I appreciate
4	that. And honestly, I know that means getting
5	those to you sooner than later, you know. I'll
6	keep that in mind as I'm working on them.
7	CHAIRMAN BURROW: Anything else,
8	Deanna?
9	MS. GARNER: It just crossed my mind
10	as far as things I'm working on, I know I didn't
11	give you guys an update on the state SWIFR
12	project, so it's we're still working on that
13	RFP to get that out there, working with DOA, so
14	it's been delayed. I didn't know DOA takes so
15	long to communicate with us and work with us.
16	So, I'm still working through that, but
17	I'll definitely make sure you guys are aware when
18	the RFP's go out, because I appreciate you guys
10	
	sharing that with anybody you think would be a
20	good consultant that can do those plans for us.
21	You know, the more applicants, the better quality
22	we get to choose from when we award that.
23	And then I still hope to kind of overlap

П

1 the two with the state plan and the local plans, 2 so hopefully like a year and a half in of the three year, we will still be reaching out to the 3 4 local communities to do -- start working on their 5 funding for local plans as well. So, yeah, I 6 don't think there's any other updates that I may 7 have forgotten about, so that's it. CHAIRMAN BURROW: So, at the next 8 9 meeting, will we then have designations with 10 regard to Board member terms? 11 MS. GARNER: I will keep you updated. 12 That stuff will have been to the Governor's 13 Office for review, and hopefully we'll have --14 CHAIRMAN BURROW: I'm just kind of 15 looking through. We've got the, you know, evaluations and then the scoring and then --16 17 MS. GARNER: Right. 18 CHAIRMAN BURROW: -- the awards, and 19 we're going to be, you know --20 MS. GARNER: Right at the end of 21 your --22 CHAIRMAN BURROW: Hopefully 23 everybody's going to stay on board.

1 MS. GARNER: I hope to have that to 2 you. 3 CHAIRMAN BURROW: Okay. 4 MS. GARNER: It's on the whims of the 5 Governor's Office. 6 CHAIRMAN BURROW: Thank you. 7 All right. Well, if there's no other -anyone have any other business that they want to 8 9 bring in front of the Board? 10 MS. HACKMAN: Does it -- since we 11 have to -- and this legislation, it says that 12 underneath where you've marked out, that we have 13 to have office of the chairperson at least once a 14 calendar quarter, so we wouldn't have to have all 15 of them at your office. We could have --CHAIRMAN BURROW: Well, we have to 16 17 have the Chairperson. MS. HACKMAN: -- take care of that. 18 19 Okay. 20 CHAIRMAN BURROW: Well, hearing no 21 other items, I guess the remaining 20 -- our next 22 meeting is April 25th; is that correct, Deanna? 23 MS. GARNER: Yes.

1	CHAIRMAN BURROW: And then we have
2	July 25th, October 24th. Hopefully it's going to
3	be a very busy year. I think there's a lot going
4	on. I mean I know you're busy, and I know
5	everyone's busy, but hopefully we get some
6	exciting new projects on in the works, with
7	all of the new technology out there. It's
8	getting exciting, particularly with the Central
9	Indiana Waste Diversion Programs.
10	MS. HACKMAN: Yeah.
11	CHAIRMAN BURROW: All right. If
12	there's no other well, if there's any public
13	comment from anyone on-line or anyone in the
14	room.
15	(No response.)
16	CHAIRMAN BURROW: Any words of wisdom
17	from Pat?
18	(No response.)
19	CHAIRMAN BURROW: Well, hearing none,
20	do I have a motion to adjourn?
21	MR. LUTZ: I'll make a motion to
22	adjourn.
23	CHAIRMAN BURROW: Do I have a second?

1 MR. GUERIN: Second. 2 CHAIRMAN BURROW: And all in favor? 3 MS. WHITEHEAD: Aye. 4 MS. HACKMAN: Aye. 5 MR. GRATZ: Aye. 6 MS. WESSELER-HENRY: Aye. 7 MR. GUERIN: Aye. 8 MS. WEGER: Aye. 9 MR. LUTZ: Aye. 10 CHAIRMAN BURROW: Aye. 11 Opposed? 12 (No response.) 13 CHAIRMAN BURROW: Hearing none, 14 motion carries unanimously. Thanks, everyone, 15 very much. 16 Thereupon, the proceedings of 17 January 25, 2024 were concluded at 11:11 o'clock a.m. 18 19 20 21 22 23
