Comprehensive Annual Financial Report

For the Fiscal Year Ended June 30, 2010

Introduction

Steve Russo
Executive Director

December 28, 2010

Dear Board Members:

It is with pleasure that we present the Comprehensive Annual Financial Report (CAFR) of the Indiana State Teachers' Retirement Fund for the fiscal year ended June 30, 2010.

About the Indiana State Teachers' Retirement Fund

The Indiana General Assembly created the Indiana State Teachers' Retirement Fund (TRF or the Fund) in 1921 as a pay-as-you-go Defined Benefit retirement system to provide pension and disability benefits to its members and/or their beneficiaries. Pay-as-you-go means that the State decided not to pre-fund the teachers' retirements through employee and employer contributions while the members were actively teaching. Instead, the State chose to appropriate money for the retirement benefits as they became due for payment. Upon reaching age and service eligibility requirements, members are entitled to a Defined Benefit payment based in part upon a formula that takes into account the member's age, years of service, and the average of the member's highest five years of salary.

Since its establishment, the laws governing the administration of TRF have changed and expanded in response to the needs of our members, employers, and citizens. In 1955, the Annuity Savings Account (ASA) was established in its current form, requiring a percentage contribution based on member salary. This benefit is currently funded by a 3% member contribution; however, by statute, employers are allowed to make the 3% contribution on behalf of the member. Members are immediately vested in their ASA. Upon retirement, members can withdraw their ASA balance in a lump sum or they can convert their balance into an annuitized amount that is added to their Defined Benefit.

The 1995 legislative session brought several significant changes to TRF. Legislation was passed that closed the pay-as-you-go plan (named the Pre-1996 Account) to newly hired members and created a new account named the 1996 Account. All teachers hired after June 30, 1995 would be members of the 1996 Account. This account was established to be actuarially pre-funded by requiring school corporations to set aside a fixed percentage of payrolls for teacher retirement benefits. Also, in 1995, the General Assembly passed legislation creating the Pension Stabilization Fund (PSF), designed to partially fund TRF's unfunded liability of the Pre-1996 Account. The PSF was initially funded from $425 million of employer reserves from the Pre-1996 Account and, since that time, has received contributions from the Indiana State General Fund, contributions from the Indiana State Lottery, and interest earned from the investment of PSF assets. As of June 30, 2010, TRF's combined net assets had a market value of $8.1 billion, of which $1.9 billion resides in the PSF.

A public referendum held in 1996 approved an amendment to the Indiana Constitution to allow the Fund to invest in equities. Since that time, the Fund has been able to diversify its asset classes and grow its asset base. Beginning in 1998, TRF members were able to select from expanded investment choices that included equities, thereby diversifying their ASAs.

In 2000, legislation established that TRF was no longer to be a state agency but an "independent body corporate and politic," meaning it is not a department or agency of the State, but is an independent instrument exercising essential government functions. Though TRF is under the authority of the Governor and the Office of Management and Budget (OMB), it is not under the jurisdiction or authority of the State Personnel Department or the Department of Administration. By Executive Order of the Governor, the Fund is under the jurisdiction of the State Ethics Commission.

Indiana Code establishes a six-member Board of Trustees to oversee TRF. Five trustees, two of whom must be members of the Fund, are appointed by the Governor. The sixth member of the Board must be a director of the budget agency or the director's designee.

In 2010, legislation required the boards of TRF and the Indiana Public Employees' Retirement Fund (PERF) to jointly appoint a common executive director and to cooperate to the extent practical and feasible in the investing of fund assets. In May 2010, the PERF and TRF Boards jointly appointed a common executive director to carry out the policies set by the Boards and to administer the Funds on a daily basis. In support of the Board and the executive director, TRF employed 41 full-time staff members as of June 30, 2010.

The Fund serves approximately 165,000 members and 394 employers. TRF provides a monthly benefit to approximately 45,000 retirees and maintains accounts for approximately 74,000 active members and 46,000 inactive members. Details about the demographics of TRF members can be found in the Statistical Section of this report.

Benefit Plan and Other Legislative Changes during Fiscal Year 2010

There were several changes that took effect during fiscal year 2010.

- PERF/TRF Administration - required the boards of TRF and PERF to jointly appoint a common executive director and to cooperate to the extent practical and feasible in the investing of fund assets.

- One-time Check – In lieu of a Cost of Living Adjustment (COLA), legislation provided a one-time check to members who retired before January 1, 2009. The amount of the one-time check ranged from $150 to $450 depending on a member's years of service and was to be paid to members no later than October 1, 2009.

- Divestment of Public Pension Investments – After the completion of certain actions, requires TRF to divest from companies that have certain business operations in states that sponsor terrorism.

- Annuity Savings Account (ASA) - Effective July 1, 2009, permits the Board to establish rules enabling the daily valuation of member ASA accounts and the collection of member ASA contributions from employers on a more frequent basis.

- Electronic Reporting - Effective July 1, 2009, requires employers to submit contributions and reports to TRF electronically.

- Non-forfeiture of the Defined Benefit upon ASA Withdrawal – Effective July 1, 2009, permits a member who has been inactive for at least 30 days and who has attained vested status to receive a distribution of his/her ASA without forfeiting his/her future Defined Benefit.

Management's Responsibility for Financial Reporting

TRF's management is responsible for the contents of this report and is responsible for establishing and maintaining a system of adequate internal accounting controls designed to provide reasonable assurance that transactions are executed in accordance with management's general or specific authorization. TRF's management is also charged with recording these transactions as necessary to maintain accountability for assets and to permit preparation of financial statements in accordance with generally accepted accounting principles. This system includes the written policies and procedures of the Board of Trustees.

For financial reporting purposes, TRF follows Governmental Accounting Standards Board (GASB) Statement No. 25, Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans. Assets of TRF are presented at fair value. The actuarial value of assets and the actuarial accrued liability are presented in the Required Supplemental Schedules following the Notes to the Financial Statements.

GASB issued Statement No. 34, Basic Financial Statements and Management's Discussion and Analysis for State and Local Governments. This Statement establishes financial reporting standards for state and local governments. The Management's Discussion and Analysis is contained within the Financial Section of this report and serves to supplement the Introductory Section of this CAFR, as well as financial statements, notes, and supplementary information within the Financial Section.

During the fiscal year ended June 30, 2010, TRF implemented GASB Statement No. 53, Accounting and Financial Reporting for Derivative Instruments.

Economic Condition

TRF's economic condition is based primarily upon appropriations from the Indiana State General Assembly, contributions from members and employers, and investment results. In fiscal year 2010, the State of Indiana met its funding obligations to the TRF Pre-1996 Account. The State provided all expected payments to Indiana school corporations, thus providing an added level of assurance that school corporations could meet their obligations to pay required employer contributions to the TRF 1996 Account. In fiscal year 2010, TRF received all required appropriations from the State of Indiana and received all required contributions from members and employers. TRF's cash flow remained strong in fiscal year 2010. Benefit payouts and fund administrative expenses exceeded contributions from employers and members by only $24 million. Strategic Investment Solutions, Inc. (SIS), TRF's primary investment management consultant, evaluated the impact of economic conditions on TRF's investments. SIS's report is located in the Investments Section of this report.

Investments

Fiscal year 2010 was a period of recovery from the turmoil of the prior year. The Defined Benefit (DB) assets returned a positive 14.3% net of fees. A common measure of investment performance is to compare a portfolio's actual return to its benchmark return. TRF's investment performance was not only better than the target benchmark for fiscal year 2010, but remains better than the benchmark return over the past three- and five-year periods.

Prudent diversification through strategic asset allocation is fundamental to TRF's overall investment policy. The policy is designed to provide an optimal mix of asset classes to meet TRF's long-term return objectives, while still minimizing risks. TRF continues to make progress in diversifying the mix of asset classes and adjusting its risk and return profile to deliver the earnings needed to meet benefit obligations. Detailed investment policies and performance results can be found in the Investments Section of this report.

Funding

An actuarial analysis of TRF is performed on an annual basis. In addition, an assumption experience study is performed every three to five years. The actuarial firm, Nyhart, completed the most recent annual actuarial analysis as of June 30, 2009. The assumption experience study was last completed in August of 2008. One of the purposes of the actuarial analysis is to measure the funding status, typically referred to as the funded percentage. The percentage is computed by dividing the actuarial value of net assets by the actuarial accrued liability. This ratio provides an indication of the funding status of the plan and, generally, the greater this percentage, the stronger the plan.

As discussed earlier in this letter, TRF is comprised of two separate accounts, the Pre-1996 Account and the 1996 Account. Each of these accounts is funded differently. Given that the Pre-1996 Account is funded on a pay-as-you-go basis from the State of Indiana, the funded percentage measurement is not as meaningful in measuring the strength of this account.

However, the application of the funded percentage to the 1996 Account is more meaningful, as this account is actuarially pre-funded by contributions from members and employers. The funded percentage of the 1996 Account is a healthy 93.1%. Another purpose of the actuarial analysis is to guide the Board of Trustees in the determination of the required contribution rate as a percent of payroll from employers. In fiscal year 2010, the required Defined Benefit contribution rate from employers for members in the 1996 Account was 7.0% of payroll.

Details of the actuarial analysis can be found in the Actuarial Section of the report. Supporting statistics can be found in the Statistical Section. In the Statement of Changes in Fiduciary Net Assets, contained in the Financial Section of this report, the accumulated balance of funds derived from the excess of additions over deductions is referred to as the net assets held in trust for pension benefits.

The actuarial accrued liability is not disclosed in the Financial Statements, but is disclosed in the Schedule of Funding Progress in the Required Supplemental Schedules following the Notes to the Financial Statements.

Accomplishments in 2010

TRF continued its pursuit of excellence throughout fiscal year 2010. TRF's commitment to outstanding customer service was demonstrated by the continued implementation of operational programs that have resulted in over 99% of new retirees receiving their first pension payment on time. Over 90% of members who received services from TRF rated their experience as good or excellent. TRF was recognized by a global public pension system benchmarking firm as a high quality, low cost provider. Significant progress continues to be made in the implementation of new information technologies. TRF successfully completed its third year of a five-year program to modernize its business processes and systems.

