We received your letter on March 4, 2024 that requests termination of NPDES general permit coverage under ING670000 for wastewater discharges of hydrostatic testing of commercial pipelines for the above-mentioned project. The letter states that your company has completed all hydrostatic test discharges associated with this project and requests that NPDES general permit coverage be terminated.

Based on this information, our Office concurs that your NPDES general permit coverage is no longer required and may be terminated. Therefore, NPDES General Permit Coverage No. ING670119 is hereby **terminated, effective March 31, 2024.**

The appeal must be initiated by filing a petition for administrative review with the Office of Environmental Adjudication (OEA) within fifteen (15) days of the emailing of an electronic copy of this letter or within eighteen (18) days of the mailing of this letter. A copy must also be served upon IDEM. The addresses are as follows:

You are reminded that the submittal of monitoring data via NetDMR is required for all months up to the termination date of this general permit coverage. Also, future discharge to waters of the state must be preceded by the submittal of an NPDES application at least 180 days prior to the commencement of such discharge, unless a later date is allowed by rule or by an applicable NPDES general permit.
