<b>PROPOSED CODE CHANGE (Check One)</b>		
<input type="checkbox"/> Change to read as follows <input checked="" type="checkbox"/> Add to read as follows <input type="checkbox"/> Delete and substitute as follows <input type="checkbox"/> Delete without substitution		
<p><b>Calculation procedures used to comply with this section shall be by use of computer software tools capable of calculating annual energy consumption of all building elements that differ between the "standard reference design" and the proposed design. REScheck, from the US Department of Energy, is an example of an approved software tool.</b></p>		
Reason		
This is allowed in 2009 IECC and is in our current Indiana Residential Code. Certifiable documents can be relatively easily processed to show alternate compliance with this section of the Code. Very little added cost would result in the approval of this proposed change.