Following this letter you will find a Certificate of Achievement for Excellence in Financial Reporting from the Government Finance Officers Association (GFOA) and an Achievement Award from the Public Pension Coordinating Council (PPCC). The GFOA certification for TRF's 2009 CAFR marks the second consecutive year that a TRF annual report has achieved this recognition. The PPCC award recognizes TRF's excellence in meeting professional standards for plan design and administration. This recognition rates TRF's system management and administration among an exclusive handful of public retirement systems in the nation and also marks the second consecutive year TRF has achieved this distinction.

Acknowledgements

The compilation of this report reflects the combined efforts of TRF staff and advisors. It is intended to demonstrate the spirit of full disclosure and to provide information for use as the basis for making management decisions, as a means of determining compliance with legal provisions, and as a means of determining responsible stewardship of the assets contributed by our members and employers.

We express our gratitude to the staff, advisors, and all who have contributed to the preparation of this report. The TRF staff also wishes to express our gratitude to Indiana Governor Mitch Daniels, the Indiana General Assembly, members of the Indiana Pension Management Oversight Commission, and the TRF Board of Trustees who provided TRF staff the privilege of serving the needs of our members and employers.

Sincerely,

Steve Russo

Membership and Eligibility

The membership of the Indiana State Teachers' Retirement Fund includes eligible educators and administrators.

Members Receiving Retirement Benefits

Age	Years of Service	Allowance Reduction
50 to 59	15 or more	11% at age 59, additional 5% for each year under age 59
55	Age at retirement plus total years of service equals 85 or more	None
60	15 or more	None
65	10 or more	None

Benefit Formula

Annual Benefit =
Average of Highest 5 Years of Annual Compensation x Total Years of Service x 1.1% (0.011)
+
Annual Savings Account[1]

[1] At retirement, a member can elect to receive the Annuity Savings Account as a monthly supplement to the Defined Benefit or in a total distribution.

Cost of Living Adjustments (COLA)

Cost of living adjustments are passed by the Indiana General Assembly on an ad-hoc basis.

Contribution Rates

- Members are required to contribute 3% of gross wages to their Annuity Savings Accounts. Employers have the option of making all or part of this 3% contribution on behalf of the member.
- Members may also voluntarily contribute up to an additional 10% of their wages into their Annuity Savings Accounts, under certain limitations.
- The amount (rate) of employer contributions in the 1996 Account is adopted by the Board of Trustees based on recommendations by the Indiana State Teachers' Retirement Fund's actuary.

INDEPENDENT AUDITOR'S REPORT

TO: THE OFFICIALS OF TEACHERS' RETIREMENT FUND BOARD OF TRUSTEES

We have audited the accompanying financial statements of the Teachers' Retirement Fund Board of Trustees, as of and for the year ended June 30, 2010. These financial statements are the responsibility of the Teachers' Retirement Fund Board of Trustees' management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Teachers' Retirement Fund Board of Trustees internal control over reporting. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the Teachers' Retirement Fund Board of Trustees as of June 30, 2010, and the respective changes in financial position where applicable, thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The Management's Discussion and Analysis, Schedules of Funding Progress, and Schedule of Employer Contributions are not a required part of the basic financial statements but are supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was performed for the purpose of forming an opinion on the financial statements taken as a whole. The Introductory Section, Administrative Expenses, Investment Expenses, Contractual and Professional Service Expenses, Investment Section, Actuarial Section, and Statistical Section are presented for purposes of additional analysis and are not a required part of the basic financial statements. The Administrative Expenses, Investment Expenses, and Contractual and Professional Service Expenses have been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements take as a whole. The Introductory Section, Investment Section, Actuarial Section, and Statistical Section have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on them.

MANAGEMENT'S DISCUSSION & ANALYSIS

This section presents Management's Discussion and Analysis (MD&A) of the Indiana State Teachers' Retirement Fund (TRF) financial statements for the fiscal year ended June 30, 2010. The MD&A is presented as a narrative overview and analysis. The MD&A should also be read in conjunction with the Financial Statements, the Notes to the Financial Statements, and the Required Supplemental Schedules.

FINANCIAL HIGHLIGHTS

- The net assets of TRF were $8.1 billion as of June 30, 2010.
- The net assets of TRF increased by $0.9 billion, or 13.1%, from the prior fiscal year. The increase was primarily due to positive total returns on Fund investments, resulting in higher investment values.
- The TRF rate of return on investments for the fiscal year was positive 13.5% on a market value basis, compared to last fiscal year's negative 15.7%, as stocks and bonds provided positive returns.
- As of June 30, 2009, the date of the most recent actuarial valuation, the Pre-1996 Account is actuarially funded at 31.9%, which is less than the 37.7% funded level as of June 30, 2008. The 1996 Account is actuarially funded at 93.1%, which is less than the 104.1% funded level as of June 30, 2008. The Pre-1996 Account includes all members who were hired before July 1, 1995, and have been continuously employed by the same Board of Education as they were on that date. The 1996 Account includes all other members.

OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to TRF's Financial Statements, which are comprised of three components: (1) Financial Statements, (2) Notes to the Financial Statements, and (3) Required Supplemental Schedules. The information available in each of these sections is briefly summarized as follows:

1) Financial Statements

The Statement of Fiduciary Net Assets presents information on TRF's assets and liabilities and the resulting net assets held in trust for pension benefits. This statement reflects TRF's investments, at fair value, along with cash and short-term investments, receivables and other assets and liabilities. This statement indicates the net assets available to pay future pension benefits and gives a snapshot at a particular point in time.

The Statement of Changes in Fiduciary Net Assets presents information showing how TRF's net assets held in trust for pension benefits changed during the fiscal year ended June 30, 2010. It reflects contributions by members and employers, along with deductions for retirement and annuity benefits, administrative expenses, and other deductions. Investment income and losses, resulting from investing and securities lending activities during the period, are also presented.

2) Notes to the Financial Statements

The Notes to the Financial Statements provide additional information that is essential for a full understanding of the data provided in TRF's Financial Statements.

3) Required Supplemental Schedules

The Required Supplemental Schedules consist of a Schedule of Funding Progress and a Schedule of Contributions from the Employers and Other Contributing Entities.

FINANCIAL ANALYSIS

TRF's total assets were $9.3 billion as of June 30, 2010, compared with $7.6 billion as of June 30, 2009. The increase in total assets was primarily due to increases in the market value of investments and securities lending collateral during the fiscal year ended June 30, 2010.

Total liabilities were $1.2 billion as of June 30, 2010,compared with $0.4 billion as of June 30, 2009. The increase in total liabilities was primarily due to an increase in securities lending collateral.

As the table below shows, total net assets were $8.1 billion as of June 30, 2010, which represents a increase of $0.9 billion, or 13.1%, compared to the prior fiscal year, driven primarily by the increase in market value of investments during the year.

Net Assets

(dollars in thousands)

	June 30, 2010	June 30, 2009	% Change
Assets			
Cash and Cash Equivalents	$ 589,589	$ 555,156	6.2%
Securities Lending Collateral	916,206	152,142	502.2
Receivables	199,744	254,893	(21.6)
Investments	7,611,007	6,654,100	14.4
Other Assets	2,144	1,241	72.8
Total Assets	$ 9,318,690	$ 7,617,532	22.3%
Liabilities			
Securities Lending Collateral	$ 916,206	$ 152,142	502.2%
Other Current Liabilities	261,655	266,192	(1.7)
Long-term Liabilities	60	60	-
Total Liabilities	$ 1,177,921	$ 418,394	181.5%
Total Net Assets	$ 8,140,769	$ 7,199,138	13.1%
Investment and Administrative Expenses as a % of Net Assets	0.67%	0.71%	

The following table presents TRF's investment allocation for employer-controlled assets (i.e., Defined Benefit plan assets) as of June 30, 2010, compared to TRF's target investment allocation and the prior fiscal year's allocation.

	June 30, 2010 Actual	June 30, 2010 Target	June 30, 2009 Actual	Allowable Range for Investments
Domestic Equities	19.3%	17.0%	33.1%	13% to 21%
International Equity	15.3	11.0	19.3	8% to 14%
Private Equity	8.4	9.0	7.2	5% to 13%
Equity Strategies	0.5	4.0	0.0	0% to 8%
Domestic Fixed Income	38.4	28.0	23.8	24% to 32%
International Fixed Income	4.4	6.0	3.6	4% to 8%
Credit Strategies	0.2	3.0	0.0	0% to 7%
TIPS/Inflation Linked	4.5	5.0	2.4	3% to 7%
Real Estate	3.9	9.0	5.5	5% to 13%
Commodities	1.0	4.0	0.7	2% to 6%
Absolute Return	4.1	4.0	4.4	2% to 6%
Total	100.0%	100.0%	100.0%	

The remaining Real Estate target allocation of 5.1% will be drawn from the other investment classes and will happen over an extended period of time, as suitable investments become available. The remaining 3.5% and 2.8% from Equity Strategies and Credit Strategies, respectively, will be drawn from the other investment classes as investments are made.

A summary of the changes in net assets during the fiscal years ended June 30, 2010 and 2009 is presented below:

Changes In Net Assets

(dollars in thousands)

	Fiscal Year Ended		
	June 30, 2010	June 30, 2009	% Change
Additions			
Member Contributions	$ 131,676	$ 128,568	2.4%
Employer Contributions	849,855	819,187	3.7
Employer Contributions to Pension Stabilization Fund	30,000	30,000	-
Net Investment Income / (Loss)	965,556	(1,390,148)	169.5
Transfer from Public Employees' Retirement Fund	5,510	4,260	29.3
Total Additions	$ 1,982,597	$ (408,133)	585.8%
Deductions			
Pension and Disability Benefits	$ 1,017,104	$ 934,296	8.9%
Distribution of Contributions and Interest	10,447	9,613	8.7
Administrative & Other Expenses	11,076	10,254	8.0
Transfer to Public Employees' Retirement Fund	2,339	2,525	(7.4)
Total Deductions	$ 1,040,966	$ 956,688	8.8%
Net Increase / (Decrease) in Net Assets	$ 941,631	$ (1,364,821)	169.0%
Net Assets - Beginning of Year	$ 7,199,138	$ 8,563,959	(15.9)%
Net Assets - End of Year	$ 8,140,769	$ 7,199,138	13.1%

ADDITIONS

Additions needed to fund benefit payments are accumulated through contributions from members and employers, as well as returns on invested funds. Member contributions for the year ended June 30, 2010 totaled $131.7 million. This represents an increase of $3.1 million, or 2.4%, compared to the prior fiscal year. Employer contributions were $849.9 million, an increase of $30.7 million, or 3.7%. The increase was due to larger appropriations made by the State of Indiana and new employees for whom the employers were making contributions. Employer contributions of $30.0 million to the Pension Stabilization Fund come from the Indiana State Lottery.

