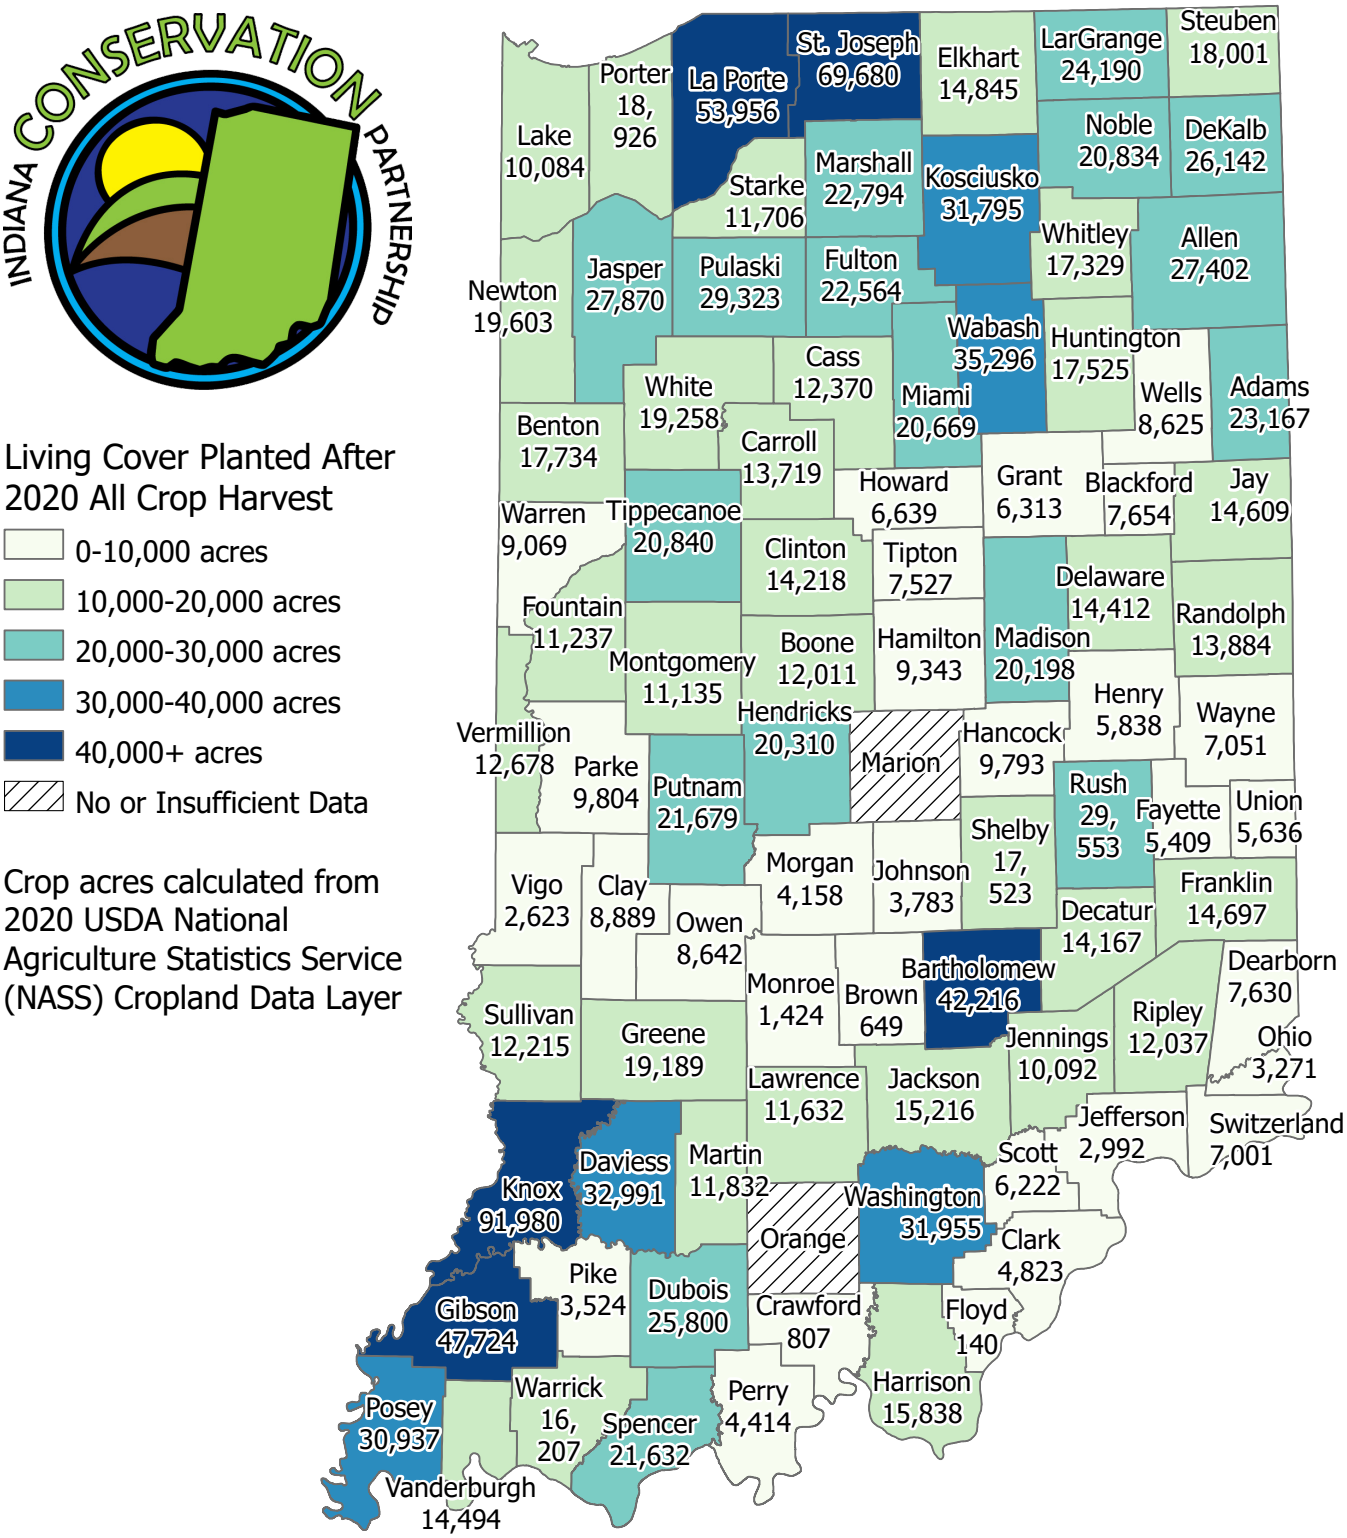
Living Covers Planted After 2020 Harvest of All Crops (acres)



Windshield surveys were conducted no sooner than 10 days after the first predicted period of 3 consecutive daytime temperatures above 40° F, and therefore do not represent field conditions outside of that time frame. For more information about transect surveys see: https://www.in.gov/isda/divisions/soil-conservation/cover-crop-and-tillage-transect-data/
