Imagine an area filled with canyons and ravines far too rugged for even Native Ameri- can settlement. McCormick's Creek State Park is such an area. Long before pioneers entered the land now known as McCormick's Creek, the Miami roamed, camping along the banks of the White River to the north and south. The eventual park land became a hunting ground, offering deer, squirrel, grouse, and fish from its deep woods and streams.

Within the park area, the land was divided into farms, and farming. McCormick's Creek ran through the land. A narrow canyon was formed, and the stream carved its way through the area. Where the stream widened, it became the old Doctors Denkewalter and Dr. Denkewalter, a physician interested in the site's scenic and recreational beauty. The subsequent development of the state park included the acquisition of surrounding farms and homesteads as well as the development of the park's facilities and activities.

With the death of Dr. Denkewalter in 1914, his estate was remodeled and new brick siding was added. Later that year, the inn was acquired by the state and named the Canyon Inn. In 1927, the state purchased the Wolf Cave property, and the inn was lengthened. The acquisition of surrounding farms and homesteads as well as the development of the park's facilities and activities.

The park is a delightful combination of history set in modern surroundings. The Inn's pool was opened for swimming in the late 1950s. Please let wild animals remain wild. Feeding deer is prohibited. Feeding of all wild animals can result in harm to both animals and people. Animals who depend on handouts become a nuisance to park visitors and a danger to themselves. Please lock all food and coolers inside cars or campers. Roll up car windows tightly.

Please carry out all trash you produce in order to keep your park clean and beautiful for others to enjoy.
