

RE: Valle Vista Health System

To whom it may concern:

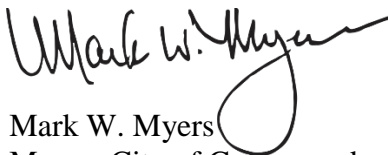

I am writing in support of the expansion of the Opioid Treatment Programs in Indiana, as authorized by 2017 legislation that expanded the number of OTPs in the state. I am writing to support Valle Vista's application to operate more of these facilities.

For almost 40 years, Valle Vista has been part of the substance use disorder provider network in Central Indiana, serving individuals in need of addiction care and mental health services from hospitalization through reintegration into the community. Collaboration and joining efforts with other community partners has proven to create a robust continuum of care, which is germane in reducing the impact of mental health conditions and addiction, reducing overdose and death rates, and helping thousands to regain their health and wellness.

Valle Vista Health System is focused on facilitating access to care for those in need, proving a stable presence and services that our community in Greenwood can trust. We can be more successful at our shared mission by working together.

City of Greenwood, trust Valle Vista Health System and encourage them to extend their services to other communities in our State.

Sincerely,

Mark W. Myers  
Mayor, City of Greenwood
