

Addendum -RESOURCE MANAGEMENT GUIDE

State Forest: Morgan-Monroe
Marking Forester: Amy Zillmer

Compartment 13 Tract 10
Date: October 15, 2008

The original tract management guide called for restricted harvesting along portions of the northeast facing slope due to terrain. This hillside moves from moderate slopes to steep drop offs near the bottom. The original timber type map delineated boundaries of this area against a topographical map. Based upon on ground recon during marking, many of the areas delineated are still conducive to traditional logging methods. A new map has been created depicting a more accurate delineation of these designations. Areas that are excessively steep, wet, or lack sufficient routes will be generally avoided or receive limited harvesting during commercial logging.