TRF's recognized net investment gain of $965.6 million for the fiscal year ended June 30, 2010, compares to the net investment loss of $1,390.1 million in the prior fiscal year. The higher investment income was primarily due to the recovery in the financial markets during the first nine months of the fiscal year. As a result, the total rate of return on TRF's investments was a positive 13.5%, compared to a negative 15.7% in the prior fiscal year. The positive rates of returns were experienced across all market segments. In this regard, TRF's investment portfolio performance for the fiscal year ending June 30, 2010 is summarized as follows:

- Domestic Large Cap equity investments posted a gain of 15.9%, which compared to a gain of 14.4% for the S&P 500 Index.
- Domestic Small Cap equity investments posted a gain of 23.3%, which compared to a gain of 21.5% for the Russell 2000 Index.
- International equity investments posted a gain of 10.4%, which compared to a gain of 10.4% for the MSCI ACWI ex USA ND Index.
- Fixed income investments posted a gain of 10.6%, which compared to a gain of 9.5% for the Barclays Aggregate Index.

DEDUCTIONS

The deductions from TRF's net assets held in trust for pension benefits include primarily payments for retirement, disability, and survivor benefits, distribution of contributions and interest, and administrative expenses. For the fiscal year ended June 30, 2010, benefit payments amounted to $1,017.1 million, an increase of $82.8 million, or 8.9% from the prior fiscal year. Distributions of contributions and interest were $10.4 million, which represents an increase of 8.7% from the prior fiscal year.

Administrative and other expenses were $11.1 million, which was an increase of $0.8 million, or 8.0%, from the prior fiscal year. This increase is primarily due to the cost of project expenses. The largest increase is for expenses related to supporting the development of software for a new finance system, a recordkeeper system, and an employer reporting system.

HISTORICAL TRENDS

A pension fund is well funded when it has enough money in reserve to meet all expected future obligations to participants. The funded ratios of the Defined Benefit pension plans administered by TRF as of the latest actual valuations were as follows:

	June 30, 2009	June 30, 2008
Pre-1996 Account	31.9%	37.7%
1996 Account	93.1%	104.1%

An analysis of the funding progress and employer contributions is provided in the Required Supplemental Schedules section of the Financial Statements.

Note 1. Summary of Significant Accounting Policies

A. **Reporting Entity** - The financial statements presented in this report represent only those funds that the Indiana State Teachers' Retirement Fund (TRF) has responsibility for and are not intended to present the financial position or results of operations of the State of Indiana or all of the retirement and benefit plans administered by the State. Effective July 1, 2000, TRF became an independent body corporate and politic (Public Law 119-2000). TRF is not a department or agency of the State; it is an independent body corporate and politic which exercises essential government functions. The members of the Board of Trustees of the Indiana State Teachers' Retirement Fund are appointed by the Governor of the State of Indiana, and a financial benefit/burden relationship exists between TRF and the State of Indiana. For these reasons, TRF is considered a component unit of the State of Indiana for financial statement reporting purposes.

B. **Basis of Presentation** - The financial statements of the Indiana State Teachers' Retirement Fund have been prepared using fund accounting in conformity with Generally Accepted Accounting Principles (GAAP) as applied to governmental units. The Governmental Accounting Standards Board (GASB) is the accepted standards setting body for established governmental accounting and financial reporting principles. GASB Statement No. 25 has been implemented for the Defined Benefit pension plans.

C. **Fund Accounting** - Fund accounting is designed to demonstrate legal compliance and to aid financial management by segregating transactions related to certain governmental functions or activities. The Indiana State Teachers' Retirement Fund is a pension trust fund. For a description of this Fund, see Note 2.

D. **Basis of Accounting** - The records of this Fund are maintained on a cash basis. The financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned, and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Member and Employer contributions are recognized when due, pursuant to formal commitments, as well as statutory or contractual requirements. Benefits and Refund disbursements are recognized when due and payable in accordance with the terms of the Fund.

E. **Budgets** - A budget for the administrative, project, and investment expenses is prepared and approved by the Board of Trustees.

F. **Deposits and Investments** – The Board is responsible for the Fund's property. The Board may take and hold any property given outright or on condition to the Fund and shall perform the conditions accepted. Unless restricted by a condition, the Board may transfer the property when necessary for the Fund's benefit. The Board shall receipt property belonging to or coming into the Fund and shall judiciously invest the property. The Board shall direct the Fund's disbursements on itemized vouchers approved by the President of the Board and the Director or, in the absence or incapacity of both officers, by another Trustee directed by order of the Board. The Board of Trustees may contract with investment counsel, trust companies, or banks to assist the Board in its investment program and the custody of its assets. The Board is required to diversify investments in accordance with prudent investment standards. The Board has issued investment guidelines for its investment program which authorizes investments in U.S. Treasury and Agency obligations, U.S. Government securities, common stock, international equity, corporate bonds, notes and debentures, repurchase agreements secured by U.S. Treasury obligations, mortgage securities, commercial paper, and bankers' acceptances. See Notes 4, 5 and 6 for more details.

During the year ended June 30, 2005, the Fund adopted Governmental Accounting Standards Board Statement No. 40, Deposit and Investment Risk Disclosures (an amendment of GASB Statement No. 3) ("GASB No. 40"). The adoption of GASB No. 40 required the Fund to include a presentation of Deposit and Investment Risk Disclosures.

During the year ended June 30, 2010, the Fund adopted Governmental Accounting Standards Board Statement No. 53, Accounting and Financial Reporting for Derivative Instruments. This Statement establishes accounting and financial reporting requirements for derivative instruments entered into by state and local governments. The requirements of this new Statement are effective for financial statements for periods beginning after June 15, 2009.

G. **Method Used to Value Investments** - GASB No. 25 requires that investments of Defined Benefit plans be reported at fair value. Short-term investments are reported at cost, which approximates fair value. Securities traded on a national or international exchange are valued at the last reported sales price at current exchange rates. Mortgages are valued on the basis of future principal and interest payments and are discounted at prevailing interest rates for similar instruments. Investments that do not have an established market are reported at estimated fair value. Values for investment funds and partnerships are provided by the investment fund managers.

H. **Other Investments** - Other investments include investment in shares of limited liability partnerships, real estate securities, options and swaps, comingled funds such as hedge funds, commodity pools, and other global securities. Also included is property owned for investment purposes.

I. **Capitalized Assets** - Equipment and software with a cost of $20,000 or more are capitalized at the original cost. Depreciation and amortization are computed on the straight-line method over the estimated life of all assets. TRF implemented GASB No. 51 during the fiscal year that ended June 30, 2009. During the current fiscal year that ended June 30, 2010, TRF capitalized an additional $1.2 million in software cost related to the Oracle financial system that was placed into production in November 2009. This brings the total software capitalization for the Oracle financial system to $2.4 million for fiscal years 2009 and 2010.

J. **Contributions Receivable** – Contributions are recognized when due, pursuant to formal commitments, as well as statutory or contractual requirements. The contributions receivable was determined by using actual contributions received in July 2010, as well as estimated amounts yet to be received for days paid in the quarter ended June 30, 2010.

K. **Inventories** - Inventories of consumable supplies are not recognized on the balance sheet as they are considered immaterial. Purchases of consumable supplies are recognized as expenditures at the time of purchase.

L. **Reserves and Designations**

The following are the legally required reserves and other designations of Fund equity:

1. **Member Reserve**: The member reserve represents contributions made by or on behalf of the members, plus any interest or earnings, less amounts refunded or transferred to the Benefits in Force reserve for retirement, disability, or other benefit. For the Indiana State Teachers' Retirement Fund, this reserve includes the members' Annuity Savings Accounts.

2. **Benefits in Force**: This reserve represents the actuarial present value of future benefits for all members who are presently retired or disabled. The accumulated contributions of the members are transferred to the reserve upon retirement or disability for those members electing to annuitize their Annuity Savings Accounts. The remainder of the actuarial pension cost is transferred from the employer reserve to fund the benefits. This reserve also includes $1,932,815,366 for the Pension Stabilization Fund. The Pension Stabilization Fund was established by Indiana Code (IC) 5-10.4-2-5. See Note 3 for further detail on the Pension Stabilization Fund. This reserve has an unfunded actuarial accrued liability.

3. **Employer Reserve**: This reserve consists of the accumulated employer contributions, plus earnings, less transfers made to the Benefits in Force reserve of the actuarial pension cost. This reserve has an unfunded actuarial accrued liability.

4. **Undistributed Investment Income Reserve**: This reserve was credited with all investment earnings. From this reserve, members' accounts are credited with interest and earnings. The remaining balance is distributed to the reserve accounts listed above. Costs of administering the Fund are financed by investment income and debited to this reserve before earnings are credited to the reserve accounts listed above.

The following are the balances of the reserves and designations of Fund equity as of June 30, 2010 (dollars in thousands):

	Member Reserve	Benefits in Force	Employer Reserve
Pre-1996 Account	$ 2,353,716	$ 2,675,816	$ -
1996 Account	750,574	391,326	1,969,337
Total	$ 3,104,290	$ 3,067,142	$ 1,969,337

M. **Payables and Liabilities** - Payables and liabilities are maintained throughout the year for monthly reporting purposes. They are calculated or estimated for financial statement reporting purposes. Benefits payable represents accrued monthly pensions as of the date of the financial statements that will be paid the first day of the following month. The Fund pays the Defined Benefits for the month on the first day of the following month.

