Company otherwise expressly disclaims any warranty against infringement or misappropriation with respect to any third party Program Products and transfers to Customer only such rights as Company may have, if any, under its agreements with said third parties.

Customer agrees that its sole and exclusive remedy and Company's sole obligation, if a licensed program warranted hereunder fails to conform to the applicable design specifications and Customer has advised Company of such failure in writing during the term of the warranty, is for Company to provide programming services to attempt to correct any defect. For purposes of this Agreement, non-conformance to design specification and the term "defect" shall mean only significant deviations from the design specifications for such current release of the licensed program.

## VIII. RETURN UPON TERMINATION

Within thirty (30) days after the termination or cancellation for any reason of a license granted hereunder, Customer shall deliver to Company the licensed program products and related materials related to such licensed program products and all copies thereof in whichever form, including partial copies which may have been modified by Customer or Company, or an executed Company program products license certificate of discontinuance so certifying. **\* COURTS DATA CONVERSION**

Shelby County, ("Customer"), is expecting the data from their existing "Court System" software application, currently licensed by Computer Systems of Indiana, ("CSI") to be converted to Manatron, Inc., ("Company"), "Gavel" Courts software application. The following items are required from the customer in order for the Company to attempt this data conversion. The Customer will be responsible for providing the existing "CSI" Courts system's present data files with the file layouts to the Company. The Customer will provide the data in flat ASCII files fixed length format with file description. The customer must include file layouts with documentation on each file, data types and descriptions of each field, relationships between fields such as common fields, etc., for each file. Each record needs to be terminated with a CR character. Media should be standard QIC tape, 6" by 4" cartridge size; or 4mm DAT. Once the existing data is provided in the specified format, Manatron, Inc. programming staff will analyze the data. File dumps and layouts will be reviewed with the Customer to verify the data elements; detailed specifications are prepared and review prior to writing the conversion routines. A preliminary test conversion run is delivered to the Customer for inspection, preview, and sign-off by the appropriate Shelby County staff to verify and determine the level of success that data elements have been properly converted to Manatron's "Gavel" data base. Any final changes if necessary will be made at that time. The conversion routines will be perfected and another test conversion completed. The test conversion is performed on all case types before a full data base conversion is performed. This period of time will provide Manatron the ability to determine the approximate final conversion time.

Conversion can only be as successful as the data provided for the conversion process. To the extent that data can be provided in the specified format, the above conversion process, insures to the greatest extent possible, that the conversion will be successfully performed. Customers conversion costs are based on the actual time to write the conversion program, test routines, inspection preview, and processing of the final conversion process, up to the delivery of a successfully completed conversion.

In the event that the Customer is unable to provide the data from their existing "CSI" Courts system to the Company in the format specified above. The Company will then work with the Customer in determining a method in which the data conversion process can be accomplished. The Customer will be responsible for acquiring any additional resources, cost, or expenses that may be necessary, associated with accomplishing the process, so that the data files that the Customer provides to the Company are in the Company's specified format. This Agreement does not include any cost that may be associated with any additional service as define in this paragraph. The Company can provide and assist the Customer with these services, if necessary, upon request at our current time and material hourly rate in effect at the time of service.
