The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of $0.10 per 8 1/2 " X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director
Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

For a petition to be considered valid it must:
1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.

Application #: FW-27883
Stream: Smith Ditch
Applicant: City of Crown Point
Tris Miles
11035 Broadway, Suite F
Crown Point, IN 46307

Description: A new culvert crossing will be placed in Smith Ditch to carry the 107th Avenue extension project across the ditch. The new crossing will consist of one 19' x 9'5" x 150' corrugated metal single radius arch culvert set in concrete headwalls. It will have upstream and downstream invert elevations of 671', NGVD and 671', NGVD, respectively. The inlet ends of the culvert will be beveled. The culvert will be built on a radius to align with the natural contours of the streamflow. Minor channel shaping will occur both downstream and upstream of the crossing to provide a better flow transition into and out of the culvert system. The shaping will be confined to the construction right-of-way. The shaped areas will be lined with an 18" thick layer of riprap. The approach roads will be constructed on fill placed to a maximum height of 12' over the existing elevations. The crown of the roadway over the culverts will be at 2', NGVD. Details of the project are contained in information received electronically at the Division of Water on February 27, 2015 and in plans and information received at the Division of Water on

Location: Approximately 2,900' northwest of the I-65/109th Avenue interchange in Crown Point, 1,400 ft east of S.R. 53, and 1,500 ft north of 109th Ave. near Crown Point, Center Township, Lake County Section 3, T 34N, R 8W, Crown Point Quadrangle Quad Code: 4108743

Statute/Rule: Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10

RASR010
Application # : FW-27885
Stream : Beanblossom Creek
Applicant : Indiana Department of Transportation
            Richard L Phillabaum
            100 North Senate Avenue, Room N642
            Indianapolis, IN  46204

Description : The superstructures of the existing 3-span bridges carrying northbound and southbound lanes of State Road 37 over Beanblossom Creek will be widened to three (3) lanes and two (2) shoulders in each direction to carry the proposed Interstate 69 roadway over the stream. The existing 42'-6" bridge decks will be increased by extending the abutments and piers toward the median (between existing bridges) increasing the out-to-out widths of each bridge to 63'-0". The approach roads are also being widened throughout the floodway limits, and will not be raised. A temporary pump around and a temporary crossing, limited to 100 linear feet of channel impact, may be installed during construction. Details of the project are contained in information received electronically at the Division of Water on March 4, 2015 and in plans and information received at the Division of Water on March 4, 2015.

Location : At the existing State Road 37 bridges over Beanblossom Creek near Bloomington, Bloomington Township, Monroe County

Stream          : Griffy Creek

Applicant       : Indiana Department of Transportation
Richard L Phillabaum
100 North Senate Avenue, Room N642
Indianapolis, IN  46204

Description     : The superstructures of the existing 5-span bridges carrying northbound and southbound lanes of State Road 37 over Griffy Creek will be widened to three (3) lanes and two (2) shoulders in each direction to carry the proposed Interstate 69 roadway over the stream. The existing 42'-6" decks will be increased by extending the abutments and piers toward the median (between existing bridges) and one new pier added to the northbound bridge (Pier No.2) that is the same size and aligned with Pier No. 2 on the southbound bridge, thereby increasing the out-to-out width of each bridge to 63'-0". The approach roads are also being widened throughout the floodway limits, and will not be raised. A temporary pump around and a temporary crossing, limited to 100 linear feet of channel impact, may be installed during construction. Details of the project are contained in information received electronically at the Division of Water on March 4, 2015 and in plans and information received at the Division of Water on March 4, 2015.

Location        : At the existing State Road 37 bridges over Griffy Creek near Bloomington, Bloomington Township, Monroe County
Section 8, T 9N, R 1W, Bloomington Quadrangle

### Application # : FW-27889

### Stream : Eagle Creek

### Applicant : Zionsville Parks and Recreation Department  
Matthew Dickey  
1075 Parkway Drive  
Zionsville, IN  46077-1951

### Description : This specific project aims to stabilize approximately 525’ of bank that has seen severe erosion on Eagle Creek as it passes through Starkey Park Nature Preserve in Zionsville, IN. Root wads, geolifts, live stakes, constructed riffles, and j-hooks will all be used to ensure the stream bank is stabilized while creating excellent habitat for fish, amphibians, and other wildlife. The channel will be redesigned to reduce erosion as well as help Eagle Creek become a more stable stream system. Details of the project are contained in information received electronically at the Division of Water on March 4, 2015 and in plans and information received at the Division of Water on

### Location : Along the western bank of a 525’ stretch of Eagle Creek; more specifically along Eagle Creek as it passes through Starkey Park Nature Preserve approximately half a mile north of I-865 near Zionsville, Eagle Township, Boone County  
Section 11, T 17N, R 2E, Zionsville Quadrangle  
Quad Code: 3908683

Application #: PL-22673  
Lake: Webster Lake  
Applicant: Dixie Sternwheeler Incorporated  
Thomas R Plew  
PO Box 674  
North Webster, IN 46555

Description: A 581 square foot area used for docking a sternwheel tour boat will be dredged by removing a maximum of 3' of debris from the lakebed. The dredged area will be the 28' along the north seawall and will extend lakeward (south) to the existing boat dock. The dredging will be performed by a backhoe. The excavated material will be transported off site to an upland area. Details of the project are contained in information and plans received at the Division of Water on February 17, 2015 and February 25, 2015.

Location: 403 South Dixie Drive

Lake: Sylvan Lake
Applicant: Jeffrey Fuze
7522 Popp Road
Fort Wayne, IN 46845

G W Sedgwick Seawall Construction
George W Sedgwick
214 East Diamond Street
Kendallville, IN 46755-1750

Description: A new underwater beach will be constructed in front of the property of the applicant on Sylvan Lake to provide an area suitable for swimming. The beach will consist of a 4" to 6" thick layer of 7/64" clean, washed pea gravel placed directly on the lakebed. The beach will begin approximately 1 foot east of the western property line and will extend easterly across 29' of the 60' frontage. It will have a maximum lakeward projection of 20' or a depth of 5' below the normal level of the lake. Also, a existing 60 foot seawall will be refaced across a portion of the 60 foot frontage of the applicant on Sylvan Lake to prevent deterioration. The refacing will consist of reinforce, poured in place concrete which will be tied to the existing wall with steel reinforcing rods. The refacing will have a maximum thickness of 12" and will be sloped on the lakeward side. A 12" wide layer of glacial stone will be placed at the base of the wall for toe protection. A 36" wide concrete walkway will be constructed on top and landward of the lakeward face of the refaced wall. Details of the project are contained in information received electronically at the Division of Water on February 26, 2015 and in plans and information received at the Division of Water on