N. **Compensated Absences** – TRF's full-time employees are permitted to accumulate earned but unused vacation and sick pay benefits. Vacation leave accumulates at the rate of one day per month and sick leave at the rate of one day every two months plus an extra day every four months. Bonus vacation days are awarded upon completion of five, ten and twenty years of employment with the State of Indiana. Personal leave days are earned at the rate of one day every four months; any personal leave accumulated in excess of three days automatically becomes part of the sick leave balance. Upon separation from service, employees in good standing will be paid for a maximum of thirty unused vacation leave days.

No liability is reported for unpaid accumulated sick leave. Vacation, personal leave and the salary-related payments that are expected to be liquidated are reported as Compensated Absences Liability.

Note 2. Fund Description

The Indiana State Teachers' Retirement Fund is a cost-sharing, multiple-employer retirement fund established to provide pension benefits for persons who are engaged in teaching or in the supervision of teaching in the public schools of the State or persons who are employed by the Fund. As of June 30, 2010, the number of participating school unit employers was:

Public School Units	362
Higher Education Units	3
State of Indiana Agencies	28
Associations	1
Total	394

Membership in the Fund is required for all legally qualified and regularly employed teachers who serve in the public schools of Indiana, including the faculty at Vincennes University and employees of the Fund. Additionally, faculty members at Ball State University and the University of Southern Indiana have the option of selecting membership in the Fund or the alternate University Plan. As of June 30, 2009, Indiana State Teachers' Retirement Fund membership consisted of:

Membership	
Currently Receiving Benefits	44,492
Active Plan Members	74,343
Nonvested Inactive Members	38,897
Vested Inactive Members	6,858
Total	164,590

Retirement Benefits

The Indiana State Teachers' Retirement Fund provides retirement benefits, as well as death and disability benefits. Annual retirement benefits, disability benefits, and death benefits are computed as follows:

1. **Regular Retirement (No Reduction Factor for Age)**
   Eligibility – Members are eligible at age 65 or older with at least 10 years of service credit, or between ages 60 and 64 with at least 15 years of service credit, or between ages 55 and 59 if age and service credit total at least 85 (known as the Rule of 85).

   There is no mandatory retirement age.

   Annual Amount – The state pension is calculated by multiplying a member's total years of service by 1.1% of an average of the member's five highest years of compensation. An annuity purchased by the member's accumulated contributions is added to this amount, unless the member elects to withdraw the accumulated contributions in a lump sum or elects to leave the contributions invested with the Fund.

2. **Early Retirement (Age Reduction Factor Used)**
   Eligibility – Members are eligible between ages 50 to 59 with 15 or more years of service credit. A member retiring early receives a percentage of the normal annual pension benefit. The percentage of the pension benefit at retirement remains the same for the member's lifetime.

   Annual Amount – For age 59, the early retirement percentage of the normal annual pension benefit is 89%. This amount is reduced five (5) percentage points per year (e.g., age 58 is 84%) to age 50 being 44%.

3. **Deferred Retirement (Vested Benefit)**
   Eligibility – Members are eligible once they have earned ten years of service. Benefit commences at age 65.

   Annual Amount – The benefit is computed as a regular retirement benefit with state pension based on service and final average salary at termination.

4. **Classroom Disability Benefit**
   Eligibility – Members are eligible once they have earned five years of service. Classroom disability refers to a medically confirmed inability to continue classroom teaching due to a mental or physical condition that is not necessarily of sufficient severity to meet Social Security disability guidelines.

   Annual Amount – Members may receive $125 per month plus $5 for each additional year of service credit over five years.

5. **Disability Retirement (No Reduction Factor for Age)**
   Eligibility – Members are eligible if they have earned five years of service and also qualify for Social Security Disability at time of termination.

   Annual Amount – The benefit is computed as a regular retirement benefit with state pension based on service and final average salary at termination.

6. **Duty Death Before Retirement**
   Eligibility – Eligibility is available once fifteen years of service are earned and the member had either a spouse to whom the member had been married for two or more years, or the member had a dependent under the age of 18.

   Annual Amount – The benefit is computed as regular retirement benefit, but reduced in accordance with a 100% joint and survivor election.

7. **Benefit Increases After Retirement**
   No automatic increases after retirement are provided. Cost of living increases, as passed by the State legislature, have been made from time to time.

Annuity Savings Account

Each member shall, as a condition of employment, contribute to the Fund 3% of his/her compensation. Effective July 1, 1986, each employing unit may elect to "pick up" the member contribution. No part of the member contributions to the Fund picked up by the employer is includable in the gross income of the member. The "pick up" amount does count in the salaries used to determine the final average at retirement. Any member who leaves covered employment has the option to withdraw accumulated contributions and interest, unless they are vested for retirement benefits, and then they must apply for retirement benefits to obtain their accumulated contributions and interest. In the event of a death of a member who has served less than fifteen years or does not meet the surviving spouse requirements, the designated beneficiary or estate is entitled to a lump sum settlement of contributions plus interest.

Indiana pension statutes stipulate that members of the Fund shall have the opportunity to direct their Annuity Savings Accounts into one of five current investment programs:

1. **Guaranteed Fund** - Interest is credited at a rate annually determined by the Board of Trustees. Principal and interest are "guaranteed". Market risk is assumed by the Fund.

2. **Bond Fund** – The fund contains high quality fixed-income instruments which provide interest/capital gain income. Market risk is assumed by the member.

3. **S&P 500 Index Equity Fund** – This fund closely tracks the return on the S&P 500 Index by employing an indexing strategy and by investing in the stocks of the S&P 500 Index companies. Market risk is assumed by the member.

4. **Small Cap Equity Fund** – This fund consists of stocks with a market capitalization of less than $1.5 billion. Market risk is assumed by the member.

5. **International Equity Fund** – This fund consists of securities of developed non-U.S. countries. Market risk is assumed by the member.

The Guaranteed Fund, Bond Fund, S&P 500 Index Equity Fund, Small Cap Equity Fund and International Equity Fund are valued at market value. When a member retires, dies or suspends membership and withdraws from the Fund, the amount credited to the member shall be valued at the market value of the member's investment, plus accrued interest and/or earnings on his/her investment, less accrued investment expenses.

For the fiscal year ending on June 30, 2010, members could only make a selection or re-allocation once per quarter. The changes were in effect the first month of the quarter following the request for change. Members requested allocations to one or all of the approved funds, as long as those allocations were made in 10% increments of the total balance in the member's account at the time of allocation. The total equaled 100%. Effective August 2, 2010, members may now change their allocation on a daily basis in increments of 1%.

Note 3. Employer Contributions Required and Employer Contributions Made

The Indiana State Teachers' Retirement Fund is funded on a pay as you go basis for employees hired prior to July 1, 1995, and who have maintained continuous employment with the same school corporation or covered institution since that date. State appropriations are made for the amount of estimated pension benefit payouts for each fiscal year. If the actual pension benefit payout for the fiscal year exceeds the amount appropriated, the difference is paid from the Pension Stabilization Fund. For employees hired on or after July 1, 1995; or hired before July 1, 1995, and prior to June 30, 2005, were either hired by another school corporation or institution covered by the Fund or were re-hired by a covered prior employer; the individual employer will make annual contributions. These contributions are set as a percentage of the employee's salary at a rate recommended by the Fund's actuaries and approved by the Fund's Board of Trustees.

Based on the actuarial valuation at June 30, 2008, employer actuarially required contributions were $952,120,349 for the fiscal year ended June 30, 2010. Contributions made by employers for the year ended June 30, 2010, were $885,639,968. This amount also includes the employer share paid by members for optional service credit purchases and amounts contributed by the Public Employees' Retirement Fund for the employer share for service transferred to the Indiana State Teachers' Retirement Fund.

Note 4. Deposit and Investment Risk Disclosures

The Fund's Investment policy states the following:

Description of TRF

The Indiana State Teachers' Retirement Fund ("TRF" or the "Fund") is a Defined Benefit plan under Internal Revenue Code Section 401(a) and is governed by federal law, the Indiana Constitution, Indiana Code, Indiana Administrative Code, and policies set by the TRF Board of Trustees (the "Board"). Pursuant to Indiana law and the Internal Revenue Code, TRF must be operated for the exclusive benefit of, and solely in the interest of, members and their beneficiaries. In order to provide the ensuing tax advantages to its members, TRF is required by Indiana law to meet all rules applicable to a qualified plan under Section 401 of the Internal Revenue Code. In addition, TRF is a trust, exempt from taxation under Section 501 of the Internal Revenue Code.

Objectives

All aspects of this policy statement should be interpreted in a manner consistent with the Fund's objectives. The objectives of the Fund have been established in conjunction with a comprehensive review of the current and projected financial requirements. These objectives are:

1. To have the ability to pay all benefit and expense obligations when due;
2. To achieve the actuarial rate of return while limiting downside risk; and
3. To control the costs of administering the Fund and managing the investments.

Description of the Primary Statutory Investment Provision

The Indiana General Assembly enacted the prudent investor standard to apply to the Board and govern all its investments. See PL 37-1996. The primary governing statutory provision is that the Board must "invest its assets with the care, skill, prudence, and diligence that a prudent person acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character with like aims." The Board is also required to diversify such investments in accordance with prudent investment standards. See IC 5-10.4-3-10.

Other pertinent investment requirements in the Indiana Code ("IC") include the following:

1. Fund investments must be held for the Fund by banks or trust companies under a custodial agreement or agreements. All Custodians must be domiciled in the United States. IC 5-10.4-3-13;
2. The Board may not engage in any prohibited transaction, as described in Section 503(b) of the Internal Revenue Code. IC 5-10.2-2-1.5(9); and
3. The Board must divest from firms that do business with Sudan under IC 5-10.2-9 and State Sponsors of Terror under IC 5-10.2-10.

It is the responsibility of the Board of Trustees to determine the allocation of assets among distinct capital markets in accordance with allowable legal limits.

