

State of Indiana Voice as a Service (Sol VaaS)

IOT Services Catalog Product 1186

Service Catalog

Sol VaaS Service Catalog

Introduction

The purpose of the catalog contained on the following pages is to provide a dynamically updated list of services and associated costs for the new State-wide phone system known as State of Indiana Voice as a Service (Sol VaaS).

Below are some important factors to keep in mind when reviewing the Catalog:

- The two primary factors in determining the monthly cost of the service are the Phone Model and the Profile Type.
- The service has been designed so the vast majority of user's needs can be met with the Model 7841 and the Basic Profile.
- **Special Note: An Enhance Profile is not a requirement for a video phone.**

It is also important to understand the role of Jabber in this new service:

- What is Jabber?
 - Jabber is an all-in-one communication tool that streamlines communications and enhances productivity by unifying instant messaging, presence, video, voice, voice messaging, screen sharing, and conferencing capabilities securely into one client on your device (desktop, laptop, or other mobile device).
- What does Jabber cost?
 - Jabber is free and included in the Basic Profile for a single device (handset (hard phone), laptop, desktop, or mobile device)
 - To use Jabber on multiple devices you have two options:
 - ❖ Upgrade to a Basic Plus profile for an additional \$1.80 per month or
 - ❖ Switch to an Enhance Profile that includes Jabber on up to 5 clients
 - *NOTE: Even with the Basic Profile, Jabber can be installed on multiple clients at no additional cost with all features available except for voice calling functionality.*

Sol VaaS Service Catalog

Basic Service Features

Basic Feature	Feature Description
Call Forwarding	Allows calls made to one number to be forwarded to another specified number.
Call History	Also called Call Activity, is a record of all of your inbound and outbound calls.
Call Hold	No verbal communication is possible until the call is removed from hold.
Call Mute	Allows a host to block the broadcast of audio during a call.
Call Transfer Blind	Ability to transfer the caller to another destination without speaking to the destination first.
Call Transfer Consult	Transfers a call to another destination after speaking to the new destination.
Call Waiting	Receive a notification of an incoming call
Call Conferencing	Allows user to join two or more callers together at the same time.
Dial by Name	Ability to enter the extension of the person to contact to be directed to that extension.
Do Not Disturb (DND)	Includes Call Reject and Ringer Off.
Last Number Redial	Dial most recently dialed number
Message Waiting Indicator	A flashing LED light on the phone handset.
On-Hold Dialing	Current call is put on hold when initiating another call.
Privacy -Do Not Disturb	Inbound call is diverted to voicemail.
Speakerphone	Voice call is heard through phone speakers instead of the handset

Sol VaaS Service Catalog

Voicemail Service Features

Voicemail Functions	Function Description
Global Voicemail Access	Ability to access voice mail box from any phone.
Voicemail to Email	Voicemail notification delivers .wav file voicemail message in email inbox.
Private Message Capability	Ability to mark a voicemail private so that the recipient knows to treat it confidentially. A private message cannot be forwarded.
Urgent Message Tagging	Ability to mark a voicemail urgent so it is sent before regular message.
Shared Mailboxes	Voicemail mailbox accessible between multiple phones.
Greeting Mailboxes	Allows you to record personal greetings heard prior to leaving voicemail.
Delivery of Receipt and Read Receipt	Ability to verify a message was received and / or read.
Directory Integration	Ability to integrate a corporate directory into a voice application to enable user lookups so users can dial contacts quickly after looking up their numbers in the directory.
Distribution List	Voicemail message sent to more than one phone at a time.
Alternate Greeting	Different greeting played based on time of day, day of week, holiday or vacation configuration.
Call routing capabilities	Key pressed during voicemail message routes call to alternate destination (e.g. 0 out to operator).

