

## **Megan Abraham**

Megan Abraham has worked for the Department of Natural Resources, division of entomology and plant pathology since 2007. Upon graduating from Purdue University, where she obtained her BS in Wildlife Science and her Master's Degree in Entomology, Megan moved to the west coast and worked with Naval Facilities Engineering Command (NAVFAC). Working as a civilian contractor, she was charged with assisting military bases in the western region with nuisance pests including everything from Asian lady beetles to bats. Currently, Megan is involved in various projects within the division of entomology and plant pathology including surveying for and conducting outreach with the public on Emerald Ash Borer. In her free time, Megan enjoys exploring the outdoors and showing her daughter Jayden and husband Ken that bugs aren't always scary.
