**PRACTICAL SKILLS AND EXAMINATION HANDBOOK**

**Scenario 2 Directions**

This scenario is designed to be completed by a company of four. The company of four will be divided into two teams of two. One team will complete the skills assigned to team 2a and the other team will complete the skills assigned to team 2b. Once the scenario is completed the teams will switch assignments and complete the scenario again. This will ensure that all candidates participate in all skills assigned. It is up to the evaluators to ensure that candidates share in the work equally. Evaluators must be familiar with all associated skill sheets prior to the commencement of the skills examination. Apparatus used in this scenario must be placed in a position that will obscure the scenario activities from candidates at other skill stations. Candidate Companies must stay together at all times. It is the responsibility of the evaluators to ensure that candidates do not leave their skill station until they are directed to rotate to the next skill station.

Prior to commencement, evaluators will make team assignments, brief all candidates of the scenario and conduct a PPE inspection. Once this is complete the Lead Evaluator (or designee) will be notified that the crew is ready to begin. Candidates will mount the apparatus and proceed to the incident. Team 2a will dismount the apparatus, conduct a scene size up and check for hazards. Each member will report their findings individually to the evaluator and wait for instructions to begin search. Team 2b will dismount the apparatus, carry and raise a ground ladder for a conscious victim rescue. Once the ladder is in place, team 2a will climb the ladder, force entry through a window, locate the victims and remove the victim/s from the hazard area (assist victims onto ladder). While Team 2a locates and readies the victims Team 2b will select and ready an uncharged handline for hoisting, climb the ladder, hoist the line and prepare to receive the victim from the search crew. Each member of Team 2a will be required to assist one victim, each member of Team 2b will be required to bring a conscious victim down a ladder. Once the scenario has been completed twice the company will place the apparatus back in the ready position.
