PRACTICAL SKILLS AND EXAMINATION HANDBOOK

Scenario 5 Directions

This scenario is designed to be completed by a company of four. The company of four will be divided into two teams of two. One team will complete the skills assigned to team 5a and the other team will complete the skills assigned to team 5b. Once the scenario is completed the teams will switch assignments and complete the scenario again. This will ensure that all candidates participate in all skills assigned. It is up to the evaluators to ensure that candidates share in the work equally. Evaluators must be familiar with all associated skill sheets prior to the commencement of the skills examination. Apparatus used in this scenario must be placed in a position that will obscure the scenario activities from candidates at other skill stations. Candidate Companies must stay together at all times. It is the responsibility of the evaluators to ensure that candidates do not leave their skill station until they are directed to rotate to the next skill station.

Prior to commencement, evaluators will make team assignments, brief all candidates of the scenario and conduct a PPE inspection. Once this is complete the Lead Evaluator (or designee) will be notified that the crew is ready to begin. Candidates will mount the apparatus and proceed to the incident. Team 5a will be led to constricted passage area and be instructed on the problems encountered. Once they complete that phase each member will complete the emergency operations portion individually and out of sight of each other. Team 5b will set up and perform RIT operations.

This scenario should be completed using the entanglement prop, a wall prop or something similar. If a candidate is unable to pass through restricted passage due to his/her size then attempts to find an alternative should be made.
