Scenario 6

Flammable
Gas Fire

Condition

Upon your arrival on the scene you are told that there is a 250 pound flammable gas cylinder leaking and on fire. You are to approach the cylinder and shut off the cylinder valve.

SKILL	Skill Sheet	COMPLETED
Appropriately receives and acknowledges alarm	M-80	<input type="checkbox"/> <input type="checkbox"/>
**Demonstrate the donning of structural firefighter protective clothing	M-3	<input type="checkbox"/> <input type="checkbox"/>
Safely and appropriately mounts apparatus, securing seat belt and dismounts	M-1	<input type="checkbox"/> <input type="checkbox"/>
**Performs scene size-up (assume command and identify hazards)	M-88	<input type="checkbox"/> <input type="checkbox"/>
**Control a pressurized flammable gas container	M-87	<input type="checkbox"/> <input type="checkbox"/>

Critical Criteria

*Candidate fails to properly don PPE	
*Candidate fails to ensure scene safety before operating in the "Hazard Zone"	
*Candidate fails to maintain control of the hoseline

Scenario 6 Directions

This scenario is designed to be completed by a company of four. It is up to the evaluators to ensure that candidates share in the work equally. Evaluators must be familiar with all associated skill sheets prior to the commencement of the skills examination. Apparatus used in this scenario must be placed in a position that will obscure the scenario activities from candidates at other skill stations. Candidate Companies must stay together at all times. It is the responsibility of the evaluators to ensure that candidates do not leave their skill station until they are directed to rotate to the next skill station.

Prior to commencement, evaluators will make team assignments, brief all candidates of the scenario and conduct a PPE inspection. Once this is complete the Lead Evaluator (or designee) will be notified that the crew is ready to begin.

Candidates will mount the apparatus and proceed to the incident. The company will dismount the apparatus, conduct a scene size up and check for hazards. Each member will report their findings individually to the evaluator. The company will pull two attack lines and control the flammable gas cylinder fire. Each team member must hold both nozzle and back up positions so the evolution will be run twice. The evaluator will act as the company officer and be placed in-between the two attack lines.

If the training site does not have a flammable gas cylinder prop the Lead Evaluator shall contact their DFTC and attempt to acquire one of the state flammable gas trailers.
