Discover how limestone shaped the development and identity of the people that settled in the Salt Creek communities during the 1800s and early 1900s during a guided cycling tour near Monroe Lake.

Participants will learn about the characteristics of our local limestone and what makes it unique, how that stone influenced early settlers, limestone’s role in the construction of Monroe Lake and the reservoir dam, and how limestone impacts the community today.

Program fee is $15 per person.
Limited to 10 people; minimum age of 15.
Preregistration required by April 28.

Recommended for intermediate to advanced bicyclists. The route is approximately 25 miles over rolling hills. Average travel speed is expected to be about 13 mph. Total trip length (including all stops) is approximately 4hr 30 min.

Participants must bring their own bike (suitable for the hilly terrain and distance), helmet (mandatory!), water, and snacks. The route includes at least one stop for bathrooms and water refills.