The strategic asset allocation for employer assets effective on June 30, 2010 is as follows:

Global Equity	41%
Global Fixed Income	37
Inflation Sensitive	18
Absolute Return	4
	100%

The asset allocation for the Guaranteed Fund, which are employee assets in the members' Annuity Savings Accounts, is 100% fixed income securities.

Interest Rate Risk

The Fund uses the Barclays Capital Aggregate Index as the benchmark for performance measurement of domestic fixed income managers and various other indices for international fixed income managers.

As of June 30, 2010, the Fund had the following duration information (dollars in thousands):

Investment Type	Net Asset Fair Value	% of Net Asset Fair Value	Effective Duration
Short Term Investment Funds	$ 175,373	3.8%	0.00
Short Term Bills and Notes	42,406	0.9	0.12
Commercial Paper	48,797	1.0	0.03
Asset-Backed Securities	208,789	4.5	0.81

Other Fixed Income	700	0.0	1.56
Duration Not Available	774,728	16.6	N/A
Total	$ 4,672,496	100.0%	3.32

Custodial Credit Risk

Custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, the Fund will not be able to recover the value of investment or collateral securities that are in the possession of an outside party. Investments are exposed to custodial credit risk if the securities are uninsured and unregistered and are either held by the counterparty's trust department or agent, but not in the name of the Fund.

There was no custodial credit risk for investments including investments related to securities-lending collateral. Per IC 5-10.4-3-13, all Fund investments are held by banks or trust companies under custodial agreements and all custodians must be domiciled in the United States.

Deposit Risks

Deposits are exposed to custodial credit risk if they are not covered by depository insurance and the deposits are uncollateralized or collateralized with securities held by the pledging financial institution. Deposits held in the demand deposit account are carried at cost and are insured up to $250,000 each. Deposits in the demand accounts held in excess of $250,000 are not collateralized. Deposits with the Treasurer of State are entirely insured. Cash deposits held with the custodian, brokers and counterparty are carried at cost and are not insured or collateralized.

Assets Exposed (dollars in thousands):		
Demand Deposit Accounts - Bank Balance	$	37,529
Margin Deposits with Brokers		6,647
Cash Collateral with Counterparty		2,400
Cash Held with Custodian		5,701
Total Exposed	$	52,277

Credit Risk

The credit risk of investments is the risk that the issuer will default and not meet their obligation. This credit risk is measured by the credit quality ratings issued by national rating agencies such as Moody's and Standard and Poor's. The Fund's credit risk of investments policy is set on a manager by manager basis.

The following table (in thousands of dollars) provides information on the credit ratings associated with the Fund's investments in debt securities. Ratings were obtained from Moody's.

Rating		Fair Value	Percentage of Portfolio
Aaa	$	1,353,621	29.0%
US Government Guaranteed		642,318	13.7
Aa		254,140	5.4
A		466,480	10.0
Baa		672,068	14.4
Ba		174,782	3.7
B		55,752	1.2
Caa		17,671	0.4
Ca		599	0.0

Concentration of Credit Risk

As of June 30, 2010, TRF did not have investments in any one issuer, other than securities issued or guaranteed by the U.S. government that represented more than 5% of net investments.

Foreign Currency Risk

As of June 30, 2010, 11.0% of the Fund's investments were in foreign currencies. The Fund does not have a formal policy relating to foreign currency risk. The table below breaks down the Fund's exposure to each foreign currency (in thousands of dollars):

Currency	Equities	Contracts, Cash and Bonds	Total Fair Value	Percent of Total Fund Fair Value
Euro Currency Unit	$ 239,250	$ 64,265	$ 303,515	3.7%
Japanese Yen	151,654	31,248	182,902	2.3
British Pound Sterling	117,377	10,017	127,394	1.6
Australian Dollar	53,644	10,062	63,706	0.8
Swiss Franc	48,614	88	48,702	0.6
Hong Kong Dollar	35,980	89	36,069	0.4
Canadian Dollar	33,928	311	34,239	0.4
Swedish Krona	21,263	73	21,336	0.3
South Korean Won	19,974	-	19,974	0.3
Other	45,932	5,874	51,806	0.6
Totals	$ 767,616	$ 122,027	$ 889,643	11.0%

Securities Lending

State statutes and the Board of Trustees permit the Fund to lend securities to broker-dealers and other entities (borrowers) for collateral that will be returned for the same securities in the future. The Fund's custodial bank manages the securities lending program and receives securities or cash as collateral. The Fund's custodial bank maintains a list of broker-dealers that have passed their credit analysis and are eligible to borrow securities. In addition, the Fund can have any borrower removed from this list by requesting the custodian not lend to this borrower. The collateral securities cannot be pledged or sold by the Fund unless the borrower defaults, but cash collateral may be invested by the Fund. Collateral securities and cash are initially pledged at 102% of the market value of domestic securities lent and 105% on international securities lent. Collateral is adjusted to the market on a daily basis. No more than 40% of TRF's total assets may be lent at any one time. At year-end, TRF has no credit risk exposure to borrowers because the amount TRF owes the borrowers exceeds the amounts the borrowers owe TRF.

Approximately 25% of the securities loans can be terminated on demand either by the Fund or by the borrower, although generally the average term of these loans is one day. Total cash collateral of $916 million is invested in a pooled fund.

As of June 30, 2010, the Fund had the following securities on loan (dollars in thousands):

Security Type	Market Value of Loaned Securities Collateralized by Cash	Market Value of Loaned Securities Collateralized by Noncash	Total Securities Loaned
Global Equities	$ 87,518	$ 356	$ 87,874
U.S. Agencies	11,720	-	11,720
U.S. Corporate Fixed	195,007	-	195,007
U.S. Equities	246,886	411	247,297
U.S. Gov't Fixed	349,180	1,022	350,202
Total	$ 890,311	$ 1,789	$ 892,100

Outstanding Short Sales
Short sales occur when investments have been sold which are not yet owned by the Fund. Prior to settlement of the sale, the investments will be procured. For the investments directly held by the Fund within the custody accounts, the outstanding short sales are included as accounts receivable from sales of investments and as negative investments. A schedule of the negative investments as of June 30, 2010, is listed below. These investments reduced the debt securities investments shown on the balance sheet. These transactions involve market risk, as the asset to be delivered may become more costly to procure and then losses would be realized.

A schedule of the outstanding short sales at June 30, 2010 follows (dollars in thousands):

Type of Investment:		
Government Mortgage Backed	$	51,639
Total	$	51,639

Note 5. Derivative Financial Instruments

Derivative transactions involve, to varying degrees, the following risks:

Market risk – Market risk is the possibility that a change in the referenced position will cause the value of a financial instrument to decrease or become more costly to settle. The market risk associated with derivatives, the prices of which are constantly fluctuating, is regulated by imposing strict limits as to the types, amounts and degree of risk that investment managers may undertake.

Interest Rate Risk — Interest rate risk is the risk of change in the market value of the assets due to a change in interest rates. Bond futures, interest rate swaps and interest rate swaptions are generally used to manage interest rate risk, adjust portfolio duration, or rebalance the total portfolio to the target asset allocation. A futures contract is an agreement between two parties to buy and sell a financial instrument at a set price on a future date. Interest rate swap agreements involve the exchange by the Master Trust, with a counterparty, of respective commitments to pay or receive interest (e.g., an exchange of floating rate payments for fixed rate payments) with respect to the notional amount of principal. Interest rate swaptions are options to enter into interest rate swaps based off a set of predetermined conditions. Refer to Note 4 for the interest rate risk of the Fund.

Credit Risk — Credit risk is the risk of change in the market value of assets due to the change in creditworthiness of the underlying issuer. Credit default swaps are used to achieve the desired credit exposure of a security or basket of securities. Credit default swap agreements involve one party (referred to as the buyer of protection) making a stream of payments to another party (the seller of protection) in exchange for the right to receive a specified return in the event of a default or other credit event for the referenced entity, obligation or index.

Currency Risk — Currency risk is the risk of a change in market value due to the change in foreign currency exchange rates. Generally, currency futures, forward contracts and options are used to achieve the desired currency exposure, generate value-added performance, or rebalance the total portfolio to the target asset allocation. Foreign currency futures and forwards are agreements between two parties to buy and sell a set of currencies at a set exchange rate on specified future dates. A currency option gives the buyer the right, but not the obligation, to buy one currency or sell another currency at a set exchange rate on or before a given date.

Equity Risk — Equity risk is the risk of a change in market value of assets due to the change in equity or equity index prices. Equity futures are generally used to achieve the desired market exposure of a security or index or rebalance the total portfolio to the target asset allocation. An equity futures contract is an agreement between two parties to buy and sell a financial instrument at a set price on a future date.

Future Settlement Risk — Future settlement risk is the risk of not receiving the asset or associated gains specified in the contract. Associated gains are derived from the change in market value of the contract due to a change in price of the underlying security. Mortgage TBAs (To Be Announced) and treasury forwards are used to achieve the desired market exposure of a security or asset class or adjust portfolio duration. A TBA is a contract for the purchase or sale of agency mortgage-backed securities to be delivered at a future agreed-upon date; similarly, a treasury forward is a contract for the purchase or sale of U.S. Treasury securities to be delivered at a future agreed-upon date.

TRF's directly held investments in derivatives are not leveraged. In the case of an obligation to purchase (long a financial future or a call option), the full value of the obligation is held in cash or cash equivalents. For obligations to sell (short a financial future or buy a put option), the reference security is held in the portfolio. During the year, TRF's derivative investments included but were not limited to, foreign currency forward contracts, SWAPS, options, TBAs and futures.

The table below summarizes TRF's derivative information for the year ending June 30, 2010 (dollars in thousands):

	Change in Fair Value		Fair Value at June 30, 2010		
Investment Derivatives	Classification	Amount	Classification	Amount	Notional
Governmental activities

Broker Commisions Recaptured	Investment Income	119	Investments	N/A	-
Total		$ 39,597		$ 702	$ 60,899

Foreign currency forward contracts are used to hedge against the currency risk in TRF's foreign equity stock and debt security portfolios. A foreign currency forward contract is an agreement to buy or sell a specific amount of a foreign currency at a specified delivery or maturity date for an agreed-upon price. Fluctuations in the market value of foreign currency forward contracts are marked to market on a daily basis.

