

*Public Notice:*

*Removal of three structures on land next to Splinter Ridge Fish and Wildlife Area*

*The Indiana Division of Fish and Wildlife is attempting to acquire a parcel of land, known locally as the Brown Tract, to fill in a corner of Splinter Ridge Fish and Wildlife Area and increase the amount of public land available in the area. If the property is acquired, removal of the structures on the property is being proposed. Three structures, a barn and two small cabins are not needed for fish and wildlife area operations. There is a small cemetery just north of the barn, which will not be disturbed by any development activity. The Division of Fish and Wildlife wishes to solicit comments about any potential impacts to cultural or historic resources related to this project. Please send any comments to Steve Mund, Property Manager, Crosley Fish and Wildlife Area, 2010 South SR 3, North Vernon, Indiana*
