The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of $0.10 per 8 1/2" X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director
Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

For a petition to be considered valid it must:
1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.
**Description**: Repair and restoration to existing covered bridge to include painting, roof, siding, and deck replacement. The bridge is approximately 156' long. We will need to build temporary drive way to access the underside of the bridge. A riprap pad may be placed in the waterway to accommodate a lift. This would not exceed 80' from south abutment. Details of the project are contained in information received electronically at the Division of Water on April 10, 2015 and in plans and information received at the Division of Water on

**Location**: At the County Road 575 crossing near Scipio, Geneva Township, Jennings County

**Statute/Rule**: Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10
Application # : FW-27944

Stream : Willow Creek

Applicant : City of Portage, Port Authority
AJ Monroe
6070 West Central Avenue
Portage, IN  46368

Description : Approximately 290 linear feet of the north bank of Willow Creek has eroded and will be stabilized with riprap, gabions and vegetated soil lifts to protect the bank from further erosion. The riprap will be keyed into the streambed at its base and will conform to the existing bank at the project limits. The riprap will have a maximum height of fifteen (15) feet, a maximum streamward projection of one and one-half (1 1/2) feet beyond the existing bank on a regraded sideslope of two (2) to one (1). Within the 290-feet project reach, a 40 feet long area will be treated with vegetated soil lifts on top of gabions. The gabions will be set on a bed of crushed stone with one (1) three (3) feet tall gabion below the normal water level of the stream. Three (3) additional gabions will be stacked on the base gabion and the top gabions covered with several layers of fabric encapsulated soil lifts at an overall slope of two (2) to one (1). The gabions above the base will be three (3) feet tall and three (3) feet deep with widths from three (3) to four and one-half (4 1/2) feet. The soil lifts will be seeded with a streambank slope seed mixture. Details of the project are contained in information received electronically at the Division of Water on April 16, 2015 and in plans and information received at the Division of Water on

Location : Immediately south of the south end of Gina Street.
At Portage, Portage Township, Porter County
Section 11, T 36N, R 7W, Portage Quadrangle
Quad Code: 4108752

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10
This project involves the replacement of the existing ten span prestressed concrete I-beam bridge carrying Eighth Street over White River. The proposed structure will be a six span (114'-4", 115'-8", 115'-8", 115'-8", 115'-8", 114'-4") continuous prestressed concrete U-Beam bridge with a composite concrete deck built on a 30 degree left skew. The proposed bridge will have a 28'-0" clear roadway width in each direction with sidewalks and a 76'-8" out-to-out width. The current profile grade of the road will be lowered approximately 5’ maximum west of the bridge and raised approximately 1’ maximum east of the bridge. The existing low structure elevation is 844.00 and the proposed low structure elevation will be 844.22. Impacts to the White River would consist of temporary channel encroachments to facilitate construction of the new piers. It is not known at this time the specific construction methods to be employed during construction; however, it is assumed that a temporary causeway and cofferdams would be required to gain access for construction. Permanent impacts would consist of new piers placed at each river bank and in the channel. It is estimated that approximately 240’ to 250’ feet of waterway impacts may result from the construction of the piers. There would be no bank shaping or other permanent alterations that would extend below the ordinary high watermark of the channel, with the exception of the new pier construction. The spill slope at the east end bent will have a 2:1 side slope armored with a closed cell articulated concrete mattress. The west bank will also be armored with a closed cell articulated concrete mattress. Project limits would be minimized and contained to the extent possible and would likely not extend more than 75’ to 100’ either side of the bridge. The project is federally funded (LPA). Details of the project are contained in information received electronically at the Division of Water on April 16, 2015 and in plans and information received at the Division of Water on April 16, 2015.

Location: Approximately 1.2 miles west of the intersection of S.R. 9 and Eighth Street in Anderson, Section 12, Township 19 N, Range 7 E and 8E, Anderson Township, Madison County, IN.

Application #: PL-22688
Lake: Winona Lake
Applicant: Timothy Harman
44 Little Eagle Drive
Warsaw, IN 46580

Description: A 110' by 5' area will be dredged within a in-lake channel by removing a maximum of 5' below the lake’s legal level at the center of the channel and sloping uniformly to a depth of 1 to 6 feet at the shoreline. The dredging will be performed by a backhoe. The excavated material will be transported off site to an upland area. Details of the project are contained in information and plans received at the Division of Water on March 25, 2015.

Location: 44 Little Eagle Drive

Lake : Winona Lake
Applicant : Town of Winona Lake Park and Recreation
Craig Allebach
1310 Park Avenue
Winona Lake, IN  46590-1664

Description : An existing concrete seawall will be refaced cross a portion of the 470' frontage of the applicant on Winona Lake to prevent deterioration. The refacing will consist of reinforced concrete which will be tied to the existing wall with 1/2 inch re-rod. The refacing will have a maximum thickness of 12" and will be sloped on the lakeward side. A 24" wide concrete walkway will be constructed on top and landward of the lakeward face of the refaced wall. This refacing will be done in 4 parts. The length of the channel is 1700'. First part will be 60' at the north end, 80' north of the foot bridge, then 330' at the south end. Also refacing the 2 sets of pillars (3 in a set) on the foot bridge. Details of the project are contained in information received electronically at the Division of Water on April 8, 2015 and in plans and information received at the Division of Water on

Location : Along the channel on the east side of Winona Lake
near Winona Lake, Wayne Township, Kosciusko County

Statute/Rule : Lakes Preservation Act, IC 14-26-2, with the associated Public Freshwater Lake Rule, 312 IAC 11
### Application # PL-22700

**Lake:** Oswego Lake  
**Applicant:** John Warren  
233 EMS T 26 Lane  
Leesburg, IN 46538

**Description:** An existing concrete seawall will be refaced across a portion of the 152' frontage of the applicant on Oswego Lake to prevent deterioration. The refacing will consist of reinforced concrete which will be tied to existing wall with 1/2 inch re-rod. The refacing will have a maximum thickness of 12" and will be sloped on the lakeward side. A 12" wide layer of 2U stone will be placed at the base of the wall for toe protection. A 24" wide concrete walkway (will be) constructed on top and landward of the lakeward face of the refaced wall. Details of the project are contained in information received electronically at the Division of Water on April 14, 2015 and in plans and information received at the Division of Water on

**Location:** 233 EMS T 26 Lane  
near Oswego, Plain Township, Kosciusko County

**Statute/Rule:** Lakes Preservation Act, IC 14-26-2, with the associated Public Freshwater Lake Rule, 312 IAC 11

### Application # PL-22701

**Lake:** Irish Lake  
**Applicant:** David A Jackson  
375 Reading Station  
Avon, IN 46123

**Description:** A new concrete seawall will be constructed across 20' of the applicant's 20' frontage. The lakeward face of the wall will be located along the lake's legal/average normal shoreline. Details of the project are contained in information received electronically at the Division of Water on April 15, 2015 and in plans and information received at the Division of Water on
