The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of $0.10 per 8 1/2" X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director
Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

For a petition to be considered valid it must:

1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.
Little Eagle Creek
Indianapolis Department of Public Works
Long K Nguyen, PE
1200 South Madison Avenue, Suite 200
Indianapolis, IN 46225

The existing concrete arch bridge, Des # 1383169, carrying 30th Street over Little Eagle Creek will be rehabilitated on the same alignment. The rehabilitated structure will be a 2-span continuous composite prestressed concrete I-Beam bridge with 2 spans of 42' - 3". The structure will have a clear roadway width of 51' - 0". The abutments and pier will be armored with riprap placed over geotextile fabric. (INDOT Des No. 1383169). Details of the project are contained in information and plans received at the Division of Water on February 6, 2015 and March 2, 2015.

Beginning at the intersection of Lafayette Road and 30th Street, travel 780 feet west along 30 Street in the City of Indianapolis, Marion County, Indianapolis Indiana. Section 29, Township 16N, Range 3E, Center Township, Indianapolis West Quadrangle.

Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10
**Application #**: FW-27884  
**Stream**: Pleasant Run Creek  
**Applicant**: Johnson County Commissioners  
  Michael P Pelham, PE  
  1051 Hospital Road  
  Franklin, IN 46131-9025  

**Description**: Johnson County Bridge No. 604 will be rehabilitated. The existing superstructure, sidewalks, bridge railing, and median will be replaced due to deterioration. The new continuous reinforced concrete slab bridge will consist of 3 spans measuring 21' -3", 28' -6", and 21' -3". The bridge will have a 30 degree skew to the left and a clear roadway width of 59' -0". Additionally, the existing concrete slope walls will be removed and replaced with riprap on the same footprint for scour protection and will have 3:1 sideslopes. Temporary piles will be driven along the centerline of each of the 3 spans, including the center of the channel, for the support of the bridge formwork. These temporary piles will be cut off 2' below the existing ground line when they are no longer needed. There will be minimal roadway construction, with the exception of what is needed to tie into the new approach slabs. Details of the project are contained in information and plans received at the Division of Water on March 2, 2015.

**Location**: At the Madison Avenue stream crossing

**Statute/Rule**: Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10
A 50' by 48' parking area including five gravel parking stalls is proposed to replace parking lost to trail right-of-way. The parking area will be constructed by excavating 6" of existing ground and placing 6" of compacted aggregate in its place; the finished elevation will match existing grade. Details of the project are contained in information and plans received at the Division of Water on March 12, 2015, April 7, 2015 and April 9, 2015.

Location: Approximately 1110' east and 50' north of the Monroe Street and Logan Street intersection near Goshen, Elkhart Township, Elkhart County Section 10, T 36N, R 6E, Goshen Quadrangle

Statute/Rule: Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10
Application # : FW-27916

Stream : St. Joseph River

Applicant : City of Mishawaka
Gary West
600 East Third Street
Mishawaka, IN 46544-2441

Description : The proposed project includes the reconstruction of a retaining wall with a concrete retaining wall and the replacement of an 18" outfall pipe. The concrete wall will be connected to the existing retaining wall upstream and downstream. Approximately 40' of wall will be replaced. The pipe connection will be repaired and the area behind the retaining wall will be backfilled and returned to existing grade. Grout bags will be placed on the foundation of the wall to protect against scour. Details of the project are contained in information and plans received at the Division of Water on March 20, 2015.

Location : Approximately 1850' downstream of the Center Street crossing near Mishawaka, Penn Township, St. Joseph County NE¼, NW¼, Section 16, T 37N, R 3E, South Bend East Quadrangle Quad Code: 4108662 UTM Coordinates: Downstream 4612905 North, 567596 East

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10
Approximately 580 cubic yards of sediment will be removed from the Unit 2 and Unit 3 intake structures at the F.B. Culley Generating Station. The impacted areas in front of each intake measure approximately 34 feet by 50 feet and 33 feet by 50, respectively. The material will be relocated from the front of the intake structures to approximately 150’ out into the channel using an 8 inch submersible pump with a maximum capacity of 32 gpm. The work will be completed by a contracted diver. All debris will be removed from the floodway. Details of the project are contained in information and plans received at the Division of Water on March 24, 2015.

Beginning approximately 1075’ of the Little Pigeon Creek confluence and extending 150’ downstream along the right (north) stream bank near Yankeetown, Anderson Township, Warrick County Section 17, T 7S, R 8W, Yankeetown, IN-KY Quadrangle Quad Code: 3708783

### Stream
- Back Creek

### Applicant
- David E Lee
  - 899 North Deer Run Road
  - Salem, IN  47167

### Description
A removal of dirt and san bars from creek is proposed. Specific project information will be added to the description as the application is further reviewed. Details of the project are contained in information and plans received at the Division of Water on March 25, 2015.

