

APPENDIX I:
TREND AND TROPHIC STATUS OF INDIANA'S LAKES

Table I-1: Definitions for acronyms used to describe trends and trophic states in Table I-2.

Acronym	Description	
Carlson Trophic State Index (TSI)		
TSI (CHL)	Trophic State Index score for Chlorophyll a	
TSI (TP)	Trophic State Index score for Total Phosphorus	
TSI (SD)	Trophic State Index score for Secchi Depth	
Trophic State		
O	Oligotrophic	TSI (CHL) Score <40
M	Mesotrophic	TSI (CHL) Score 40-50*
E	Eutrophic	TSI (CHL) Score 50-70
H	Hypereutrophic	TSI (CHL) Score >70
U	Unknown	No TSI (CHL) score available
Trend		
I	Improving	
S	Stable	
D	Degrading	
F	Fluctuating	
U	Unknown	

*Lakes with a TSI (CHL) score of 50, which is on the boundary between mesotrophic and eutrophic conditions, are evaluated with their corresponding TSI scores for TP and SD along with any other available information and classified based on the best professional judgment of IDEM scientists.

2024 Indiana Integrated Water Monitoring and Assessment Report – Appendix I

Table I-2: Trophic Status and Trends of Indiana Lakes based on Carlson TSI (CHL) scores. Scores for TSI (SD) and TSI (TP_{AVG}) are provided for the purposes of comparison. Lakes marked with an asterisk (*) have been monitored by the Indiana Clean Lakes Program but are not yet geospatially indexed (assigned an Assessment Unit ID) and entered into the ATTAINS database. The basin, hydrologic unit code, and size of these waterbodies must be verified through the reach indexing process.
