## Gross Assessed Value Changes 2007-2009 (Taxes Payable 2008 - 2010)

---

Prepared by the Department of Local Government Finance  
June 25, 2010

### Key Findings

Assessed value (“AV”) growth has slowed for taxes payable in 2010 relative to the previous year. Overall residential AV growth has slowed from an increase of 3.1% last year to a decrease of 0.2% this year. Commercial AV growth has slowed from 2.8% to 1.5%. Finally, industrial AV growth has slowed from 4.4% to 1.7% despite some large increases in investment in certain areas. While there is variation at the county level, 81% of counties reported declining growth in residential AVs, while 57% reported declining growth in commercial AVs, and 56% reported declining growth in industrial AVs.

### Data and Methodology

This report relies on parcel-level data submitted by the County Assessor, and covers only those 90 counties that have submitted real property data files that are compliant with the data standards of 50 IAC 23 for taxes payable in 2010. Lake and LaPorte counties had not submitted their 2009 Pay 2010 certified net AVs to the Department of Local Government Finance (“Department”) as of the date of this report. The report separates parcels into the “residential”, “commercial”, and “industrial” categories based upon the property class codes assigned to the parcel by the Assessor. It then adds up the total assessed value in each category for each of the three years and calculates the percentage changes between these totals. The total AV is not adjusted for changes in number of parcels; if the number of parcels in a class increases, the AV change would reflect that increase. Therefore, these increases are the total change in AV and are not necessarily indicative of the AV change in the average parcel.

On the section of the report tracking percentage changes at the taxing district level, the taxing district information is taken from the County Assessor’s parcel-level data and matched to the state-assigned taxing district number list for each county. If one or more records in the parcel-level data do not have a taxing district matching one of the state-assigned numbers, the record is included in the report but the taxing district is indicated by “(possible data error)”, signifying that the Department was unable to match the district code provided to one of the state-assigned district numbers.
