INDOT IS WORKING FOR YOU

Data is being collected in LRS for relocations. This process will be mirrored in the Buying area pending LRS enhancement

The plan:

Once the Title VI ADA Survey form information from relocation is entered into LRS, it will become a standalone tab in Buying. Our in-house staff will reach out to acquired property owners to ask them the survey questions. That way, this survey does not become part of the buying packet which is effected by record retention (becomes public information). The survey information will then be input into LRS and a report can be ran that will pull both buying and relocation surveys into one static report.