At June 30, 2010, TRF's investments included the following currency forwards balances:

(dollars in millions)	
Forward Currency Contract Receivables	$ 117.8
Forward Currency Contract Payables	$ 115.5

TRF's investment managers use financial futures to replicate an underlying security or index they intend to hold or sell in the portfolio. In certain instances, it may be beneficial to own a futures contract rather than the underlying security. Additionally, TRF's investment managers use futures contracts to adjust the portfolio risk exposure. A financial futures contract is an agreement to buy or sell a specific amount at a specified delivery or maturity date for an agreed-upon price. Financial future positions are recorded with a corresponding offset, which results in a carrying value equal to zero. As the market value of the futures contract varies from the original contract price, a gain or loss is recognized and paid to, or received from, the clearinghouse. The cash or securities to fulfill these obligations are held in the investment portfolio. Futures contracts may be used for the purpose of investing cash flows or modifying duration but in no event may leverage be created by any individual security or combination of securities.

A derivative instrument could be a contract negotiated on behalf of the Master Trust and a specific counterparty. This would typically be referred to as an "OTC contract" (Over The Counter) such as swaps, forward contracts and TBAs. Alternatively, a derivative instrument, such as futures, could be listed and traded on an exchange and referred to as "exchange traded."

Inherent in the use of OTC derivatives, the Master Trust is exposed to counterparty credit risk on all open OTC positions. Counterparty credit risk is the risk that a derivative counterparty may fail to meet its payment obligation under the derivative contract. As of June 30, 2010, the Master Trust counterparty risk was not deemed to be significant, whether evaluating counterparty exposure outright or netting collateral against net asset positions on contracts with each counterparty. Additionally, with the use of collateral, master netting agreements assist in mitigating counterparty credit risk.

(dollars in thousands): Counterparty	Quality Ratings of Counterparty	Fair Value Exposure
Barclays Capital	AA-	$ 144
BNP Paribas S.A.	AA	(462)
Citibank, New York	A+	318
Credit Suisse	A+	(108)
Deutsche Bank AG	A+	692
Standard Chartered Bank	A	(28)
UBS (Warburg)	A+	(2,155)
Bank of America NA	A+	230
Goldman Sachs Bank USA	A	26
Goldman Sachs International	A	921
JP Morgan Chase Bank, N.A.	AA-	23,600
Merrill Lynch Capital Services Inc.	A	1
Morgan Stanley Capital Services Inc.	A	144
Royal Bank of Canada	AA-	59
Royal Bank of Scotland PLC	A+	1,157

The aggregate amount of plan collateral with brokers was $1,960,000, while the aggregate amount of collateral posted by counterparties was $2,950,000. The aggregate amount of liabilities included in netting arrangements was $1,090,105. Securities eligible as collateral are typically United States government bills and U.S. dollar cash. Generally, any positive movement in market value requires the counterparty to transfer a minimum of $250,000 in collateral. It is important to note that margin may be called at a minimum weekly with the ability to call as frequently as daily.

The Master Trust may be subject to credit-related contingent features for those contracts governed by an International Swaps and Derivatives Association Master Agreement (generally swaps) with each counterparty for each open contract in a net liability position. In those instances, the Master Trust is generally regarded as having liquidity risk. In the event the Master Trust's assets decline by various, per-specified rates over predetermined time periods, the Master Trust is either required to post more collateral or may be required to pay off the open liability contracts given the counterparties right to terminate the contract. At June 30, 2010, the Master Trust had a fair value of $1,090,105 in contracts in a net liability position with contingent features; $1,960,000 was posted in collateral against those positions. Contingent features that could result in an immediate payment from the counterparty include a downgrade of the counterparty below a lower specified rating, commonly A-/A3. Additionally, immediate payment can be made to the counterparty in the event assets under management of the portfolio falls below certain thresholds. It is important to note that these contingent features are not compulsory, rather they are voluntary.

Note 6. Long Term Commitments for Alternative Investments

TRF had entered into long term commitments for funding alternative investments in private equity and private real estate of $1,497.4 million as of June 30, 2010. These investments had a net asset value of $692.3 million as of June 30, 2010. The funding period for the amounts that TRF has already committed is from April 2002 to approximately June 2018. The outstanding commitments at June 30, 2010, totaled $614.1million.

Note 7. Deferred Compensation Plan

The State offers its employees a deferred compensation plan (the plan) created in accordance with Internal Revenue Code Section 457. The plan, available to all State employees and employees of certain quasi-agencies and political subdivisions within the State, permits them to defer a portion of their salary until future years. The deferred compensation is not available to employees until termination, retirement, death, or unforeseeable emergency.

All amounts of compensation deferred under the plan, all property and rights purchased with those amounts, and all income attributable to those amounts, property, or rights are (until paid or made available to the employee or other beneficiary) held for the exclusive benefit of participants of the plan and their beneficiaries as required by section 457(g) of the Internal Revenue Code. The Indiana State Incentive Match Plan which provided $15 per pay period for each employee who contributed to the 457 Plan was discontinued January 1, 2010, due to budget reductions.

The State has established a deferred compensation committee that holds the fiduciary responsibility for the plan. The committee holds the deferred amounts in an expendable trust.

Note 8. Risk Management

The Fund is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; job-related illnesses or injuries to employees; and natural disasters.

The policy of the Fund is not to purchase commercial insurance for the risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; job related illnesses or injuries to employees; and natural disasters.

Note 9. Employee Fund Membership

Employees of the Indiana State Teachers' Retirement Fund are eligible for membership in the Fund. Effective July 1, 2001, IC 21-6.1-4-1(a)-10 states that members of the Fund include persons who are employed by the Fund.

Note 10. Reserve Transfers with the Public Employees' Retirement Fund (PERF)

Transfers of a member's reserves are made between TRF and PERF when a member has service at the time of retirement that is covered by both funds. Service covered by PERF and the related Annuity Savings Account balance will be used by TRF at the time of retirement in calculating the member's retirement benefit from TRF. If the member is retiring from PERF, PERF will use the member's TRF service and Annuity Savings Account balance. At the time the retirement is calculated, TRF sets up a receivable from PERF for both the Annuity Savings Account balance and the calculated reserve for the service credit brought in from PERF. This receivable is included as a line item in the "Receivables" section of TRF's Statement of Fiduciary Net Assets. On the reverse side, TRF recognizes a payable in the Liabilities section of the Statement of Fiduciary Net Assets for TRF amounts used in calculating a PERF retiree's benefit.

Note 11. Group Health Insurance Program

Medicare eligible TRF members may enroll in a Medicare supplemental group health insurance plan offered by Anthem Blue Cross and Blue Shield. This fully insured plan, is funded through retiree paid premiums and contributions from the Health Plan Reserve. Full premium payments for the contract year of May 1, 2009 to May 1, 2010 were $15,709,968, and the plan covered 7,285 members. The Group Contract with Anthem includes a refund feature for favorable experience, and any refund amount is deposited in a Northern Trust investment account designated for the health insurance plan reserve. The account holds investments as directed by TRF at 79% bond fund and 21% stock fund. While the TRF Board invests these funds and may use them to stabilize the premiums paid by retirees for health insurance, this reserve consists solely of retiree premiums.

The following are the designated funds and reserves maintained for the retiree health insurance program as of June 30, 2010.

Fair Value as of June 30, 2010		
Health Plan Reserve Account Balance	$	14,082,504
Refund Receivable from Insurer for Contract Year Ended April 30, 2010		850,805
Required Contract Reserves Held by Anthem (Insurer):		
Premium Deposit Fund		2,000,000
Funds Availability Reserve		1,963,746
Total Designations and for Reserves for Retiree Health Insurance Program	$	18,897,055

Note 12. Subsequent Events

Effective August 2, 2010, the existing TRF ASA investment options for member accounts were expanded to include target date funds. In addition, member accounts were converted from a quarterly valuation to a daily valuation environment.

Note 13. Actuarial Funding Status of the Fund

As of June 30, 2009, TRF was 42% funded. As stated in Note 3, members in the Pre-1996 Account are funded on a pay as you go method for the employer portion of the pension and members in the 1996 Account are funded with employer contributions as they work. TRF accounts for these two classes of members as Pre-1996 Account and 1996 Account, respectively. The Pre-1996 Account is 32% funded and the 1996 Account is 93% funded.

The actuarial methods and significant assumptions used by TRF are summarized in the table below:

Valuation Date	June 30, 2009
Actuarial Cost Method	Entry Age Actuarial Cost Method
Amortization Method	Level Dollar
Amortization Period	30 Years
Asset Valuation Method	4-year Smoothed Market Value with Corridor
Actuarial Assumptions:	
Investment Rate of Return	7.50%
Projected Salary Increase	3.50% - 12.50%
Included Wage Inflation	3.25%
Cost of Living Adjustments	1.5% Compounded Annually on Pension Portion

The funded ratio of the Fund has decreased from 45% at June 30, 2004, to the ratio of 42% at June 30, 2009. A historical look at the funded status of the Fund can be found in the Required Supplemental Schedules provided.

The actuarial value of the Fund's assets as of the June 30, 2009 valuation was $8,029,820,891 and the actuarial accrued liability was $19,162,625,560. The difference is the Fund's unfunded actuarial accrued liability of $11,132,804,669. The annual covered payroll as of the June 30, 2009 actuarial valuation was $4,339,032,221 and the ratio of the unfunded actuarial liability to the annual covered payroll was 257%.

Board of Trustees
Indiana State Teachers' Retirement Fund
150 W. Market Street, Suite 300
Indianapolis, IN 46204

Dear Trustees:

Strategic Investment Solutions is pleased to present the Indiana State Teachers' Retirement Fund (TRF) results for the fiscal year ended June 30, 2010.

As of June 30, 2010, TRF had combined assets of $8.1 billion, an increase of $0.9 billion since June 30, 2009. The increase in assets over the latest fiscal year was primarily due to strongly positive US equity and global credit market returns.