### Location
- Beginning approximately 200 feet downstream of the McIntyre Bottom Road stream crossing and extending approximately 6670' near Salem, Guthrie Township, Lawrence County
  - Section 7, T 4N, R 2E, Tunnelton Quadrangle
  - Quad Code: 3808673
  - UTM Coordinates: Downstream 4294306 North, 558286 East

### Statute/Rule
- Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10
CSX Transportation (CSXT) is proposing to replace the spans of the Little Vermilion River railroad bridge located at Milepost 0ZA 146.7 along CSXT’s right-of-way in Newport, Vermilion County, Indiana. Replacement of this bridge is needed to ensure the track’s structural integrity, thereby protecting the safety of CSXT’s right-of-way and employees and reducing loss in rail line use. CSXT wishes to replace the bridge with one with a higher bridge deck due to frequent flooding. CSXT is proposing to install new spans on the existing piers and abutments. Minor repair work, including a few inches of concrete encasement of the center pier and abutments will also be conducted. No in-stream work is proposed. Vehicles and equipment will access the site from County Road 00. A 45-foot by 45-foot staging area is proposed southeast of the bridge. Some work will be conducted via a crane parked in the staging area, allowing all work to be conducted from the top of the bridge or the staging area. No vehicles or heavy equipment will be driven into the river. A ditch (unnamed tributary to Little Vermilion River) is located approximately 28 feet southwest of the rail line and runs northwest from County Road 00 to Little Vermilion River, outside of the project area. No other wetlands surface water features occur within the proposed project area or its vicinity. Details of the project are contained in information received electronically at the Division of Water on April 2, 2015 and in plans and information received at the Division of Water on

Project work would occur within Little Vermilion River in the immediate area of the CSXT railroad bridge located at Milepost 0ZA 146.7 along CSXT’s right-of-way in Newport, Vermilion County Indiana. The bridge is located at 39.887441° N Latitude and -87.396978° W Longitude in Vermilion Township.

Construction equipment and materials would be temporarily stored along approximately 45 feet of the south bank of the railroad bridge within CSXT right-of-way. The project site occurs in Section 26, Township 17N, Range 9W, Newport Quadrangle, Vermillion Township.

Application # : PL-22694
Lake : Dewart Lake
 Applicant : Linda I Miller
 15 EMS D3 lane
 Syracuse, IN 46567

Description : A new seawall will be constructed across 125' of the 125' frontage of the applicant to deter shoreline erosion. The wall will consist of concrete which will be sloped on the lakeward side. It will be 24" high and will vary uniformly in thickness from 18" to 12" from the base to the top. The lakeward face of the wall will be at the legal shoreline. A 6" wide layer of gravel will be placed at the base of the wall for toe protection. Details of the project are contained in information received electronically at the Division of Water on April 6, 2015 and in plans and information received at the Division of Water on

Application # : PL-22696
Lake : Sechrist Lake
Applicant : bruce martin
1415 North Mulburry Street
Hartford City, IN  47348

Description : A new 60' rock seawall will be constructed within the applicants 60' frontage on sechrist lake by putting heavy duty geotextile material down and hand place natural fieldstone 2.5' up and 2.5' out following the existing legal shoreline. 6" to 12" natural fieldstone will be used. All existing concrete will be removed and hauled off site. Also, a 25' by 25' underwater beach will be installed in the center of the 60' frontage starting 17.5' from the east property line using clean 7/64" washed pea gravel placed directly on the lake bed not to exceed 6" in thickness. Details of the project are contained in information received electronically at the Division of Water on April 6, 2015 and in plans and information received at the Division of Water on

Lake :  Irish Lake
Applicant :  ronald thomas
            4500 West Legacy Drive
            Muncie, IN  47304-5982

Description :  A new 40' by 20' lakeward underwater beach will be constructed in front of the property of the applicant on Irish lake to provide a swimming area. The beach will consist of a 4" to 6" thick layer of (7/64" clean, washed pea gravel) placed directly on the lakebed. The beach will begin at the southwestern property line and extend easterly across 40' of the 80' lake frontage. It will have a maximum lakeward projection of 20' or 6' water depth which ever occurs first. Details of the project are contained in information received electronically at the Division of Water on April 6, 2015 and in plans and information received at the Division of Water on
