RE: SAFE Mortgage Loan Originator Test - New State Components Released

Date: February 22, 2010

We are pleased to let you know that our next group of state test components is now available. Mortgage loan originators who wish to become licensed in California, Colorado, Indiana, Tennessee, and Utah may now enroll and take these state test components.

We ask that you please remind your members, who are or will be state licensed MLOs, that they must pass the National Test Component. The national test component, as well as the currently available state components, is available now at nearly 500 test centers nationwide. We recommend mortgage loan originators enroll, schedule and take the national component as soon as possible to ensure test center appointment availability.

Your members may view the available test component content outlines and detailed information about enrolling and scheduling a test session by visiting the [Testing page](#) of the NMLS Resource Center. The MLO Testing Handbook guides candidates through the entire testing process.

We encourage you to please share this information with your members. If you have any questions, please feel free to contact Anne Altman, Manager of Mortgage Testing Programs at aaltman@csbs.org or 202.728.5750.
