The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of $0.10 per 8 1/2" X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director
Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana  46204

For a petition to be considered valid it must:

1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana  46204

The request must identify the application by either the application # or the applicant's name and the project description.
Application # : FW-27873
Stream : White Lick Creek
Applicant : Town of Avon
Ryan Cannon
6570 East US Highway 36
Avon, IN 46123-9178

Description : Approximately 1570’ of a 3770’ of a multi-use trail will be constructed. The trail will be 10’ wide with 2 foot buffers and a 4:1 side slope. It will be approximately 9¼" thick (3¼” asphalt on a 6” aggregate base) and will tie into an existing paved trail. Existing sewer manhole castings will be adjusted or reconstructed to grade. Woody riparian vegetation and a Midwestern riparian mixture or a comparable seed mixture will be planted to mitigate for the removal of approximately .20 acres of trees. Details of the project are contained in information and plans received at the Division of Water on February 18, 2015.

Location : Beginning in the Washington Township Community Park approximately 770’ south of the US 36 crossing, east for 800’, north along the west side of County Road 625 East for 1360’ and east for 1450’ to the Lake View Lake in Avon Town Hall Park at Avon, Washington Township, Hendricks County Section 10, T 15N, R 1E, Brownsburg Quadrangle Quad Code: 3908674 UTM Coordinates: Downstream 4401311 North, 549958 East

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10

Applicant: Indiana Department of Transportation
Sandra A Bowman
100 North Senate Avenue, Room N642
Indianapolis, IN 46204

Description: The existing culvert under State Road 116, that is 45' long, 10' span, 6' tall, with wingwalls, will be replaced with a new structure. The new structure will be a precast reinforced concrete 4-sided culvert with a 16' span, 7' tall and a length under State Road 116 of 50' including wingwalls. Structure will be sumped 18". Proposed placement of 30 tons of revetment riprap upstream of the structure, and 31 tons of revetment riprap downstream, will be placed 1' deep over geotextile fabric. Temporary pump around will be necessary. Temporary measures in the channel will be in place for no more than 3 months. There will be no change to the profile grade. Disturbed areas, not covered by riprap, will be restored to original grade and will be re-seeded. (INDOT Des# 1006122.) Details of the project are contained in information and plans received at the Division of Water on February 25, 2015.

Location: At the State Road 116 crossing near Bluffton, Lancaster Township, Wells County

Description: All scheduled maintenance will take place along the east bank of Little Eagle Creek. The scope of work includes clearing and removing brush, trees, and debris from embankment, repairing a vertical gate structure, installing riprap, installing a gravity retaining wall for streambank stabilization, and construction of a dry detention basin. A geoweb wall will be placed from station 17+24.38 to station 18+77.44 and a geoweb layback to wall transitional area will be placed from station 16+99.79 to 17+24.38 and station 18+77.44 to 19+01.70. These two areas will be cut back into the existing bank and no fill will be placed within the existing stream. A riprap end section will be placed from station 15+91.84 to 15+97.84. Geoweb layback areas will be placed from stations 15+97.84 to 16+99.79 and 19+01.70 to 19+54.33. The above mentioned erosion repairs cumulatively, will result in a 160.58 linear feet of streambank impact and 240.87 square feet (0.006 acre) of fill below the OHWM of Little Eagle Creek. Details of the project are contained in information received electronically at the Division of Water on March 6, 2015 and in plans and information received at the Division of Water on

Location: Beginning 50’ north of the Washington Street Bridge and continues upstream to Cossell Road Bridge along the east bank of Little Eagle Creek near Indianapolis, Wayne Township, Marion County Section 5, T 15N, R 3E, Indianapolis West Quadrangle Quad Code: 3908672

Statute/Rule: Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10
Duke Energy proposes to continue borrow activities within a fallow agricultural field which contains both emergent and scrub-shrub wetlands, active agricultural fields, and peripheral wooded wetlands. These borrow activities are necessary to comply with IDEM for both the Gibson Station FSS Landfill and East Ash Pond closure. The project site has been partially excavated with approximately 4.40 acres of emergent and 1.44 acres of shrub-scrub impacted. Approximately 3.64 acres of emergent wetland and 1.34 acres of forested wetland will be impacted by borrow activities. Compensation for unavoidable impacts, totaling 10.82 acres, includes a combination of wetland preservation and wetland creation totaling approximately 35 acres (total acreage of all mitigation is approximately 44 acres, but 9 acres of the 44 acres is considered contingency). All 44 acres (approximate) of mitigation will have a protection instrument filed with the county after review and approval of the instrument is granted by the USACE. Details of the project are contained in information received electronically at the Division of Water on March 6, 2015 and in plans and information received at the Division of Water on

Gibson County; Montgomery Township; Sections 3, 4, 33, 34; Townships 1S, 2S; Range 12W; Owensville Quadrangle.

Borrow Site - Take I-70 west approximately 73 miles to US 41 (Exit 7) in Terre Haute. Take US 41 South, toward Evansville, approximately 80 miles to Princeton. Take SR 64 west, toward Mt. Carmel IL approximately 9 miles to CR 965 W. Turn south on CR 965 W and go approximately 1.5 miles. The borrow site is on the east side of CR 955 W.

