In regards to projects - this has been 46% of ticket volume for NW and Northern Indiana.

To a large project request, within two (2) working days the operator shall notify the excavator that an excavation area has been determined to be a large project, and the operator shall respond to the request within five (5) working days from the later of receiving notification from an excavator or prior to the scheduled excavation start date for that location if agreed upon.

"Large project request" means an area of excavation measuring more than two thousand (2,000) feet in length.

Multiple excavation notifications in an area may be considered together in determining if the excavations are part of a large project.

In regards to Response time for Operators on Normal notice - 2 full working days not counting the day the ticket was called in.
