

APPENDIX F:
**IDEM'S 305(B)/303(D) MONITORING, ASSESSMENT, REPORTING AND
LISTING SCHEDULE**

2024 Indiana Integrated Water Monitoring and Assessment Report – Appendix F

Sequence in IDEM's Rotating Basin Monitoring Strategy ¹	Basin(s)	Basin Monitored	Results for the Basin Assessed	Draft 303(d) List Revised Based on Assessment Results and Published for Public Comment Period ²	Assessment Results Published in Indiana's Integrated Report	Draft 303(d) List Submitted to U.S. EPA for Approval
6	Lower Wabash River Basin	2016	2017	2017	2018	2018
7	Upper Illinois River Basin	2017	2018	2019	2020	2020
8	Great Lakes Tributaries	2018	2019	2019	2020	2020
9	Ohio River Tributaries	2019	2020	2021	2022	2022
1	West Fork White River Basin	2020	2021	2021	2022	2022
2	Patoka River Basin	2021	2022	2023	2024	2024
3	East Fork White River Basin	2022	2023	2023	2024	2024
4	Great Miami River Basin	2023	2024	2025	2026	2026
5	Upper Wabash River Basin	2024	2025	2025	2026	2026
6	Lower Wabash River Basin	2025	2026	2027	2028	2028
7	Upper Illinois River Basin	2026	2027	2027	2028	2028
8	Great Lakes Tributaries	2027	2028	2029	2030	2030

¹ In accordance with IDEM's rotating basin monitoring strategy, probabilistic monitoring is conducted in one major river basin each year so that comprehensive monitoring and assessments can be completed for the entire state.

² All impairments identified through IDEM's rotating basin assessments placed on Indiana's draft 303(d) List of Impaired Waters are made available for 45-day public comment period prior to submission of the 303(d) list to U.S. EPA. Because basin assessments made during a listing year occur after the draft 303(d) list is published for public comment, any impairments identified are held for the next listing cycle to ensure the public an opportunity for review and comment. Therefore, assessments made during a listing year are reported in the Integrated Report and placed on the draft 303(d) List of Impaired Waters during the next scheduled reporting cycle.
