

# IDHS PUBLIC SAFETY PORTAL

**IDHS Public Safety Portal**  
**May 1, 2019**

The Indiana Department of Homeland Security has launched some major improvements to the public interface for obtaining elevator permits, elevator licenses and amusement ride permits.

This new system, which greatly enhances the registration, permitting and certification process for IDHS, will take advantage of the state's Single Sign-on process. The Public Safety Portal provides greater visibility to the status of licenses and permits, including their expiration dates, and provide an easy method of online payment. Payments may be made through your choice of eCheck or credit card.

As with any upgraded system, it will come with increased costs to maintain. All processed payments will include a 7 percent convenience and maintenance fee.

Included below are the items currently available for new applications and renewal processing through this new system. Other permitting procedures will be phased in later in the year with fireworks permitting scheduled to launch before May 31. Please go the <https://publicsafety.dhs.in.gov> to obtain your ID and password now. Once you login in to the new system, there will be more up-to-date information as to the implementation timeline.
