

OBJECTIVES
EMERGENCY RESPONSE TO TERRORISM
BASIC CONCEPTS

1. Define domestic and international terrorism per the current Department of Justice definition.
2. Illustrate, through case histories, various types of potential incidents.
3. Define differences and similarities between responding to terrorist and non-terrorist incidents.
4. Recognize suspicious circumstances which may indicate possible terrorism.
5. Define the appropriate use of shielding at CBRNE incidents.
6. Define the use of time and distance as protective measures at CBRNE incidents.
7. Define the basic steps of emergency decon and routine post-exposure decon.
8. Identify unique challenges that may confront responders when attempting to implement scene control.
9. State what hazard and risk components influence public protection considerations.
10. Describe what resources should be utilized to maintain perimeter security at a terrorist incident.
11. Identify outward warning signs of CBRNE incidents.
12. Define and explain tactical considerations associated with acts of terrorism involving biological, nuclear, incendiary, chemical, and explosive materials.
13. Identify and list specialized equipment needed to support tactical operations involving CBRNE incidents.
14. Given a case study, identify tactical considerations for each incident category.
15. Describe and define the authorities and responsibilities in Presidential Decision Directive 39.
16. Identify crime scene issues which must be addressed when managing an incident involving potential criminal activities.

17. Define applicable resources referenced in the Federal Response Plan (FRP) and the FRP Terrorism Annex.

18. Identify the preliminary indicators for transition from emergency phase to recovery and termination.

19. Define unique debriefing and security issues.