Sol VaaS Service Catalog

Additional Service Features

Auto Attendant Functions	Feature Description
Dial by Name	Call routes by DTMF name key press.
Dial by Extension	Call routes by Extension key press.
Time of Day Routing	Calls route accordingly based on time of day.
Day of Week Routing	Calls route accordingly based on day of week.
Holiday Routing	Calls route accordingly based on holiday schedule.
911 Enable (E911)	
Send enhanced location information to PSAP.	911 call sends correct location info to Public Safety Answering Point.
Notification via email and 911 client to security desk.	Security desk receives an email when a 911 call is made.
Conference in security desk to 911 call.	Security desk can be conferenced in on calls to 911.
Call Detailed Reporting	
Reporting and Search	Ability to search and report on Call Detail Records (CDRs) which provide important data about calls, including the date and time for the call, who made the call, the reason why the call ended.
Daily / weekly / monthly reports	Ability to schedule daily, weekly, or monthly reports for call detail records.
Query capabilities	Ability to query on call detail records.

Sol VaaS Service Catalog

Additional Services

Service	Monthly Cost	Description
Room-Based Video	\$59 per endpoint	<p>Customers with the need to accommodate larger numbers of participants would have a need for larger video endpoints. For this reason, Service Provider offers a Room Based Profile that is designed to support use of room based video endpoints such the Cisco SX Series, C Series, MX Series, and Telepresence Systems, that are not used as desktop or personal devices. The Room Based Multi-Point Conferencing Bridge accommodates up to 25 audio and video endpoints. This provides the host with an access code that they can include on meeting invitations to invite other video and/or audio endpoints. The meeting has a passcode to secure and also provides for custom screen layouts and the ability to share content.</p> <p>Note: Each Room Based Profile has one (1) Multi-Point Bridge included in the cost of the profile.</p>
Additional DID	\$7.27 per user	<p>For users that require an additional DID/extension in addition to their primary DID/extension.</p>
Voicemail Only	\$4.00	<p>The VoiceMail Only Profile is provided for users who do require a corporate DID and voice mail box, but will not be using any endpoint, neither hard-phone nor Jabber client, to answer nor make calls. An inbound DID is provided as well as a voice mail box. Calls inbound to the DID will cover immediately to voicemail. VoiceMail Only Users will be able to retrieve, forward, manipulate voicemails from any phone, or have voice messages delivered to their email (depending on corporate policy for voice-to-email transactions).</p>
Low Use Phone	\$100 One-time setup fee, Charged monthly as a Miscellaneous Profile only when used.	<p>A phone placed in an area with the potential for only being used in extreme emergency situations. The phone uses a miscellaneous profile but is only charged the miscellaneous fee for the months when the device is actually in use. The phone is always activated and ready to make calls. Low Use Phone can be placed in areas such as prison tunnels where the phone is only used in riot situations. Neither voicemail nor a user is assigned to the phone.</p>

Cisco 8800 Key Expansion Module

Cisco IP Phone 8800
Key Expansion Module

Total Monthly Cost

\$6.83

Requires one of the following phone models: 8851, 8861 or 8865

Basic Information

Basic Description

The Cisco IP Phone 8800 Key Expansion Module extends the capabilities of Cisco IP Phone 8851, 8861, and 8865 models with additional buttons and a color LCD display. This key expansion module adds 18 physical keys with access to 18 additional keys, using the page keys, for a total of 36 additional keys. You can connect up to three 8800 KEMS to the IP Phone 8861 and 8865, and up to two 8800 KEMS to the IP Phone 8851. The 8800 KEM comes with a foot stand and all necessary hardware to connect it directly to the base device in the traditional side-by-side fashion.

Scenario in which this should be ordered:

When you need to determine the status of numerous lines beyond Cisco IP Phone 8851, 8861, and 8865 models

Features

Graphical Display

4.3-inch - 480 x 272 pixels - color

Number of phones supported

3

Articulation

You can articulate the display to match the same angle as the Cisco IP Phone 8851, 8861, and 8865 that it is connected to.

Directory-number and feature buttons

18 physical buttons (36 using page keys)

Page buttons

Two page buttons to access each of the 18 buttons