Mitigation Area 1 - Take I-70 west approximately 73 miles to US 41 (Exit 7) in Terre Haute. Take US 41 South, toward Evansville, approximately 80 miles to Princeton. Take SR 64 west, toward Mt. Carmel IL approximately 7.5 miles to CR 850 W. Turn south on CR 850 W and go approximately 0.5 miles. The mitigation area is on the west side of CR 850 W.

Mitigation Area 2 - Take I-70 west approximately 73 miles to US 41 (Exit 7) in Terre Haute. Take US 41 South, toward Evansville, approximately 80 miles to Princeton. Take SR 64 west, toward Mt. Carmel IL approximately 9 miles to CR 965 W. Mitigation Area 2 is in the south quadrant of the intersection of SR 64 and CR 965 W.

Mitigation Area 3 - Take I-70 west approximately 73 miles to US 41 (Exit 7) in Terre Haute. Take US 41 South, toward Evansville, approximately 80 miles to Princeton. Take SR 64 west, toward Mt. Carmel IL approximately 9 miles to CR
965 W. Turn south on CR 965 W and go approximately 2.5 miles. Mitigation Area 3 is on the north side of the road.

Applicant : Sweet Cars Holdings LLC
Andrew Boxberger
2404 West Jefferson
Fort Wayne, IN  46802

Description : Currently there is a 10,657 square foot auto dealership facility located on the subject property. There is a 5,671 square foot show room and office area with a 4,985 service area. The total site is 2.81 acres. The new project will consist of a 4,800 square foot storage building. The building will be constructed upon the existing asphalt lot. There will be no excavation or construction of a new floor as the new building will be built directly on top of that existing surface and the existing grade will remain the same. Details of the project are contained in information received electronically at the Division of Water on March 9, 2015 and in plans and information received at the Division of Water on

Stream: Eagle Creek

Applicant: Kosciusko County Board of Commissioners
Scott Tilden
2936 East Old Road 30
Warsaw, IN  46582-5604

Description: The existing single span, concrete box beam bridge carrying Country Club Rd. over Eagle Creek will be replaced with a new structure on the same alignment to improve traffic flow. The new structure will consist of side-by-side 21" concrete box beams with an HMA overlay supported by end bents on steel encased concrete piles. It will have a span length of 48'-0", out-to-out width of 36'-4", and a clear roadway width of 35'-10 3/4". The spill through abutments will have 2:1 sideslopes armored with revetment riprap over a geotextile fabric. The new approach road at the southern end of the project will be raised a maximum of 1-1/4" above the existing profile grade. The existing structure will be completely removed. Details of the project are contained in information received electronically at the Division of Water on March 10, 2015 and in plans and information received at the Division of Water on

Location: At the Country Club Road crossing near Warsaw, Wayne Township, Kosciusko County Section 17, T 32N, R 6E, Warsaw Quadrangle Quad Code: 4108527

Applicant: Hamilton County Highway Department
Chris M Wiseman
1700 South 10th Street
Noblesville, IN 46060-3835

Description: A commercial facility, multi-use path was developed along the (north) side of 146th Street, the existing pathway is not connected in various sections. This project is to promote safety and enhance the connectivity of the pathway. The facility will consist of no buildings or parking areas, but will consist of a multi-use path, 8’ - 10’ asphalt and/or 6’ concrete sidewalk to promote pedestrian safety along the north side of 146th Street. Details of the project are contained in information received electronically at the Division of Water on March 10, 2015 and in plans and information received at the Division of Water on

Location: Along the north side of 146th Street, starting at approximately 3392’ west of Allisonville Road, crossing White River Bridge and ending approximately 736’ west of Allisonville Road near Noblesville, Noblesville Township, Hamilton County

Application # : FW-27901

Stream : Unnamed Tributary
        Bluegrass Creek

Applicant : Evan Beck
            4763 Rosebud Lane
            Newburgh, IN  47630

Description : Site #2 of a 2-site wetland mitigation area is to be constructed to provide compensatory mitigation at a 2:1 ratio to offset anticipated wetland losses stemming from the expansion of a nearby warehouse and distribution center. The mitigation site is partially in the floodway of this UNT of Bluegrass Creek in the right overbank, between SR 57 and I-69, and north of an adjacent rail spur. Site #1 is outside of the floodway, and it is proposed south of said rail spur. The effective FIRM panel depicts this stream reach as an unstudied A Zone; however, approximately 1 acre of the 2.9 acre mitigation site (#2) is within the limits of the floodway as defined in FARA GN-15167-2 (dated April 26, 2001). The proposed site is currently used for agricultural production, and the mitigation area will be constructed by excavating at variable depths that are generally on the order of 1 to 1.5 feet below existing grade. A perimeter embankment berm (side slopes 3:1 H:V or flatter) is proposed along a portions of Site #2—primarily on the west and south sides, but outside of the floodway. A discharge spillway at the southeast corner of Site #2 (also outside of the floodway) will allow runoff to exit the mitigation area. Multiple drainage pathways / gullies flowing easterly that allow existing site runoff to drain directly to the UNT will be filled. Erosion and sediment control practices will be used during construction. Details of the project are contained in information received electronically at the Division of Water on March 12, 2015 and in plans and information received at the Division of Water on

Location : Approximately 600’ south of the intersection of Baseline Road and SR 57 at Elberfeld, Scott Township, Vanderburgh County