The latest TRF fiscal year featured a period of high hopes for a global economic recovery as markets emerged from the pessimism and risk aversion that characterized the prior year. While US GDP growth for each quarter during FY2009 was negative, it averaged +3.2% during FY2010. Despite the financial turmoil within the US, this was a better mark than most developed countries (ex Japan) during this period. However, it paled in comparison with several major emerging market countries, in particular the "BRIC" economies (Brazil, Russia, India, and China), which provided the engine for global growth during this period and enjoyed a huge equity market upswing.

Unfortunately, despite this uptick in growth, unemployment continued to increase during the year, particularly in the US, Canada, the UK, and several Euro-land economies. Unemployment peaked at 10.1% in October, 2009, the highest rate since the 10.8% figure reached in November-December, 1982, and the second-highest rate since the Great Depression. Many analysts expect this high level of unemployment to persist for several years as financial markets become restructured, allowing for increased credit creation.

A reversal of the previous fiscal year, the US equity and credit markets had strongly positive returns during the fiscal year, as investors showed a renewed appetite for risk. The Russell 1000 Index, a compilation of the 1000 largest capitalization domestic stocks, gained 15.2%, versus last year's -26.2%. Smaller capitalization stocks, as measured by the Russell 2000 Index, increased 21.5%. Value-oriented strategies outperformed growth in the large cap and small cap segments. In all market indices, Consumer Discretionary was the strongest performing sector (+29.8%), with Energy being the weakest (+4.1%).

Developed international equity markets underperformed the US market during the period, returning 6.4%, as measured by the MSCI EAFE (Europe, Australasia, and Far East) Index, in part due to a stronger dollar. Despite the huge deficits run by the US to help stimulate economic growth and concerns arose about a weaker dollar, the dollar strengthened during the fiscal year. Counter to the US, growth beat value, but similarly small beat large. Emerging markets increased, and led the developed markets, returning 23.5% over the same time period, as measured by the MSCI Emerging Markets Index.

The investment grade fixed income market led by the corporate sector (+22.9%) again performed well over the trailing fiscal year period returning 9.5% as measured by the Barclays Capital Aggregate Index. Intermediate (+8.3%) underperformed long-term government/credit securities (+16.5%).

High yield bonds led investment grade issues over the fiscal year period, returning 26.8%, as measured by the Barclays Capital Corporate High Yield Bond Index, again reflecting investors' changing risk preferences during the year. The mortgage sector, as measured by the Barclays Capital Mortgage-Backed Securities Index, returned 7.5%, trailing the broader fixed income market. The Barclays Capital Treasury Index returned 6.7%.

TRF Defined Benefit Assets returned 14.8%, outperforming the target benchmark return of 12.6%. US small cap equity had the largest absolute positive impact on total fund fiscal year performance, while the absolute return strategy carried largest relative impact.

Specifically:

TRF's domestic equity managers outperformed their passive target over the trailing one year period returning 18.7% versus the S&P Super 1500 Composite return of 15.6%. The majority of the Fund's small cap managers outperformed their passive benchmark (combined 27.0% vs. 21.5%), and the Fund's large cap manager composite (+16.91%) led its benchmark by 2.5%.

TRF's international equity managers (+11.4%) outperformed the MSCI ACWI -US (+10.4%) by 1.0% over the trailing one year period. All active managers surpassed expectations.

TRF's, Fixed Income Composite (+12.9%) beat the Barclays Capital Aggregate Bond Index (+9.5%) by 3.4% over the trailing twelve months; all managers outperformed their respective benchmarks.

The Fund's alternative exposure produced varying results over the trailing one year period. While the Absolute Return and Real Estate Composites significantly outperformed their benchmarks (10.9% vs. 4.9%) and (-9.0% vs. -18.8%) respectively, the Private Equity Composite trailed its benchmark. The Real Estate, Absolute Return and Alternatives allocations are all relatively new and have not yet reached their three year track records; performance in these asset classes typically lags during the initial investment period as managers draw capital to fund new investments.

During the fiscal year, TRF began the process of adopting a revised asset allocation strategy with several key implementation steps:

- Reducing exposure to long-only public equities on a global basis;
- Increasing exposure to private equity, real estate, and absolute return strategies;
- Restructuring the broad fixed income asset class to give TRF greater control over sector exposure; and,
- Reducing the number of managers used for public equities and fixed income and adding to managers expected to generate a higher level of alpha.

In summary, Strategic Investment Solutions is pleased with the overall Indiana State Teachers' Retirement Fund performance over the near and long term periods. Decisive action has been taken to replace managers that have failed to meet expectations or as a result of asset class restructuring. Additionally, TRF's continued focus on risk reduction and efforts to increase the Fund's diversification have positively impacted TRF's performance, and have positioned the Fund to weather further market turmoil.

Best regards,

Pete Keliuotis, CFA
Managing Director

Summary of Investment Policies

The Board members are fiduciaries of the Fund. Indiana Code, Article 5-10.4 provides that a six-member Board of Trustees will oversee TRF. Five trustees shall be appointed by the Governor, two of who must be members of the Fund. The sixth member of the Board must be the Director of the budget agency or the Director's designee. An Executive Director appointed by the Governor carries out the policies set by the Board and administers the Fund on a daily basis. Pursuant to Indiana law, the Executive Director is also required to be a TRF member.

The Board establishes investment policies; however, Indiana law establishes guidelines on the investment of the Fund's assets. At all times, TRF must invest its assets in accordance with the "Prudent Investor" standard. Under this standard, investment decisions are based upon the same degree of care that a prudent person acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a similar character with similar aims.

The Board's Investment Policy Statement (IPS) is designed to meet the objectives of the Fund. These objectives are:

- To have the ability to pay all benefit and expense obligations when due.
- To achieve the actuarial rate of return while limiting downside risk.
- To control the costs of administering the Fund and managing the investments.

The Board does intend the policy to be a dynamic document, and, as such, expects to review it periodically. The Board anticipates that changes will be made from time to time to reflect experience, investment product changes, benefit and structural changes, performance, and economic conditions. The purpose of the IPS is summarized below:

- Set forth the investment policies which the Board judges to be appropriate and prudent in consideration of the needs of the Fund and applicable legal requirements, as well as direct the assets of the Fund.
- Make clear distinctions between the responsibilities of the Board and those of the investment manager(s) selected by the Board.
- Establish criteria against which the investment manager(s) are to be measured.
- Communicate the investment policies, objectives, guidelines, and performance criteria of the Board to the Staff, investment managers, consultants, employers, members, and all other interested parties.
- Serve as a review document to guide the ongoing oversight of the investment of the Fund.
- Demonstrate that the Board is fulfilling its fiduciary responsibilities in the management of the investments of the Fund solely in the interests of members and beneficiaries of the Fund.

The Board recognizes that the allocation of assets, particularly the broadly-defined mix between stocks and bonds, is the most important determinant of investment rates of returns over long periods of time. The procedure for determining the allocation will consider the relevant characteristics of the liabilities and the potential assets of the Fund. An asset liability study will be conducted no less than every three years and will analyze the expected returns of various asset classes, projected liabilities, risks associated with alternative asset mix strategies and their effect on the projected market value of assets, funded status, and contributions to the Fund.

The investment portfolio includes long-term commitments to the following asset classes: domestic equity, domestic fixed income, international equity, non-US fixed income, and alternative investments.

The Board employs investment managers to implement the asset allocation through a selective and thorough search process that embodies the principles of procedural due diligence. It is the intent of the Board to encourage the participation of all qualified organizations in this process. The Board encourages investment managers to develop long-term investment strategies consistent with the guidelines outlined in the Fund's IPS, as well as governing Indiana statutes. Additionally, investment managers will adhere to and comply with the CFA Institute Global Investment Performance Standards in calculating and reporting investment performance. Performance of each manager is measured against the rate of return associated with appropriate market index benchmarks and an appropriate universe or style peer group of investment managers.

Comprehensive Annual Financial Report

For the Fiscal Year Ended June 30, 2010

Actuarial

February 9, 2010

nyhart
www.nyhart.com

The Board of Trustees
Indiana State Teachers' Retirement Fund
Indianapolis, IN

Dear Board Members:

An actuarial valuation is prepared annually for the Indiana State Teachers' Retirement Fund. Submitted in this report are the results of the June 30, 2009 actuarial valuation.

Census Data and Asset Information

The member census data and the asset information for this valuation were furnished by the Chief Financial Officer and Staff. Their efforts and cooperation in furnishing these materials are acknowledged with appreciation. We did not audit the information provided, but we did review it thoroughly for reasonableness and compared it with the prior year's submission for consistency.

Assumptions and Methods

The actuarial assumptions used in the June 30, 2009 valuation were adopted by the Board pursuant to the Experience Study of August, 2008, which reflects the experience period from July 1, 2002 to June 30, 2007. Assumptions are summarized in the Assumptions and Methods section of this report. These assumptions and methods have been used to develop the Annual Required Contribution and are consistent with the accounting requirements detailed in GASB Statements No. 25, No. 27, and No. 50.

Funding Objective

The Indiana State Teachers' Retirement Fund Pre-1996 Account is funded on a pay-as-yougo basis from the State of Indiana. The funding objective of the Indiana State Teachers' Retirement Fund 1996 Account is to establish and receive contributions that, when invested at the assumed rate of return, will ultimately accumulate assets over each member's working lifetime that will be sufficient to pay expected retirement allowances. As such, an employer contribution rate is calculated each year. That rate is then considered in conjunction with the goal of maintaining a relatively stable contribution over time.

Certification

We have included several schedules and exhibits in this report, including the following:
Summary of Actuarial Assumptions and Methods
Analysis of Financial Experience
Solvency Test
Schedule of Active Members' Valuation Data
Schedule of Retirants and Beneficiaries
Schedule of Funding Progress
Schedule of Employer Contributions

The valuation was completed under the supervision of a Member of the American Academy of Actuaries with significant experience in valuing employee retirement systems, and was prepared using generally accepted actuarial principles and in accordance with standards of practice prescribed by the Actuarial Standards Board. To the best of our knowledge, this report is complete and accurate and the actuarial methods and assumptions produce results that are reasonable.

