# HOW IT ALL WORKS

So, now you know how Indiana taxes help us throughout the state.  
Let's see how the process works:

The **Indiana Department of Revenue** is where the tax dollars are collected.

The **Treasurer of State Office** invests the tax dollars. Investing is a way of increasing the money available to help.

The **Auditor of State** is the office where the checks are written to pay for Public Safety, Education, Transportation and General Government.
