30-Day Filing ID No.: 50044

Date Filed: March 28, 2017

Filed Pursuant To: Commission Order No. 43566-PJM 1

Request: Annual amendment to I&M's Demand Response Services Rider D.R.S.1 (Emergency) to update the curtailment payment amounts to reflect the new PJM Curtailment Demand Credit prices that change on June 1st of each year. In addition, the deadline dates for customers to notify the company of their intention to discontinue service under the Rider have been updated by one year.

I&M is also proposing additional language in the tariff regarding each customer's responsibility for complying with all laws, including environmental permits, for behind the meter generation used for demand response. A clarification regarding treatment of individual customers within an aggregate group for testing purposes was added. These proposed changes are in response to guidance issued by PJM regarding behind the meter generation used in conjunction with PJM demand response programs. PJM's guidance was issued in response to Environmental Protection Agency guidance.

30-Day Filing ID No.: 50046

Date Filed: March 31, 2017

Filed Pursuant To: 170 IAC 1-6

Request: To update both the Sales Reconciliation Component (“SRC”) and Energy Efficiency Funding Component (“EEFC”) in the Energy Efficiency Rider in Appendix I in the Vectren North Tariff for Gas Service.

Customer Impact: The residential sales customers (Rate 110) will experience a 3.2% increase in their annual bill. The general sales and school transportation customers (Rates 120/125) will experience a 4.0% increase in their annual bill.

The Energy Efficiency Rider consists of two components, the SRC and the EEFC. The EEFC recovers certain costs resulting from the implementation of the Energy Efficiency Program. The SRC provides the utility with an opportunity to recover its fixed costs even if customer usage declines, allowing the utility to encourage conservation without having its own cost recovery impaired.

The following table illustrates the updated Energy Efficiency Rider for rate 110 and 120/125:

<u>Rate Schedule</u>	<u>(A) Energy Efficiency Funding Component (\$/therm)</u>	<u>(B) Sales Reconciliation Component (\$/therm)</u>	<u>(C) Energy Efficiency Rider Rate (\$/therm)</u>
110	\$0.01474	\$0.01518	\$0.02992
120/125	\$0.01474	\$0.00581	\$0.02055

Tariff Pages Affected: Appendix I – Energy Efficiency Rider, Sheet No. 38, page 2 of 2.

Staff Recommendations: Vectren South has met all requirements for its request. Staff recommends updating both components of the Energy Efficiency.