Respectfully submitted,

John Dowell

John L. Dowell, FSA, EA, MAAA   Michael Zurek, EA, MAAA

JD/lmw

Fund Structure

The Indiana State Teachers' Retirement Fund (TRF) is one fund comprised of a two-account structure in compliance with Indiana Code Section 5-10.4-2-2:

1. The Pre-1996 Account consists of members who were hired prior to July 1, 1995, and who have maintained continuous employment with the same school corporation or covered institution since that date.
2. The 1996 Account consists of members who were:
   a. hired on or after July 1, 1995; or
   b. hired before July 1, 1995, and prior to June 30, 2005:
      i. were either hired by another school corporation or institution covered by TRF, or
      ii. were re-hired by a covered prior employer.

Characteristics of the Pre-1996 Account

1. Active membership in the Pre-1996 Account continues to decline as members quit, become disabled, die, retire, or incur a change in status as described in (2.b.) above, thereby automatically transferring to membership in the 1996 Account.
2. The Defined Benefits from the Pre-1996 Account are funded by State appropriations (including contributions of some revenue from the State Lottery). For members who annuitize their Annuity Savings Account (ASA) at the time of retirement, ASA benefits payable from the Pre-1996 Account are funded by the annuitization of Pre-1996 Account member contributions.

Characteristics of the 1996 Account

1. As members depart from active service in the Pre-1996 Account, their replacements will become members of the 1996 Account. If the 1996 Account were a stand-alone plan, this pattern of departures and hirings would produce a fairly constant population size.
2. Defined Benefits payable from the 1996 Account are funded by contributions from local school corporations or other institutions that employ covered members. For members who annuitize their Annuity Savings Account (ASA) at the time of retirement, ASA benefits payable at retirement from the 1996 Account are funded by the annuitization of 1996 Account member contributions.

Funding Arrangements

Prior to the legislation that established the two-account structure of TRF, the Defined Benefits of the Indiana State Teachers' Retirement Fund were funded with a pay-as-you-go method. Under this arrangement, amounts were appropriated to meet the current year's pension payment requirements. Defined Benefits payable from the Pre-1996 Account continue to be funded on this basis.

In 1995, the Pension Stabilization Fund was set up for the Pre-1996 Account. Since then, some pre-funding progress has been made via State appropriations to this account.

Defined Benefits payable from the 1996 Account are funded through employer percent-of-pay contributions. The Board of the Teachers' Retirement Fund sets this contribution rate after reviewing the most recent actuarial valuation report.

The contribution rate of 7.5% for fiscal year 2011 was set by the Board in fiscal year 2010 for the 1996 Account.

Plan Provisions

The ad-hoc cost of living adjustment (COLA), effective January 1, 2009, was included in the census information provided. There was no ad-hoc COLA on January 1, 2010. Instead, retirees were paid a service-related lump sum in September 2009. These changes were reflected in the June 30, 2009 valuation. Any future COLA was estimated by an ongoing assumption of 1.5% annual increases in all Defined Benefit payments, beginning January 1, 2011. We are not aware of any other changes in the plan provisions since the June 30, 2008 actuarial valuation.

Assumptions and Methods

The actuarial assumptions used in the June 30, 2009 valuation are based on plan experience from July 1, 2002 to June 30, 2007. The assumptions are the same as those used in the June 30, 2008 valuation.

The asset valuation method has been changed for the June 30, 2009 valuation to treat ASA account balances as fully funded and eliminate their investment experience from the smoothing process.

Investment Experience

Investment return for the year ended June 30, 2009, was lower than the assumed 7.5%. The market value rate of return was negative 16.3%. Under the asset valuation method, market gains and losses are spread over a four-year period. The Market Value of Assets is currently $831 million lower than the Actuarial Value of Assets, meaning a portion of the recent losses have not yet been recognized but will be in the upcoming years.

Challenges

The 1996 Account has been steadily funded since its inception. As membership in this portion of the plan increases, the amount of required contributions will increase as a dollar amount, but should remain relatively stable as a percentage of covered payroll with plan experience causing gradual changes. The primary funding challenge will be for the State to meet the projected pay-as-you-go obligations for the Pre-1996 Account.

Actuarial Schedules

The schedules shown in the Actuarial Section, including a Summary of Actuarial Assumptions & Methods, Analysis of Financial Experience, Solvency Test, Schedule of Active Members' Valuation Data, and the Schedule of Retirants and Beneficiaries were prepared by the actuary.

The Schedule of Funding Progress and Schedule of Contributions from the Employers and Other Contributing Entities can both be found in the Financial Section.

The assumptions used in this valuation reflect the study of experience covering the period July 1, 2002, through June 30, 2007.

Investment Return Rate

The assumed investment return rate is 7.5% per year, compounded annually (net after administrative expenses).

Pay Increase Assumption

The assumption for each consists of a merit and/or seniority increase, 3.0% for price inflation, and 0.25% for real wage growth.

Pay Increase Assumption

Years of Service	Merit & Seniority	Base (Economic)	Total
1	9.25%	3.25%	12.50%
5	4.50	3.25	7.75
10	3.25	3.25	6.50
15	2.00	3.25	5.25
20	0.75	3.25	4.00
25	0.25	3.25	3.50
30	0.25	3.25	3.50
35	0.25	3.25	3.50
40	0.25	3.25	3.50

Total Active Member Payroll

For purposes of calculating the projected contribution for the 2011 fiscal year, the total active member payroll is assumed to increase 10.0% annually for the 1996 Account and be partially offset by payroll decreases for the Pre-1996 Account.

Price Inflation

Price inflation is assumed at 3.0% per year. Price inflation is not directly tied to benefits; however, it is a component of the economic model used to determine total wage inflation.

Mortality

Healthy

2008 IRS Static Mortality Table projected an additional five years (sex specific).

Disabled

2008 IRS Static Mortality Table projected an additional five years (sex specific).

Retirement

Sample probabilities are shown in the chart below.

60	0.0010	0.0010

Summary of Actuarial Assumptions and Methods Continued...

Actuarial Cost Method

Entry Age Normal (level percent of pay) method, with a 30-year, level dollar amortization of the Unfunded Accrued Liability arising from all sources including actuarial gains and losses.

Asset Valuation Method

The Actuarial Value of Assets recognizes investment gains and losses in equal installments over four years. However, the Actuarial Value is limited to no more than 20% greater than or 20% less than the Market Value of Assets. Investment experience on ASA account balances is not smoothed.

Marriage Assumption

100% of members are assumed to be married for purposes of valuing death-in-service benefits. Male spouses are assumed to be three years older than female spouses.

Pay Increase Timing

Beginning of (fiscal) year is used. Payroll amounts stated in the valuation data are amounts projected to be paid during the current year.

Decrement Timing

Decrements are assumed to occur at the beginning of the fiscal year.

Other

Disability and withdrawal decrements do not operate after member reaches retirement eligibility. Only the withdrawal and death decrements operate during the first ten years of service.

Miscellaneous Adjustments

The calculated liabilities and normal costs were increased by 1% to account for the inclusion of unused sick leave in the calculation of average compensation.

Actuarial Equivalence Basis for Optional Forms of Payment

The following is used: 7.5% interest with a 40%/60% unisex blend of the 1983 Group Annuity Male Mortality Table set back three years and the 1983 Group Annuity Male Mortality Table set back seven years.

Explicit Expense Load

None

Cost of Living Adjustment Assumption

1.5% compounded annually on Defined Benefit portion is used.

Employee Census and Asset Data

Census and asset information was furnished as of the valuation date by the Fund's administrative staff. Although examined thoroughly for reasonableness and consistency with prior years, the data was not otherwise audited by the actuary.

The actuarial valuation computations were made under the supervision of a Member of the American Academy of Actuaries (MAAA).

2010

Comprehensive Annual Financial Report

For the Fiscal Year Ended June 30, 2010

Statistical

This part of the Comprehensive Annual Financial Report contains more detailed information regarding TRF's financial viability and pension benefit offerings for understanding the Financial Statements, Notes to the Financial Statements, and Required Supplemental Schedules.

Financial Trends

The following schedules contain historical trends to assist in understanding changes over time in financial performance:

- Schedule of Changes in Net Assets
- Schedule of Benefit Deductions by Type

Demographic and Economic Information

The following schedules contain benefit and member data to provide a better understanding of TRF's benefit offerings:

- Schedule of Benefit Recipients by Type
- Schedule of Average Benefit Payments
- Schedule of Participating Employers

* *Defined Benefit only*

A-1: Provides a monthly benefit for retiree's life. In the event the retiree dies before receiving five years of payments, the beneficiary receives the remainder of the five years (60 months) of guaranteed Defined Benefit pension payments in a lump sum.

A-2: Provides a monthly benefit for retiree's life. The benefit ceases upon the death of the retiree.

A-3: Provides a monthly benefit for retiree's life, including monthly annuitization of member's Annuity Savings Account (ASA). In the event the retiree dies before receiving five years of payments, the beneficiary will receive the remainder of the five years of guaranteed pension payments. The ASA is reduced with each monthly benefit paid; if the retiree dies before reducing the balance to $0.00, the beneficiary will receive a single payment of the amount remaining.

B-1: Provides a monthly benefit for retiree's life. Upon the death of the retiree, the qualified designated survivor receives 100% of the member's Defined Benefit for the remainder of the survivor's life.

B-2: Provides a monthly benefit for retiree's life. Upon the death of the retiree, the qualified designated survivor receives 66 2/3% of the member's Defined Benefit for the remainder of the survivor's life.

B-3: Provides a monthly benefit for retiree's life. Upon the death of the retiree, the qualified designated survivor receives 50% of the member's Defined Benefit for the remainder of the survivor's life.

Survivors**: Provides a monthly benefit for the surviving spouse's or dependent's life. The benefit ceases upon the death of the survivor.

Classroom Disability ***: Available to members with five (5) or more years of creditable service who become disabled as determined by the Social Security Administration while teaching in Indiana.

***(of members who die while in service)*

****Includes Classroom Disability -- Provides a benefit of $125 per month plus $5 for each additional year of TRF - covered service over five years.*
